Screen Design Strategies For Computer-based Instruction:

A Study of the Application of Screen Design Strategies in the Design and Development of Computer-based Instruction (CBI). Fayola K. Ama, Mary Ann C. Chezick, 1995 Strategies of Computer-based Instructional Design Dudley J. Terrell, 1990 Screen Design Manual Frank Thissen, 2003-09-11

The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships clarifying them with examples and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists along with the comprehensive design of the book support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer-based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning.

Key Topics: Interactive media, Text for the screen, Effective use of pictures, Video animation and sound, Screen layout, Orientation and navigation, Interaction, Emotions and metamessages, Intercultural communication.

The Design and Development of Computer Based Instruction J. Steven Soulier, 1988. This book is a hands-on guide for designing and developing computer-based materials for education and training. The text is written from an educational instructional design aspect rather than from a programming point of view. Topics covered in the book include:

1. design structures of computer-based instruction
2. performing an analysis of the intended instruction
3. managing individualizing and humanizing computer-based instruction
4. designing program management and instructional frames
5. designing screen displays
6. using text and graphics in computer-based instruction
7. developing program documentation and support materials

Many figures are given representing both positive and negative instances of program design.

MVL Interface Design for Learning Dorian Peters, 2013-11-26. In offices, colleges, and living rooms across the globe, learners of all ages are logging into virtual laboratories, online classrooms, and 3D worlds. Kids from kindergarten to high school are honing math and literacy skills on their phones and iPads. If that weren't enough, people worldwide are aggregating internet services from social networks to media content to learn from each other in Personal Learning Environments. Strange as it sounds, the future of education is now as much in the hands of digital designers and programmers as it is in the hands of teachers. And yet as interface designers, how much do we really know about how people learn? How does interface design actually impact learning? And how do we design environments that support both the cognitive and emotional sides of learning experiences? The answers have been hidden away in the research on education psychology and human computer interaction until now. Packed with over 100 evidence-based strategies, in this book you will learn how to Design educational games, apps, and multimedia.
