Merchants of Labor Ernesto Galarza,1966 **Merchants of labor** Ernesto Galarza,1964 *The Bracero Program* Richard B. Craig,2015-01-02 Long before Cesar Chavez and Chicano became commonly known the word bracero had established itself in the language of American politics The Mexican Farm Labor Program or bracero program as it came to be known was from its inception in 1942 a highly controversial issue At international national and subnational levels it remained the focal point of an intense interest group struggle This struggle and its group combatants provide the central concern of this study In the early 1940 s agribusiness interests had sought to contract Mexican laborers braceros for work on United States farms With the entry of the United States into World War II legislation was passed for contracting braceros on a large scale What was originally a wartime measure soon became an institution During twenty two years 4 2 million braceros were contracted The United States at the insistence of the Mexican government became a partner in the program ensuring that the braceros were provided housing set wages and other benefits The program was however detrimental to one group in the United States the native farmworker Not only was the bracero provided guarantees that the native could not demand but the bracero also got the native's job During the late forties and fifties organized labor gathered its forces in Congress to oppose the program Finally an administration favorable to the native farmworker threw its support behind the native laborer and through the Department of labor measures were passed that made it less attractive to hire foreign labor In the end the anti bracero forces won out in Congress and defeated extension of the Mexican Farm Labor program At the same time the United States government by setting the working standards for foreign workers brought about an improvement in the working conditions and wages of native farm laborers Besides the conflicts between domestic interests Craig examines the international conflicts and issues involved as well as the international agreements that were the basis of bracero contracting He discusses with perception the program's immediate and long range effects on Mexico His study analyzes and clarifies one of the most controversial domestic and international programs of the twentieth century **U.S. Immigration Policy and the National Interest** United States. Octopus's Garden Benjamin T. Jenkins,2023-07-10

As Southern California recovered from the collapse of the cattle industry in the 1860s the arrival of railroads attacked by newspapers as the greedy octopus and the expansion of citrus agriculture transformed the struggling region into a vast idealized and prosperous garden New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads The influx of capital industrial technology and workers especially people of color energized Southern California and tied it more closely to the economy and culture of the United States than ever before Benjamin Jenkins's *Octopus's Garden* argues that citrus agriculture and railroads together shaped the economy landscape labor systems and popular image of Southern California Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s While investment from white Americans particularly wealthy New Englanders formed the financial backbone of the *Octopus's Garden* citrus and railroads would not have thrived in Southern California without the labor of people of color Many workers of color took advantage of the commercial developments offered by railroads and citrus to economically advance their families and communities however these people also suffered greatly under the constant realities of bodily harm low wages and political and social exclusion Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non white laborers by stereotyping them in advertisements and publications These practices fostered conceptions of California's racial hierarchy by praising privileged whites and maligning the workers who made them prosper The *Octopus's Garden* continues to shape Southern Californians' understanding of their past In bringing together multiple storylines Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history

blame and oppress their neighbors Patriarchy persisted too undermining the power of social movements and justifying women s marginalization within them For other ordinary people collective action gave them the means to survive and fight against such hostilities What resulted were powerful new forms of horizontal reciprocity and solidarity that allowed people to provide each other with the bread beans and comradeship of daily life The New Deal when it arrived provided vital resources to many but others were cut off from its full benefits especially if they were women or people of color What Can We Learn from the Great Depression shows us how we might look to the past to think about how we can shape the future of our own failed economy These lessons can also help us imagine and build movements to challenge such an economy and to transform the state as a whole in service to the common good without replicating racism and patriarchy
