Handbook of Psychiatry: Volume 2, Mental Disorders and Somatic Illness M. H. Lader,1983-08-31 This 1986 volume of the Handbook of Psychiatry covers that area of psychiatry contiguous with general medicine and in particular neurology It raises general issues especially with respect to fundamental problems of the mind body relationship and deals with medical disorders related to psychiatry The topics discussed include ischaemic heart disease peptic ulcers bronchial asthma renal failure endocrine disorders and ageing as well as neuropsychiatry There is also an account of selected aspects of severe subnormality concentrating on the practical management of the severely handicapped child and adult Throughout this volume the contributors provide a clinically relevant account of their topics The volume will continue to hold value as a comprehensive survey of the medical history of mental disorders associated with somatic illness **A Geography of Infection** Matthew R. Smallman-Raynor,Andrew D. Cliff,J. Keith Ord,Peter Haggett,2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on
