The Index ... Benjamin Franklin Underwood,1881

Out of Sight, Into Mind Jed Forman,2024-12-31 Most Indian and Tibetan religious traditions have some theory of yogic perception a profound type of sentience afforded by meditative practice And most consider it the bedrock of their religious authority the primary means by which one gains spiritual insight Disagreements about what yogis perceive abound however spanning many philosophical topics including epistemology ontology phenomenology and language Out of Sight Into Mind is a groundbreaking exploration of debates over yogic perception revealing their contemporary relevance as a catalyst for comparative philosophy Jed Forman examines intellectual and philosophical developments over a millennium in India and Tibet offering rich analyses of many previously untranslated texts He traces divergences and confluences between thinkers within and across traditions demonstrating that accounts of yogic perception shifted from theories based on vision to ones based on the mind Drawing on this investigation Forman calls for broadening philosophical discourse arguing that subjects like yogic perception have often been deemed religious and thus neglected He contends that these Indian and Tibetan debates hold important lessons for present day topics such as hermeneutics and exegesis the relationship between conception and perception representationalism versus phenomenism and the limits of language Shedding new light on the intellectual history of yogic perception this book models how a comparative approach can yield novel philosophical insights

Oxford Studies in Ancient Philosophy, Volume 61 Victor Caston,2022-08-11 Oxford Studies in Ancient Philosophy is a volume of original articles on all aspects of ancient philosophy The articles may be of substantial length and include critical notices of major

books OSAP is now published twice yearly in both hardback and paperback Have you seen the latest OSAP is what scholars of ancient philosophy say to each other when they meet in corridors or on coffee breaks Whether you work on Plato or Aristotle on Presocratics or sophists on Stoics Epicureans or Sceptics on Roman philosophers or Greek Neoplatonists you are liable to find OSAP articles now dominant in the bibliography of much serious published work in your particular subject not safe to miss Malcolm Schofield Cambridge University OSAP was founded to provide a place for long pieces on major issues in ancient philosophy In the years since it has fulfilled this role with great success over and over again publishing groundbreaking papers on what seemed to be familiar topics and others surveying new ground to break It represents brilliantly the vigour and the increasingly broad scope of scholarship in ancient philosophy and shows us all how the subject should flourish M M McCabe King s College London

Environmental Data Management Carl Oppenheimer, 2012-12-06

Throughout the world a staggering amount of resources have been used to obtain billions of environmental data points Some such as meteorological data have been organized for weather map display where many thousands of data points are synthesized in one compressed map Most environmental data however are still widely scattered and generally not used for a systems approach but only for the purpose for which they were originally taken These data are contained in relatively small computer programs research files government and industrial reports etc This Conference was called to bring together some of the world s leaders from research centers and government agencies and others concerned with environmental data management The purpose of the Conference was to organize discussion on the scope of world environmental data its present form and documentation and whether a systematic approach to a total system is feasible now or in the future This same subject permeated indirectly the Stockholm Conference on the environment where although no single recommendation came forth suggesting a consolidated environmental data pool bank or network each recommendation indicated that substantial environmental data needed to be obtained or needed to be pooled and analyzed from existing data sources
