Augie Fleras, 2022-11-07 The politics of racism have returned with a bang What was once a whisper is now a roar in the wake of public outrage over charges of police racism that claimed the lives of racialized minorities and Indigenous peoples Yet confusion and uncertainty unsettle the challenge of clarifying the nature and scope of racism in general systemic racism in particular resulting in a glaring disconnect between public perceptions and lived experiences Reckoning with Racism is themed around the prospect of problematizing the idea of racism as articulated understood and debated in response to new realities emergent demands and contested dynamics A profoundly new racism world is evolving one so fundamentally different from the iterations of the past as to trigger a foundational shift in reconceptualizing how we see think and talk about and act on racism Changing the conversation on racism must also acknowledge its uncanny knack of reinventing itself while intersecting with other axes of identity and differentiation to amplify the inequalities of exclusion **Mediated Racism and**

Gulson, Zeus Leonardo, David Gillborn, 2017-10-02 The phrase the edge of race can be used both as a description and as a response to two key concerns The first of these is that while race is increasingly on the periphery of education policy with a growing disregard shown for racist inequities as education systems become dominated by market driven concerns it is important that we map the shifting relations of race in neoliberal politics and policies The second concern is that at this time within and outside the spaces of the academy even to mention race equity is to risk condemnation marginalization and ridicule The authors in this collection use the edge of race as a provocation in order to examine the concepts methodologies policies politics processes and practices associated with race and racism in education The chapters offer empirical examples of the perpetuation and perniciousness of racism that point to the continued salience of research about race Additionally the chapters make contributions to conceptual and methodological understandings of race and racism The contributors illustrate the contingency productivity and fragility of race as a concept and point to how educational research continues to be a contested site in and from which to study race and education This book was originally published as a special issue of
