Perception May Be Reality:

perception, physics, and reality, 1914 *Principles of Cognition, Language and Action* N. Praetorius, 2000-03-31 This book exposes serious flaws in the reductionist assumptions about Mind and Matter of Naturalism and Constructivism which underlie research and theorizing on cognition language and action within current academic psychology The author argues for alternative radically different assumptions about the relationship between the mental and material reality which are not only tenable but as a matter of principle must be taken for granted and be the point of departure for all investigations into both reality and our cognition and description of it The consequences of the arguments in this book are far reaching The assumptions and principles derived from them offer a consistent foundation for a science of psychology They also open up new and straightforward ways of dealing with the key issues of truth and intentionality subjectivity and objectivity of relevance to philosophy the humanities and social sciences **An Essay on Personality as a Philosophical Principle**

Classical Indian Philosophy of Morals Rajendra Prasad, 2008 Using reconstructive ideas available in classical Indian original works this book makes a departure in the style of modern writings on Indian moral philosophy It presents Indian ethics in an objective secular and wherever necessary critical manner as a systematic down to earth philosophical account of moral values virtues rights and obligations It thereby refutes the claim that Indian philosophy has no ethics as well as the counter claim that it transcends ethics It demonstrates that moral living proves that the individual his society and the world are really real and not only taken to be real for behavioral purposes as the Advaitins hold the self is amoral being a non agent moksha is not a moral value and the Karmic theory because of involving belief in rebirth does not guarantee that the doer of an action is also the experiencer of its results contrary to what is commonly held and Indian ethics can sustain itself even if such

notions are dropped Rajendra Prasad calls Indian ethics organismic because along with ethical concerns it also covers issues related to professions politics administration sex environment etc Therefore in one format it is theoretical and applied normative and metaethical humanistic and non humanistic etc of course within the limits of the then cognitive enquiry
