Disciplining Germany Jaimey Fisher, 2007-06-20 A look at how the discussions debates and controversies in Germany about youth and reeducation after World War II helped Germans come to terms with their Nazi past negotiate Allied occupation and construct postwar German identity During Hitler s reign the Nazis deliberately developed and exploited a youthful image and used youth to define their political and social hierarchies After the war with Hitler gone but still requiring cultural exorcism many intellectuals authors and filmmakers turned to these images of youth to

navigate and negotiate the most difficult questions of Germany's recent nefarious past. Focusing on youth education and crime allowed postwar Germans to claim one last realm of sovereignty against the Allies' own emphatic project of reeducation. Youth reeducation and reconstruction became important sites for the occupied to confront not only the recent past but to negotiate the present occupation and ultimately direct the future of the German nation. *Disciplining Germany* analyzes a variety of media including literature, news media, intellectual history, and films in order to argue that youth and education played a central role in Germany's coming to terms with the Nazi past. Although there has been a recently renewed interest in Germany's coming to terms with the past, this attention has largely ignored the role of youth and reeducation. This lacuna is particularly perplexing given that the Allies' reeducation project became in many ways a cipher for the occupational project as a whole. *Disciplining Germany* opens up the discussion and points toward more general conclusions not only about youth and education as sites for wider socio-political and cultural debates but also about the complexities of occupation and the intertwining of different national cultures. In this investigation, the study attends to both high and low cultural text to specialized versus popular texts to examine how youth was mobilized across the generic spectrum. With these interdisciplinary approaches and timely interventions, *Disciplining Germany* will find a diverse readership including upper division and graduate courses in German studies and German history as well as those general readers interested in Nazi Germany, cultural history, film, and literary studies, youth culture, American studies, and post-conflict and occupational situations.

**Take Two** John E. Davidson, Sabine Hake, 2007. This anthology offers an account of German cinema in the fifties, focusing on popular genres, famous stars, and dominant practices, taking into account the complicated relationships between East and West Germany and by paying attention to the economic and political conditions of film production and reception during this period.
