Marketing Controllership:

Controllership Steven M. Bragg, 2009-08-06 Today's controllers are no longer seen as technicians who process transactions; they are now seen as business executives with a wide-ranging knowledge of total business operations, best practices, and corporate strategy. Providing a comprehensive overview of the roles and responsibilities of controllers in today's environment, this Eighth Edition of *Controllership* continues to provide controllers and vice presidents of finance with all aspects of management accounting from the controller's perspective, including internal control, profit planning, cost control, inventory, and financial disclosure.

Controllership Janice M. Roehl-Anderson, Steven M. Bragg, 2007-12-04 An earlier edition of this enduring classic, which was originally published in 1952, is cited in *Books for College Libraries* 3d ed. Of course, it has evolved substantially to remain useful, and this seventh edition incorporates new material on the following topics: ethics, related decisions, GAAP pronouncements, cost accounting methodologies, throughput costing, composition and role of the audit committee, taxation strategy, business cycle forecasting, payroll and tax issues, management reporting formats, reporting to the Securities and Exchange Commission, acquisition due diligence checklists, and accounting manual preparation and maintenance. Purchasers of this volume should be alert for future supplements and updates from the publisher, because the field just won't stay still.

When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management Fundamentals of Business-to-Business Marketing
