Siberian Curse How Communist Planners Left Russia Out In The Cold:

The Siberian Curse Fiona Hill, Clifford G. Gaddy, 2003-11-04 Can Russia ever become a normal free market democratic society Why have so many reforms failed since the Soviet Union's collapse In this highly original work Fiona Hill and Clifford Gaddy argue that Russia's geography history and monumental mistakes perpetrated by Soviet planners have locked it into a dead end path to economic ruin Shattering a number of myths that have long persisted in the West and in Russia The Siberian Curse explains why Russia's greatest assets its gigantic size and Siberia's natural resources are now the source of one its greatest weaknesses For seventy years driven by ideological zeal and the imperative to colonize and industrialize its vast frontiers communist planners forced people to live in Siberia They did this in true totalitarian fashion by using the GULAG prison system and slave labor to build huge factories and million person cities to support them Today tens of millions of people and thousands of large scale industrial enterprises languish in the cold and distant places communist planners put them not where market forces or free choice would have placed them Russian leaders still believe that an industrialized Siberia is the key to Russia's prosperity As a result the country is burdened by the ever increasing costs of subsidizing economic activity in some of the most forbidding places on the planet Russia pays a steep price for continuing this folly it wastes the very resources it needs to recover from the ravages of communism Hill and Gaddy contend that Russia's future prosperity requires that it finally throw off the shackles of its Soviet past by shrinking Siberia's cities Only by facilitating the relocation of population to western Russia closer to Europe and its markets can Russia achieve sustainable economic growth Unfortunately for Russia there is no historical precedent for shrinking cities on the scale that will be required Downsizing Siberia will be a costly and wrenching process

Russia Against Modernity Alexander Etkind, 2023-04-04 Putin's war is a special operation against modernity The invasion has been directed against Ukraine but the war has a broader target the modern world of climate awareness energy transition and digital labor By trading oil and gas promoting Trump and Brexit spreading corruption boosting inequality and homophobia subsidizing far right movements and destroying Ukraine Putin's clique aims at suppressing the ongoing transformation of modern societies Alexander Etkind distinguishes between Russia's pompous weaponized paleomodernity on the one hand and the lean decentralized gaia-modernity of the Anthropocene on the other Putin's clique has used various strategies from climate denialism and electoral interference to war and genocide to resist and subvert modernity Working on political cultural and even demographic levels social mechanisms convert the vicious energy of the oil curse into all out aggression Dissecting these mechanisms Etkind's brief but rigorous analyses of social structuration cultural dynamics and family models reveal the agency that drives the Russian war against modernity This short sharp critique of the Russian regime combines political economy social history and demography to predict the decolonizing and defederating of Russia

Science, Geopolitics and Culture in the Polar Region Sverker Sörlin, 2016-04-01 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden

made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions

The Russia Balance Sheet Anders Åslund, 2009 Introduction why Russia matters and how Russia's historical roots Political development from disorder to recentralization of power Russia's economic revival past recovery future challenges Policy on oil and gas International economic integration trade policy and investment Challenges of demography and health Russian attitudes toward the West Russia as a post imperial power Pressing the reset button on US Russia relations Key facts on Russia 2000 2008

The Challenges for Russia's Politicized Economic System Susanne Oxenstierna, 2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied

Russia and Eurasia 2024-2025 Navruz Nebakhtshoev, 2024-10-25 The World Today Series Russia and Eurasia deals with twelve sovereign states that became independent following the collapse of the Soviet Union in December 1991 Approximately one third of the book is devoted to Russia The remainder of the book is comprised of separate chapters on Armenia Azerbaijan Belarus Georgia Kazakhstan Kyrgyzstan Moldova Tajikistan Turkmenistan Ukraine and Uzbekistan The text focuses heavily on recent economic and political developments within these twelve states Each country chapter offers descriptions and overviews of the respective governmental institutions key leaders civil society dynamics and economic conditions within each state It supplements this focus with shorter sections dealing with historical developments demographics foreign policy and cultural elements Each chapter concludes with brief projections of future developments

within each state The combination of factual accuracy and up to date detail along with its informed projections make this an outstanding resource for students researchers practitioners in international development media professionals government officials and potential investors

Politics in Russia Thomas F Remington, 2015-07-22 Highly regarded for its comprehensive coverage up to date scholarship and comparative framework Politics in Russia is an authoritative overview of Russia's contemporary political system and its recent evolution Area specialist Thomas Remington focuses on four areas of change in this text state structure regime change economic transformation and identity to offer a dynamic context for analyzing the post Soviet era With a consistent emphasis on the intersection of politics and economics and the tension between authoritarian and democratic trends no other text guides students through the complexities and ambiguities of Russian politics today like Politics in Russia

To be at Home James Williams, Felicitas Hentschke, 2018-09-24 Houses and homes are dynamic spaces within which people work to organize and secure their lives livelihoods and relationships Written by a team of renowned historians and anthropologists and accompanied by original photography by Maurice Weiss *To Be at Home* House Work and Self in the Modern World compares the ways people in different societies and historical periods strive to make and keep houses and homes under conditions of change upheaval displacement impoverishment and violence These conditions speak to the challenges of life in our modern world The contributors of this volume position the home as a new nodal point between work the self and the world to explore people's creativity agency and labour Houses and homes prove complex and powerful concepts if also often elusive invoking places persons objects emotions values attachments and fantasies This book demonstrates how the relations between houses work and the self have transformed dramatically and unpredictably under conditions of capitalism and modernity and continue to change today
