Technology, Self-Fashioning and Politeness in Eighteenth-Century Britain A. Withey, 2015-12-03 The second half of the eighteenth century brought important changes in attitudes towards shaping the body New expectations of polite conduct deportment and demeanour were projected onto the body with emphasis laid upon neatness elegance and a natural body shape Deformities were to be concealed whilst bodily surfaces were managed to convey a harmonious whole A large number of technologies of the body were involved in this process including wooden legs elastic trusses and even wigs But the introduction of a new type of steel cast steel around 1750 offered new material possibilities for shaping the body The physical properties of steel transformed the design and function of many instruments from postural devices to spectacles and even the smallest daily items of toilette By no means was steel the only material involved in transforming the body Neither did it simply sweep away all that had gone before But as an enlightened metal cast steel was a key material in the refinement of the body **AB Bookman's Weekly** ,1998 *Neoclassical History and English Culture* P. The Ecology of Playful Childhood Akira Takada,2020-08-19 While studies of San children have attained the peculiar status of having delineated the prototype for hunter gatherer childhood relatively few serious ethnographic studies of San children have been conducted since an initial flurry of research in the 1960s and 1970s Based on the author s long term field research among several San groups of Southern Africa this book reconsiders hunter gatherer childhood using play as a key concept Playfulness pervades the intricate practices of caregiver child interactions among the San immediately after birth mothers have extremely close contact with their babies In addition to the mother s attentions other people around the babies actively facilitate gymnastic behavior to soothe them These distinctive caregiving behaviors indicate a loving indulgent attitude towards infants This also holds true for several language genres of the San that are used in early vocal

communication Children gradually become involved in various playful activities in groups of children of multiple ages which is the major locus of their attachment after weaning these playful activities show important similarities to the household and subsistence activities carried out by adults Rejuvenating studies of San children and hunter gatherer childhood and childrearing practices this book aims to examine these issues in detail ultimately providing a new perspective for the understanding of human sociality
