The Beeching Legacy Phil Horton, 2019-10-24 The first edition of this popular volume has been out of print for several years and has become much sought after. Produced in black and white the first edition was the first volume in the series taking a detailed regional look at the Beeching Report its proposals for closures and modifications of the UK railway network. The report has become legendary and the interest and debate it generated is no less today than it has ever been since first published. Indeed with railways now rejuvenated and passenger numbers growing ever larger the reflection on what Beeching got right and what perhaps in hindsight got very badly wrong makes for fascinating reading. This new expanded second edition has been completely reworked and is now published with color illustrations both new and replacing the original black and white images where possible. The text has been expanded and updated as appropriate and there are 32 extra pages bringing the new edition to 192 pages

Seventy Years of the South Western Colin Boocock, 2022-07-28 The South Western main line is one of the most important railways in the south of England. Colin Boocock spent a significant part of his life living on and researching the history of this centre of railway operations in the South and South West of England. This book looks at the network over the last seventy years from Nationalisation through to the present day. The system provides a vital link between the South and South West of Britain and London operating a mixture of commuter services and important main line passenger trains. Throughout the seventy years covered in this book the South Western network also had significant flows of heavy freight between the capital and Southampton Docks and the West Country. Today there are still frequent well loaded container trains from Southampton to the Midlands and the North via Basingstoke and Reading. This volume also covers the transitions from steam traction to diesel and electric in stages from the 1950s through to the late 1980s

Edwardian Devon 1900-1914 David Parker, 2016-08-04 A century ago Britain was locked in a devastating worldwide conflict that would change every aspect of society. This book explores life in Devon between 1900 and 1914 offering a revealing glimpse of a world now long vanished before war broke out. Devon was no backwater its railways and shipping were busy bringing tourists

in and sending vast quantities of produce out. It was though a county of contrasts and change. Farming had reinvented itself after the late Victorian depression but villages were in decline, churches and chapels were full but religion bitterly divided communities. The wealthy enjoyed extravagant lifestyles on great estates but their authority was under attack. Devon's upper middle and lower class schools perfectly reflected the Edwardian social hierarchy but as the county's elections revealed society was being torn asunder by bitter controversies over exactly who should have the vote, rule the country and control the Empire. It was a worrying time overseas too. Great Britain's supremacy was increasingly challenged and the warships in Devon's harbours and army manoeuvres on the moors drew many comments as the storm clouds began to gather over Europe. Using mainly contemporary sources, this engaging book examines the attitudes and experiences of people across all social classes in this tumultuous era.
