Major Similarities and Differences Yakob Tilahun Yimer, 2019-07-26 Scientific Essay from the year 2018 in the subject Sociology Religion grade A Addis Ababa University Department of Sociology course Sociological theories I classical perspectives language English abstract This essay is trying to shortly put forward major similarities and differences of the theories of Marx Durkheim and Weber in the formation and application of religion as an instrument to

human life and the contributions it facilitates to the existence and survival of societies in general Above all the attempts to scientifically theorizing religious institutions within a sociological paradigm is the major contribution of the then social thinkers and that fact will be highlighted shortly in the next few pages of the essay Religion is the most persistent social institution to pass and adjust itself in the position of the ages and its power is still controlling the activities of the world by one or the other way round It is not all the fabric that led to the continuity of religion as an institution but also the conducive environment of interpreting what the dogmas of different religions and their effects is still a controversial issue The prominent social theorists utterly attained their discourse on religion side by side with other social issues The concern of different interpretations relied on the fact that the role and impact of religious thoughts had been shaping the world outlook Thus in the complicated sense what was asserted in relation to religion is still an important observation and the need for its narration is as important as it was before *The Living Legacy of Marx, Durkheim, and Weber* Richard Altschuler,1998

Outstanding Academic Title 2009 **Culture and Power** David Swartz, 1997 Pierre Bourdieu is one of the world's most important social theorists and is also one of the great empirical researchers in contemporary sociology. However, reading Bourdieu can be difficult for those not familiar with the French cultural context and until now a comprehensive introduction to Bourdieu's oeuvre has not been available. David Swartz focuses on a central theme in Bourdieu's work: the complex relationship between culture and power and explains that sociology for Bourdieu is a mode of political intervention. Swartz clarifies Bourdieu's difficult concepts, noting where they have been misinterpreted by critics and where they have fallen short in resolving important analytical issues. The book also shows how Bourdieu has synthesized his theory of practices and symbolic power from Durkheim, Marx, and Weber and how his work was influenced by Sartre, Levi Strauss, and Althusser. *Culture and Power* is the first book to offer both a sympathetic and critical examination of Bourdieu's work and it will be invaluable to social scientists as well as to a broader audience in the humanities.

Myth and Society in Classical Sociology Luke Doggett, 2012-12-01 Exploring the place of myth in the work of Marx, Weber, and Durkheim, this book presents a theory of myth as a central part of sociology's conceptual apparatus that provides us with a means of grasping the morality that lies at the core of society, enabling us to negotiate both the social landscape and the world more broadly.

Capitalism and Modern Social Theory Anthony Giddens, 1973-02-08 Giddens's analysis of the writings of Marx, Durkheim, and Weber has become the classic text for any student seeking to understand the three thinkers who established the basic framework of contemporary sociology. The first three sections of the book, based on close textual examination of the original sources, contain separate treatments of each writer. The author demonstrates the internal coherence of their respective contributions to social theory. The concluding section discusses the principal ways in which Marx can be compared with the other two authors and discusses misconceptions of some conventional views on the subject.

At the same time, the book aims to go beyond an inventory of environmental sociological theory. *Sociological Theory and the Environment* stresses how new ground can be broken in the articulation of environmental sociology with major classical and contemporary sociological theories.

Max Weber and Value Free Sociology John Lewis, 1975 [The Sociology of Religion](#) George Lundskow, 2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion's practitioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow's approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and

effect of religion in the world today
