Shrunken City:

Superman: The Shrinking City Michael Dahl, 2014-04 Thirty years ago BRAINIAC shrank the city of KANDOR and sealed it inside an unbreakable glass container The evil supercomputer is still exploring the universe collecting cities from hundreds of planets SUPERMAN must stop BRAINIAC from bottling up METROPOLIS and then save KANDOR the last remnant of his home planet KRYPTON

The City in Time and Space Aidan Southall, 1998 This ambitious book treats urbanisation and urbanism all over the world and from the earliest times to the present Aidan Southall a pioneer in the study of African cities discusses the urban centres of ancient Sumeria Greece and Rome as well as medieval European cities Chinese Japanese Islamic and Indic cities colonial cities and the great metropolises of the twentieth century Drawing on this historical and comparative perspective he offers a fresh analysis of world urbanisation in the contemporary period of globalisation The study emphasises the enduring paradox of the city which juxtaposes splendid cultural productions with the poverty and deprivation of the majority

Future Directions for the European Shrinking City William J.V. Neill, Hans Schlappa, 2016-01-13 Urban shrinkage is rising to the top of the political agenda in Europe as more cities are shrinking in the prolonged economic downturn we encounter Coupled with unprecedented budgetary austerity and rapidly ageing populations stagnating and shrinking cities have emerged as a key challenge for policy and practice for decades to come Local actors need to find new ways of collaborating across sectors agencies and disciplines to unlock opportunities for interventions that mitigate the worst effects of urban shrinkage and long term decline Future Directions for the European Shrinking City focuses on policy and planning interventions that can be taken by municipalities and their local stakeholders to tackle stagnation and decline With case studies from a range of European countries this book proposes ways to tackle shrinkage through governance policy planning social economic and management interventions Edited by William J V Neill and Hans Schlappa this book is ideally suited for policy makers and practitioners in urban planning regeneration and economic development dealing with pressing spatial and socio economic issues on a European scale

The Skyscraper and the City Gail Fenske, 2008-08 Once the world's tallest skyscraper the Woolworth Building is noted for its striking but incongruous synthesis of Beaux Arts architecture fanciful Gothic ornamentation and audacious steel framed engineering Here in the first history of this great urban landmark Gail Fenske argues that its design serves as a compelling lens through which to view the distinctive urban culture of Progressive era New York Fenske shows here that the building's multiplicity of

meanings reflected the cultural contradictions that defined New York City's modernity. For Frank Woolworth, founder of the famous five and dime store chain, the building served as a towering trademark for advocates of the City Beautiful movement; it suggested a majestic hotel de ville for technological enthusiasts; it represented the boldest of experiments in vertical construction; and for tenants, it provided an evocative setting for high style consumption. Tourists meanwhile experienced a spectacular sightseeing destination, and avant garde artists discovered a twentieth century future. In emphasizing this faceted significance, Fenske illuminates the process of conceiving, financing and constructing skyscrapers, as well as the mass phenomena of consumerism, marketing, news media and urban spectatorship that surround them. As the representative example of the skyscraper as a cathedral of commerce, the Woolworth Building remains a commanding presence in the skyline of lower Manhattan, and the generously illustrated *Skyscraper and the City* is a worthy testament to its importance in American culture. *Bulletin Far Eastern Information Bureau, Nanking, China, 1929* *Cities Into Battlefields* Stefan Goebel, Derek Keene, 2011-01-01 This book explores the cultural imprint of military conflict on metropolises worldwide in the First and Second World Wars. It brings together cultural and urban historians and scholars of anthropology, education, geography and urban planning, and examines how the emergence of total warfare blurred the boundaries between home and front, and transformed cities into battlefields. The central contention of this volume is that total war in the twentieth century has a significant but often overlooked metropolitan dimension, which is addressed, filling a gap in the currently available literature.

The Last City of Krypton Michael Dahl, 2017-01-01 Years before Krypton explodes, the ruthless super villain Brainiac shrinks the capital Kandor to miniature size and adds it to his collection of cities from across the universe. When Brainiac eventually reaches the Earth and turns his shrinking ray on her cities, Superman comes to the rescue and halts his evil plans.

The Bread of Affliction William Moskoff, 2002-08-08 This book tells how the Soviet Union fed itself after the invasion by the Germans during World War II. The author argues that central planning became much less important in feeding the population, and civilians were thereby forced to become considerably more self-reliant in feeding themselves. A rationing system was instituted soon after the war began but quickly became irrelevant because of the chronic food shortages. The breakdown in central supplies of food was accompanied by the diminished importance of the ruble, which in many places was replaced by bread and clothing as the medium of exchange. Although the Soviet army was given high precedence over civilians, the author also shows that the population living under German occupation was much worse off than were Soviet civilians living in the rear. In addition to extensive use of American and German archives from the war period, the author interviewed more than thirty Soviet emigrants who survived the war. **Maps to Anywhere** Bernard Cooper, 1997-09-01 The essays in *Maps to Anywhere* plot terrain that is at once familiar and subtly strange. Writing on subjects ranging from his family to the origin of the barbershop pole, Bernard Cooper digs into the glimmering surface of the southern California landscape, observing the collision of the American Dream with the realities of everyday life. From the fragments he discovers

landmarks by which he attempts to make sense of contemporary America
