philosophy or his ideas But as some scholars of Spanish Golden Age drama have argued the study of Calderon s theater must take into account not only the literary text but also the physical conditions of the stage the elements used in the representation decor costumes lighting music and the house dynamics at each performance In other words each play must be considered as a composition of the soul and body of poetry and spectacle in which both elements support complement and explain one another in performance This is the task that has been undertaken by the contributors to this volume By focusing on the relationship between text and performance they have highlighted several areas that are often overlooked in traditional text based approaches From different perspectives they show how Calderon gives concrete shape to the concepts and tales from the Bible theology mythology the Corpus Hermeticum emblematic literature philosophy and realities of civic and domestic origin
