Innovative Urban Wet-Weather Flow Management Systems Richard Field,James P. Heaney,Robert Pitt,2000-06-27 The 20th century s automobile inspired land use changes brought about tremendous transformations in how stormwater moves across the modern urban land scape Streets and parking areas in the average urban family s neighborhood now exceed the amount of land devoted to living space Add parking office and commercial space and it s easy to understand how modern cities have experienced a three fold increase in impervious areas Traditional wet weather collection systems removed stormwater from urban areas as quickly as possible often transferring

problems downstream Innovative Urban WetWeather Flow Management Systems does two things It considers the physical chemical and biological characteristics of urban runoff then describes innovative methods for improving wet weather flow WWF management systems The result of extensive research Innovative Urban Wet Weather Flow Management Systems looks most at how to handle runoff in developments of the 21st century the conflicting objectives of providing drainage while decreasing stormwater pollutant discharges the impact of urban WWF on surface and groundwater such as smaller urban stream channels scoured by high peak flows sediment transport and the toxic effects of WWF on aquatic organisms the effectiveness of WWF controls including design guidelines and source and downstream controls are an important issue Innovative Urban Wet Weather Flow Management Systems looks at how source controls like biofiltration created through simple grading may work in newly developing areas while critical source areas like an auto service facilities may need more extensive treatment strategies Focusing WWF treatment on intensively used areas such as the 20 percent of streets that handle the bulk of the traffic and under utilized parking areas is also considered Developing a more integrated water supply system collecting treating and disposing of wastewater and handling urban WWF requires innovative methods such as a neighborhood scale system that would recycle treated wastewater and storm water for lawn watering and toilet flushing or use treated roof runoff for potable purposes *India's Water Futures* K. J. Joy, S. Janakarajan, 2018-11-01 When it comes to water we flush and forget We use abuse and almost never recycle Water sector in India since the 1990s has seen some new ideas formalised legally and institutionally while others are still emerging and evolving Confronting the reality of current water management strategies this volume discusses the state of the Indian water sector to uncover solutions that can address the imminent water crises This book Analyses the growing water insecurity increase in demand inefficiency in water use and growing inequalities in accessing clean water Sheds light on water footprint in agricultural industrial and urban use pressures on river basin management depleting groundwater resources patterns of droughts and floods watershed based development and waste water and sanitation management Examines water conflicts lack of participatory governance mechanisms and suggests an alternative framework for water regulation and conflict transformation Highlights the relationship between gender discourse and water governance Presents an alternative agenda for water sector reforms This volume with hopes for a more water secure future will interest scholars and researchers of development studies environment studies public policy political studies political sociology and NGOs media and think tanks working in this area
