Moral Animal

Ted Peters

Moral Animal:

The Moral Animal Robert Wright, 1994 In a pathbreaking revelatory book Robert Wright senior editor at The New Republic demonstrates the relevance of evolutionary psychology to everyday life and challenges us to see ourselves for better or worse under its clarifying lens [The Moral Animal](#) Robert Wright, 2010-11-03 One of the most provocative science books ever published a feast of great thinking and writing about the most profound issues there are The New York Times Book Review Fiercely intelligent beautifully written and engrossingly original The New York Times Book Review Are men literally born to cheat Does monogamy actually serve women's interests These are among the questions that have made The Moral Animal one of the most provocative science books in recent years Wright unveils the genetic strategies behind everything from our sexual preferences to our office politics as well as their implications for our moral codes and public policies Illustrations **The Moral Animal** Robert Wright, 1994 *Moral Animals* Catherine Wilson, 2004 Yet many though not all moral claims are susceptible of confirmation to the extent that they command the agreement of well informed inquirers With this foundation in place Wilson turns to a defence of egalitarianism intended to address the objection that the importance of our nonmoral projects our natural acquisitiveness and partiality and our meritocratic commitments render social equality a mere abstract ideal Employing the basic notion of a symmetrical division of the co operative surplus she argues that social justice with respect to global disparities in well being and in the condition of women relative to men depends on the relinquishment of natural and acquired advantage that is central to the concept of morality BOOK JACKET [Summary of Robert Wright's The Moral Animal](#) Everest Media, 2022-03-05T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Victorian era was a time of sexual repression as Victorian physicians warned against the dangers of sexual indulgence for boys However this outlook also spread beyond the walls of the Methodist churches into the homes of Anglicans Unitarians and even agnostics 2 Charles Darwin was originally going to be a doctor but he became interested in zoology instead His father however wanted him to join the clergy 3 The idea of natural selection while indeed sweeping in significance is not really massive in structure It is a small and simple theory It doesn't take a huge intellect to conceive it 4 The process of natural selection is what makes us what we are today It is the process of choosing the fittest members of a species and destroying the less fit ones **The Explicit Animal** R. Tallis, 2016-07-27 Criticizes attempts to biologize consciousness by explaining its origin in evolutionary terms and identifying mental phenomena with brain processes to computerize it by identifying mind with the supposed computational activity of the brain and to eliminate it by denying the reality of qualia **What Makes Us Moral? On the capacities and conditions for being moral** Bert Musschenga, Anton van Harskamp, 2013-06-13 This book addresses the question of what it means to be moral and which capacities one needs to be moral It questions whether empathy is a cognitive or an affective capacity or perhaps both As most moral beings behave immorally from time to time the authors ask which factors cause or motivate people to translate

their moral beliefs into action Specially addressed is the question of what is the role of internal factors such as willpower commitment character and what is the role of external situational and structural factors The questions are considered from various disciplinary perspectives **The Veterinarian's Guide to Animal Welfare** Bonnie V. Beaver,Gail C.

Golab,2022-11-26 The Veterinarian s Guide to Animal Welfare provides an overview of various aspects of animal welfare that are particularly relative to the veterinary profession The book explores various ways of viewing and assessing welfare as well as the numerous factors that influence perceptions Emphasis is placed on contemporary issues across and within major species groups The book s authors are internationally known experts in the veterinary aspects of animal welfare and have written numerous articles on animal welfare behavior euthanasia and the human animal bond This book is written for the veterinary profession and was designed to be used as a textbook for animal welfare courses at colleges and schools of veterinary medicine It complements the Model Curriculum for the Study of Animal Welfare AVMA 2015 and its attendant course syllabus This is an important resource for graduate veterinarians seeking to improve their understanding of the numerous aspects of animal welfare Specifically written for veterinarians and veterinary students Addresses historical cultural and contemporary aspects of animal welfare Complements the Model Curriculum for the Study of Animal Welfare developed by the American Veterinary Medical Association AVMA

The Oxford Handbook of Animal Ethics Tom L. Beauchamp,R.G. Frey,2011-11-17 This text is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems in the ethics of how we use animals The Significance of Children and Animals O. Gene Myers,2007 Rev ed of Children and animals 1998

The Routledge Handbook of Animal Ethics Bob Fischer,2019-12-06 There isn t one conversation about animal ethics Instead there are several important ones that are scattered across many disciplines This volume both surveys the field of animal ethics and draws professional philosophers graduate students and undergraduates more deeply into the discussions that are happening outside of philosophy departments To that end the volume contains more nonphilosophers than philosophers explicitly inviting scholars from other fields such as animal science ecology economics psychology law environmental science and applied biology among others to bring their own disciplinary resources to bear on matters that affect animals The Routledge Handbook of Animal Ethics is composed of 44 chapters all appearing in print here for the first time and organized into the following six sections I Thinking About Animals II Animal Agriculture and Hunting III Animal Research and Genetic Engineering IV Companion Animals V Wild Animals Conservation Management and Ethics VI Animal Activism The chapters are brief and they have been written in a way that is accessible to serious undergraduate students regardless of their field of study The volume covers everything from animal cognition to the state of current fisheries from genetic modification to intersection animal activism It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals Playing God? Ted Peters,2014-04-04 Since the original publication of Playing God in 1996 three developments in genetic technology have

moved to the center of the public conversation about the ethics of human bioengineering Cloning the completion of the human genome project and most recently the controversy over stem cell research have all sparked lively debates among religious thinkers and the makers of public policy In this updated edition Ted Peters illuminates the key issues in these debates and continues to make deft connections between our questions about God and our efforts to manage technological innovations with wisdom

Practice what You Preach James F. Keenan, Joseph J. Kotva, 1999 Introduction why a course on virtue ethics in church ministry James F Keenan and Joseph Kotva Jr Christ and Darwin go to church ministerial selection and the candidacy process Richard Bondi Testing religious order candidates for HIV James F Keenan Ordination and immigration Carlos Piar Married clergy and the acceptance of appointments Gilbert Meilaender Seeking out good friends Joseph Kotva Jr The wisdom of boundaries power and vulnerability in ministry Richard M Gula Virtue ethics and the sexual formation of clergy Sondra Ely Wheeler In the shadow of the execution chamber affirming wholeness in a broken place Judith W Kay Virtue ethics and the problem of African American clergy ethics in the culture of deference Samuel K Roberts Transformed in prayer Joseph Kotva Jr The preacher and the virtue of forgiveness William H Willimon Imaging and speaking of God Diana Fritz Cates No one goes away hungry from the table of the Lord Eucharistic sharing in ecumenical contexts Margaret A Farley Leadership in empowering others a case study from rural congregations parishes Shannon Jung and Patricia Beattie Jung Ministerial malaise and disillusionment recovering hope in ministry Paul J Wadell Debating homosexuality disagreements held in patience and hope Charles Pinches Doctrine and ecclesiastical authority a contemporary controversy in the Armenian church Vigen Guroian Serving the church and facing the law virtues for committee members evaluating a pastor William Johnson Everett Vicious virtue patience justice and salaries in the church Karen Lebacqz and Shirley Macemon His dogs more than us virtue in situations of conflict between women religious and their ecclesiastical employers Anne E Patrick Collegiality as a moral and ethical practice M Shawn Copeland

The Animal and the Human in Ancient and Modern Thought Stephen T. Newmyer, 2016-12-01 Ancient Greeks endeavored to define the human being vis vis other animal species by isolating capacities and endowments which they considered to be unique to humans This approach toward defining the human being still appears with surprising frequency in modern philosophical treatises in modern animal behavioral studies and in animal rights literature to argue both for and against the position that human beings are special and unique because of one or another attribute or skill that they are believed to possess Some of the claims of man s unique endowments have in recent years become the subject of intensive investigation by cognitive ethologists carried out in non laboratory contexts The debate is as lively now as in classical times and what is of particular note the examples and methods of argumentation used to prove one or another position on any issue relating to the unique status of human beings that one encounters in contemporary philosophical or ethological literature frequently recall ancient precedents This is the first book length study of the man alone of animals topos in classical literature not restricting its

analysis to Greco Roman claims of man's intellectual uniqueness but including classical assertions of man's physiological and emotional uniqueness It supplements this analysis of ancient manifestations with an examination of how the commonplace survives and has been restated transformed and extended in contemporary ethological literature and in the literature of the animal rights and animal welfare movements Author Stephen T Newmyer demonstrates that the anthropocentrism detected in Greek applications of the man alone of animals topos is not only alive and well in many facets of the current debate on human animal relations but that combating its negative effects is a stated aim of some modern philosophers and activists

The end of animal life: a start for ethical debate Franck L.B. Meijboom, Elsbeth N. Stassen, 2023-08-07 Killing animals is common practice yet it is not morally neutral The end of animal life is related to many societal and ethical questions and concerns Questions such as how long should we continue to treat an animal before putting it down But also the question whether it could be legitimate to kill individual animals for the welfare of the herd or of future generations The ongoing public and academic discussions on these and on other well known questions like those related to the killing of animals for food or for scientific purposes show that there is no one standard evaluation of animal life This book is an edited volume that enables the reader to get a grip on that plurality of views with regard to animals It helps to deal with the many questions related to the end of animal life The chapters show how the plurality of views on killing animals is related to moral presuppositions by providing a clear overview of the ethical views on end of life decisions Furthermore the book contains a number of applied studies of the ethical questions related to killing animals in various practices including small animal practice wildlife management fishing and fish farming animal experimentation and livestock farming These chapters can help veterinarians scientists students policy makers and many other professionals working with animals to easily get a good overview of the issues at stake and may contribute to responsible decision making with regard to the end of animal life

Rethinking Moral Status Steve Clarke, Hazem Zohny, Julian Savulescu, 2021 Scientific and technological advancements have allowed us to create beings that blur the distinctions between human non human animal and non biological beings which challenge our assumptions about moral status This volume explores our responses to these challenges and reflects on ordinary presuppositions and intuitions about moral status

Engaging Bioethics Gary Seay, Susana Nuccetelli, 2017-02-03 Engaging Bioethics An Introduction with Case Studies draws students into this rapidly changing field helping them to actively untangle the many issues at the intersection of medicine and moral concern Presuming readers start with no background in philosophy it offers balanced philosophically based and rigorous inquiry for undergraduates throughout the humanities and social sciences as well as for health care professionals in training including students in medical school pre medicine nursing public health and those studying to assist physicians in various capacities Written by an author team with more than three decades of combined experience teaching bioethics this book offers Flexibility to the instructor with chapters that can be read independently and in an order that fits the course structure Up to date coverage of current

controversies on topics such as vaccination access to health care new reproductive technologies genetics biomedical research on human and animal subjects medically assisted death abortion medical confidentiality and disclosure Attention to issues of gender race cultural diversity and justice in health care Integration with case studies and primary sources Pedagogical features to help instructors and students including Chapter learning objectives Text boxes and figures to explain important terms concepts and cases End of chapter summaries key words and annotated further readings Discussion cases and questions Appendices on moral reasoning and the history of ethical issues at the end and beginning of life An index of cases discussed in the book and extensive glossary index A companion website <http://www.routledgetextbooks.com/textbooks/9780415837958> with a virtual anthology linking to key primary sources a test bank topics for papers and PowerPoints for lectures and class discussion

A HUMAN VENTURE V. Virom Coppola, 2009-10-30 **Evolution and Human Behavior** John Cartwright, 2000 The book covers fundamental issues such as the origins and function of sexual reproduction mating behavior human mate choice patterns of violence in families altruistic behavior the evolution of brain size and the origins of language the modular mind and the relationship between genes and culture *Envisioning a Better Future for Nonhuman Animals* Doris Schneeberger, 2024-12-15 This book presents an ethical discussion of the possible future Universal Declarations of diverse specific nonhuman Animal Rights It contributes to a basis for a discussion about nonhuman animal rights concerning diverse aspects and quality of nonhuman animal life Doris Schneeberger deals with the interpretation and justification of animal rights and argues that because nonhuman animals are individuals whose lives are intrinsically and inherently valuable their goods and welfare ought to be protected She claims that these rights should be protected in possible morally advanced societies of the future
