## Loves Gravity:

**Baby Loves Gravity!** Ruth Spiro, 2018-05-01 Big brainy science for the littlest listeners Accurate enough to satisfy an expert yet simple enough for baby this clever board book explores the ups and downs of gravity When baby drops food from a high chair why does it fall Beautiful visually stimulating illustrations complement age appropriate language to encourage baby's sense of wonder Parents and caregivers may learn a thing or two as well With tongue firmly in cheek the Baby Loves Science series is a fun filled introduction to STEM concepts for babies toddlers and their grown ups Love Disconsolated

Timothy P. Jackson, 1999-11-25 Few concepts are more central to ethics than love but none is more subject to false consolation This 1999 book explores several theological philosophical and literary accounts of love focusing on how it relates to matters such as self interest and self sacrifice and invulnerability and immortality Timothy Jackson first considers key aspects of what the Bible says about love then he further examines the meaning of love and sacrifice through a close reading of novels by Fitzgerald and Hemingway Lastly he evaluates how love constrains and is constrained by other traditional moral concepts Throughout Jackson defends the moral priority of what the Christian tradition calls agape He argues that a proper understanding of agapic love rejects both moral relativism and the comfort of believing that good people cannot be harmed or that God causally necessitates every historical action and event When love is thus disconsolated it neither fears death nor despises life

**Heaven's Court** Tylia L. Flores, 2026-03-17 Sometimes God's greatest miracles come wrapped in heartbreak hope and grace Eighteen year old Megan Holloway has spent her whole life proving that cerebral palsy doesn't define her it refines her Nonverbal but full of light she speaks through her device her art and her unwavering faith in Jesus When her inspiring story is featured on ESPN two college basketball players Colin Matthews of the Kentucky Wildcats and Buckley Buck Turner of the Georgia Bulldogs see her video and both reach out unaware that they're about to fall in love with the same girl What begins as two unexpected friendships soon becomes something deeper two different kinds of love from two very different men Colin's gentle faith rooted devotion brings her peace Buck's bold Southern spirit sets her heart on fire As Megan's health begins to fade she must navigate the hardest choice of all between the two men who've shown her God's heart in different ways or surrender to the One who holds her future in His hands Set in the early 2000s and told through letters late night Yahoo chats and tender moments of faith Heaven's Court The Last Game of Her Heart is a deeply emotional Christian romance that reminds us that even when life runs out of time love never does *The Stone Loves the World* Brian Hall, 2022-06-14 A warm inventive and multilayered novel about two families one made up largely of scientists and the other of artists and mystics whose worlds collide in pursuit of a lost daughter Mette a twenty year old programmer of visual effects for video games lives with her mother Saskia an aspiring playwright in Brooklyn Mette is a private and socially awkward young woman who finds something consoling in repetitive mathematical calculations But she has been recently rejected in love and feels stuck in an endless loop no longer certain of her place in the world As Brian Hall's new novel opens Mette has

gone missing Her disappearance forces Saskia to reunite with Mette s father Mark an emotionally distant astronomy professor in Ithaca to embark on a journey together to find her Mette s path will take her across America and then to a fateful visit with her charismatic grandfather Thomas who formerly ran the commune north of Ithaca where Saskia was raised and who now lives as a hermit in a windmill on a remote Danish island Playing out over nine decades and three generations and stitching together a dazzling array of subjects from cosmology and classical music to number theory and medieval mystery plays The Stone Loves the World is a story of love longing and scientific wonder It offers a moving reflection on the human search for truth meaning and connection in an often incomprehensible universe and on the genuine surprises that the real world and human society can offer

**Parallels** V.S.Sury,2020-06-04 The phenomena and events which occur incessantly in Nature are countless But on careful observation we can notice that some forms of common threads run across different platforms or fields These fascinating parallels can be found amidst the world of human affairs also apart from the natural scientific laws and theories Look at how a very large unit or organization or organism or machine is very conveniently and smartly assembled out of many smaller units The beauty is that the smaller constituent units work independently and at the same time are also a part of the whole Take human individuals and as a parallel the theme of this book the physical house in which they dwell Individuals come together and make families Families live together and make groups or organizations or societies They in turn combine and grow into states states join up and become a nation All nations of course make up the world whether they like it or not Physical purely material entities like houses and possessions run in a parallel stream with those of human ideologies The same method is employed by Nature in building its vast empire Fundamental particles join and exist together to make up atoms Atoms join and make up molecules Out of the molecules all of planet Earth is made Planets and a star join and make a solar system Millions of them combine and make a galaxy Billions and trillions of them make a universe like ours There are innumerable such examples in the world we live in Go ahead and begin to turn the pages

Awesome Awesome sounds fresher than amazing But both describe just how you are Courageous is what you have made me Despite all my battle scars Each time I come to you with a problem Forever you promise to solve them Given my tendency to fall into sin How does your holiness offer forgiveness again It s your love so

compassionate complete and true Jesus brought grace and paid justice as a gift to the living Kindness in action well beyond what man would do Love from God is so enduring merciful and forgiving \_\_\_\_\_ Love's Greatest Joy Les Galicinski,2012-01-25 The God who is Love rejoices greatly when His people walk with Him in Truth This book provides the essentials of the Christian life in a way that is theologically rich and inspired by the discipleship teachings of past giants of the faith It provides a solid theological understanding of the character of God His purposes and desires for His people It provides an occasion for inner transformation by teaching asking questions and providing spiritual exercises that will allow God s Spirit to envelope the reader It teaches spiritual disciplines that lead to Godly habits and enhance the quality of one s soul life with God It also seeks to help the reader to move out into the world as one sent by God to testify to the joyous grace of the God who is Love This book and integrated study guide was developed with several groups of research participants who contributed to its refinement It is ideal for individual study or for small groups *The God Who Loves You* Peter Kreeft,2009-09-03 God s love is the subject of Peter Kreeft s imaginative and thoughtful book a revised and updated version of his book Knowing the Truth of God s Love With unusual clarity Kreeft points out that the man or woman who begins to glimpse the God who is Creator Redeemer and Lover of our souls will never be the same He describes Scripture as God s love story and then tells why divine love is the answer to our deepest problems and the fulfillment of our deepest desires Posing the hard questions about love that rankle the heart Peter Kreeft never settles for easy answers He exposes today s superficial attitudes about love to lead people to a deeper understanding of what it means to be loved by God addressing these issues and many more *On Love* Luc Ferry,2013-08-27 All the great ideals that gave life meaning in earlier societies God the nation revolution freedom democracy are in disarray today questioned by many and rejected by those who have lost faith in them But there is another value rooted in the birth of the modern family and in the passage from traditional to modern marriage that has transformed our lives in profound and often unrecognized ways love It affects not only our personal lives but many aspects of our social and collective life too from art and education to politics In this book Luc Ferry shows how the quiet rise of love as the central value in modern societies has created a new principle of meaning and a new definition of the good life that requires a completely different kind of philosophical thinking It forms the basis for a new philosophy for the twenty first century and a new kind of humanism for the modern world not a humanism of reason and rights but a humanism of solidarity and sympathy The ideal that this new humanism realizes is no longer that of nationalisms and revolutions of the perpetrating of organized violence in the name of deadly principles that are pursued over and above humanity Rather it is about preparing and ensuring a future for those we love most our future generations *Triumph of Love* PRAVIR MALIK,2020-04-04 Broadly speaking transhumanism refers to a philosophy whose focus is to move beyond current human limits This book suggests an approach to transhumanism based on a perception of Light elaborated in the previous nine books in the Cosmology of Light book series In this perception light is envisioned as existing at different

constant speeds We know that in our physical universe light travels at a constant speed referred to as  $c$  of 186 000 miles per second This has a concrete bearing on how we experience time and space and on how matter arises and in a Cosmology of Light it can be said that light at  $c$  is an intentionality to filter infinite potentiality from Light's native state of traveling infinitely fast so life can arise in a particular way So imagine light traveling infinitely fast This would suggest another reality packed with infinite possibility due to Light's omnipresence omnipotence omniscience and omninurturing fourfoldness Omnipresence because Light would be instantaneously present in whatever volume considered Omnipotence because anything not of the nature of light will be overcome by it Omniscience because light being everywhere will know what arises or disappears in it Omninurturing because all would exist in one nature and be bound by it As the previous books have elaborated and as this book will adequately summarize a cosmology arises when we consider the simultaneous and interpenetrating realities created when Light exists at multiple constant speeds simultaneously The dynamics and information resident in each of these simultaneous realities is arbitrated into material reality through a constant and persistent quantum level computation that generates genetic type information that effectively becomes law Quanta in such a cosmology is perceived as being the mechanism by which information in faster moving layers of light is materialized in a slower moving layer of light Law manifests as quadrumvirate mechanisms such as space time energy gravity the electro magnetic wave archetype mass potential spectrum quark lepton boson Higgs boson particles s shell p shell d shell f shell atoms nucleic acid lipid protein polysaccharide cells amongst other mechanisms that derive their ability to become based on the native being of Light's omnipresent omnipotent omniscient omninurturing fourfoldness It may even be said that such becomings resulting in quadrumvirate based law reveal essential beings Hence a being or a particular kind of taxonomic classification akin to the species genus family order class phylum kingdom domain as in the hierarchy of life is revealed with successful becoming Plate 1 that follows shortly summarizes such a classification by way of a contemplative map of being Hence Light in its native state traveling with infinite speed may be thought of as sitting at the top of such a taxonomic hierarchy generating light based domains kingdoms phyla classes and so on But such fourfoldness that manifests as effective law or through the becoming involving persistent quantum level computation that reveals a being is none other than a triumph of love For it is only the power of love of that innate need to maintain the integrality of light's fourfoldness even as it continues to materialize that can be the foundation of a sustainable becoming The more powerful such love so that in any materialization there is integration not only of the fourfoldness of Light's implicit properties but also of an integration of the many layers of light existing at different speeds the more fully will a becoming be founded on completeness of potentiality in light to itself become a being capable of engendering light based life Hence as will be suggested in this book not only does a particular type of being engender vast variation within that type but further beings can combine with beings which is essentially an act of love to create more comprehensive beings resulting in all the complexity of life Life itself will be seen to

originate in the native state of Light adding function and variation as light precipitates into more and more material reality emerging as a fullness of life At the base of all possible variation and advancement in being becoming and life is the ability to influence the process of the persistent quantum level computation so that there is a more complete horizontal and vertical integration of Light a more complete light based singularity as it were and therefore of the output of genetic type information and consequently of laws that are active in a being s becoming This is what is considered to be the basis of a system or framework of transhumanism in a cosmology of light

*The Equation of Love* José Tiberius,2020-09-01 Love poems and thoughts about relativity of time metaphysics and the Equation of Love Definition and concept of time Gravity and a new theory of everything In this book perspectives of modern science and metaphysics are combined besides the introduction about the relativity of love there are two titles dedicated to time and the Love Equation and gravity respectively In title II the different definitions of time are discussed emphasizing the subjective origin of the concept and the never ending attempts to obtain its common and objective idea There is a brief discussion about the new concept used by the physics science and more thoroughly the personal conception of metaphysical time and the time line as something real and subjective in contrast to the imaginary nature of time in Modern Physics Title III focuses on the Equation of Love Newton s gravity and its interrelations with Modern Physics and in particular with Einstein s equation of the mass energy equivalence In other words the new theory attempts to replace the correct duality of subjective and objective reality in the realm of philosophy separating them from other let s say imaginary realities It is not to say that imaginary realities are completely incorrect but they do not correspond to the standard common and simpler form of the operation of human logic and as a epistemological result of the scientific method
