Marine Plankton Claudia Castellani, Martin Edwards, 2017 A thorough understanding of planktonic organisms is the first step towards a real appreciation of the diversity biology and ecological importance of marine life A detailed knowledge of their distribution and community composition is particularly important since these organisms are often very delicate and sensitive to change and can be used as early indicators of environmental change Natural and man induced modification of the environment can affect both the distribution and composition of plankton with important ecological and economic impacts Marine Plankton provides a practical guide to plankton biology with a large geographic coverage spanning the North Sea to the north eastern Atlantic coast of the USA and Canada The book is divided into three sections an overview of plankton ecology an assessment of methodology in plankton research covering sampling preservation and counting of samples and a taxonomic guide richly illustrated with detailed line drawings to aid identification This is an essential reference text suitable for senior undergraduate and graduate students taking courses in marine ecology particularly useful for fieldwork as well as for professional marine biologists It will also be of relevance and use to environmental scientists conservation biologists marine resource managers environmental consultants and other specialised practitioners **Marine**

Plastic Ocean: Art and Science Responses to Marine Pollution Ingeborg Reichle, 2021-07-05 Our oceans are in an ecological crisis due to their contamination with millions of tons of toxic microplastic particles In just a few years the volume of microplastic particles will exceed that of plankton in our oceans and turn them into a huge sea of plastic This publication brings together numerous international art projects related to environmental activities DIY biotechnology and science and draws attention to the irreversible destruction of our marine ecosystems the current threat posed by the loss of marine animal biodiversity for example or the decline in oxygen production due to massive plankton loss It also presents current scientific findings on sustainable alternatives to plastic
