Weekly Standard China's prosperity has increased dramatically in the last two decades propelling the nation to a prominent position in the international community Yet China's ancient history still informs and shapes its understanding of itself in relation to the world As a highly developed and modern nation China is something of a paradox In *The Mind of Empire: China's History and Modern Foreign Relations* Christopher A Ford demonstrates how China's historical awareness shapes its objectives and how the resulting national consciousness continues to influence the country's policymaking Despite its increasing prominence among modern developed nations China continues to seek guidance from a past characterized by Confucian notions of hierarchical political order and a moral geography that places China at the center of the civilized world *The Mind of Empire* describes how these attitudes have clashed with traditional Western ideals of sovereignty and international law Ford speculates about how China's legacy may continue to shape its foreign relations and offers a warning about the potential global consequences He examines major themes in China's conception of domestic and global political order describes key historical precedents and outlines the remarkable continuity of China's Sinocentric stance Expertly synthesizing historical philosophical religious and cultural analysis into a cohesive study of the Chinese worldview Ford offers revealing insights into modern China A much needed and an erudite contextualization this book will benefit immensely those interested in the history and strategic culture of China's foreign policy *The China Quarterly* *The Crisis of the European Mind* Paul Hazard, 2013-04-09 Paul Hazard's magisterial widely influential and beloved intellectual history offers an unforgettable account of the birth of the modern European mind in all its dynamic inquiring and uncertain glory Beginning his story in the latter half of the seventeenth century while also looking back to the Renaissance and forward to the future Hazard traces the process by which new developments in the sciences arts philosophy and philology came to undermine the stable foundations of the classical world with its commitment to tradition stability proportion and settled usage Hazard shows how travelers tales and archaeological investigation widened European awareness and acceptance of cultural difference how the radical rationalism of Spinoza and Richard Simon's new historical exegesis of the Bible called into question the revealed truths of religion how the Huguenot Pierre Bayle's critical dictionary of ideas paved the way for Voltaire and the Enlightenment even as the empiricism of Locke encouraged a new attention to sensory experience that led to Rousseau and romanticism Hazard's range of knowledge is vast and whether the subject is operas excavations or scientific experiments his brilliant style and powers of description bring to life the thinkers who thought up the modern world
