Bodison,Lihle Qulu _Appiah,Rae Nishi,Lucina Q. Uddin,Marybel Robledo Gonzalez,Marguerite Matthews ,Elaine Del Bel,2025-09-30 International professional neuroscience organizations granting agencies and academic institutions have pledged their commitment to enhance diversity equity and inclusion with public statements of support and promises to increase training and funding opportunities for underrepresented scientists At the same time there is growing recognition that many human neuroscience studies to date have had insufficient representation of the rich tapestry of diversity across the globe resulting in demographically skewed samples upon which significant medical protocols pharmacological dosing

recommendations and governmental policies have been shaped. Finally, much of the inquiry and analyses of potential variance across diverse groups in the neurosciences has taken a hegemonic view with little attention to the structurally racist, biased, and/or colonialist systems of oppression that are likely to undergird these potential variances. As we move into the next decade of neuroscience research, there is an urgent need to more equitably cite and include the voices of diverse, cross-disciplinary health equity researchers who can bring their decades-long expertise to enhance our perspectives of justice, equity, diversity, and inclusion in human neuroscience, neuropharmacology, computational neuroscience, developmental neuroscience, neurogenetics, and neuroinformatic inquiries.
