Medieval Britain From The Air:

Medieval Britain from the Air Colin Platt, 1984 **Historic Landscapes of Britain from the Air** Robin Edgar Glasscock, 1992-10-29 Medieval England M. W. Beresford, J. K. S. Joseph, 1979-11-15 This book discusses in detail some aspects of life in medieval England still to be seen in the landscape The perspective of the air photograph conveys a fresh understanding of the physical setting of medieval society of the interaction between communities and the land upon which they settled and of the varying pattern of the social and economic fabric of the country *Britain's Changing Environment from the Air* Tim Bayliss-Smith, Susan E. Owens, 1990-11-15 Commercial pressures and mechanization have rendered almost unrecognizable the natural and man made landscapes of Britain as they existed before World War I How this happened and how we can best conserve what is left is charted using the perspective of aerial photography in this book **British and Irish Archaeology** ,1994 *Castles from the Air* R. Allen Brown, 1989-07-28 Uses the aerial photography to reveal the medieval castles of Britain in their landscape setting **Industrial History from the Air** Kenneth Hudson, 1984-11-22 This is the first book to explore the exceptional opportunities offered by aerial photography for unravelling the physical complexities and historical development of the industrial landscape of Britain A wide range of industrial sites is illustrated from quarries mines and car factories to airports railways and New Towns The general nature and significance of their history and development is discussed while the detailed commentaries accompanying each photograph indicate the kind of historical and technical information which cannot be easily obtained in any other way There is good geographic coverage of sites with examples from England Wales and Scotland drawn from the eighteenth to the twentieth centuries Through a combination of fascinating narrative detail and imaginative presentation of photographic evidence this book provides a unique insight into our industrial past and present **Interpreting the Landscape** Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved Archaeological Method and Theory Linda Ellis, 2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting

the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

The Senses in Late Medieval England C. M. Woolgar, Christopher Michael Woolgar, 2006-01-01 Oxbow says This fascinating study of how people understood and used their senses in the late medieval period draws on evidence from a range of literary texts documents and records as well as material culture and architectural sources

A History of Epidemics in Britain (Vol. 1&2) Charles Creighton, 2023-12-12 In *A History of Epidemics in Britain* Vol 1 2 Charles Creighton meticulously chronicles the impact of infectious diseases throughout British history analyzing their social economic and political ramifications Creighton s literary style seamlessly blends historical narrative with empirical data providing a comprehensive examination of various epidemics from the Plague of Justinian to the cholera outbreaks of the 19th century This two volume work offers an insightful commentary on the broader implications of health crises influenced by contemporaneous societal attitudes and responses effectively situating these events within the larger context of public health evolution and medical understanding An esteemed physician and historian Creighton s insights are deeply rooted in his extensive medical background and his keen interest in the intersection of history and epidemiology His academic pursuits were shaped by the prevailing Victorian interest in the sciences prompting him to explore how epidemics influenced government policy and public health initiatives Creighton s dedication to uncovering historical patterns in illnesses reflects his desire to illuminate how past experiences can inform modern approaches to disease management For scholars public health professionals and history enthusiasts alike Creighton s work is an indispensable resource The detailed analysis not

only enriches our understanding of past epidemics but serves as a cautionary tale about the interplay of disease and society a must read for anyone seeking to comprehend the historical implications of health crises *Forensic Medicine and Death Investigation in Medieval England* Sara M. Butler, 2014-08-21 England has traditionally been understood as a latecomer to the use of forensic medicine in death investigation lagging nearly two hundred years behind other European authorities Using the coroner's inquest as a lens this book hopes to offer a fresh perspective on the process of death investigation in medieval England The central premise of this book is that medical practitioners did participate in death investigation although not in every inquest or even most and not necessarily in those investigations where we today would deem their advice most pertinent The medieval relationship with death and disease in particular shaped coroners and their jurors understanding of the inquest's medical needs and led them to conclusions that can only be understood in context of the medieval world's holistic approach to health and medicine Moreover while the English resisted Southern Europe's penchant for autopsies at times their findings reveal a solid understanding of internal medicine By studying cause of death in the coroners reports this study sheds new light on subjects such as abortion by assault bubonic plague cruentation epilepsy insanity senescence and unnatural death **Europe in the Central Middle Ages** Christopher Brooke, 2016-04-15 This wide ranging introduction to medieval Europe has been updated and revised In his popular survey Brooke explores the variety of human experience in the period He looks at society economy religious life and popular religion learning culture as well as political events the rise of the Normans and the heyday of the medieval Empire For the new edition there is increased coverage of the role of women and more attention to central Europe Bohemia Hungary and Poland **An Illustrated History of Late Medieval England** Chris Given-Wilson, 1996 The late Middle Ages c 1200 1500 was an age of transition The major events of this period the Black Death the Hundred Years War the rise of Parliament the depositions of five English kings between 1327 and 1483 are examined in detail in this book **Windmills in Sussex** , *A Cultural History of the Human Body in the Medieval Age* Linda Kalof, 2012-03-01 The Christian Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age its interactions with its environment and its diet For example a slave would have been marked by her language her name her religion or even by a sign burned onto her skin not by her color alone Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary scientific medical and artistic production this volume explores the rich variety of medieval views of both the real and the metaphorical body *A Cultural History of the Human Body in the Medieval Age* presents an overview of the period with essays on the centrality of the human body in birth and death health and disease sexuality beauty and concepts of the ideal bodies marked by gender race class and age cultural representations and popular beliefs and the self and society *The Local Historian* , 1984 Issues for autumn 1961 include the Standing Conference for Local History Bulletin *The Role of Anglo-Saxon Great*

Hall Complexes in Kingdom Formation, in Comparison and in Context AD 500-750 Adam McBride, 2020-01-31 This book explores the role of great hall complexes in kingdom formation through an expansive and ambitious study incorporating new fieldwork new quantitative methodologies and new theoretical models for the emergence of high status settlements and the formation and consolidation of supra regional socio political units New Historical Geography of England H. C. Darby, 1973-12-06 Analytic survey of the changing face of England countryside and town from the coming of the Anglo Saxons to 1914
