they are easy but because they are hard he did so from the campus of Rice University More than half a century later Houston continues to serve as the nerve center of the American human space program Author and photographer Ray Viator a longtime Houstonian has lovingly captured the spirit of a city s devotion to space exploration from then to now Using striking photographs of the full moon as a visual motif of Houston s connection to spaceflight Viator also weaves together historic images to show how former cow pastures transformed into mission control Some connections are obvious the Houston Astros or the Houston Rockets Others are hidden in plain sight like the arm patches on the uniform of every Houston police officer that read Space City U S A Viator s lens captures this and more Houston Space City USA not only marks the important milestone of the first lunar landing but it also helps readers discover and rediscover a city s constellation of connections to one of humankind s greatest achievements The author s proceeds from the sale of this book will benefit Houston Public Media
