Screen Histories A Screen Reader:

Screen Histories Annette Kuhn, Jackie Stacey, 1998 *Screen Histories A Screen Reader* offers a selection of some of the best work on the varied and changing notions of the category history in screen studies published in *Screen* in the last twenty years. The book brings together important work in this area at a time when history is an increasingly contested category within academic debate. It includes interventions on the conceptualization of history in studies of screen institutions, technologies, discourses, texts and audiences. In addition, the varied meanings of the concept of history for film and television studies in both Britain and the USA are represented and fully explored. The book includes contributions by established scholars in the field and work by new researchers whose work bids fair to shift the entire agenda of screen historiography. It challenges the boundaries conventionally raised between history and other areas of screen study such as textual analysis and audience ethnography and indeed between history and theory and many of the contributions confirm the key role being played by theoretically sophisticated historical work in the development of film and television studies as a whole.

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2008-07-04 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee encompassing 102 experts from all over the world selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize Special Thematic Sessions (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state of the art and mainstream technical, social, cultural and political developments. Our keynote speaker Jim Fruchterman from BeneTech USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by H. Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI WCAG 2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

Assistive Technology for Visually Impaired and Blind People Marion Hersch, Michael A. Johnson, 2010-05-12 Equal accessibility to public places and services is now required by law in many countries. For the vision-impaired, specialised technology often can provide a fuller enjoyment of the facilities of society, from large-scale meetings and public entertainments to reading a book or making music. This volume explores the engineering and design principles and techniques used in assistive technology for blind and vision-impaired people. This book maintains the currency of knowledge for engineers and health workers who develop devices and services for people with sight loss and is an excellent source of reference for students of assistive technology and rehabilitation.
