Perilous Passage Mankind And The Global Ascendancy Of Capital:

Perilous Passage Amiya Kumar Bagchi, 2005 In this innovative and ambitious global history distinguished economic historian Amiya Kumar Bagchi traces the global history of human change and survival under the sway of capitalism since the voyages of Columbus Writing with extraordinary range and depth he offers a critical analysis of the history and human costs and consequences of development in Europe and North America and in major regions such as India China Japan and Africa Bagchi critically characterizes the emergence and operation of capitalism as a system driven by wars over resources and markets rather than one that genuinely operates on the principle of free markets His unflinching examination of the human toll in the periphery as well in the core nations includes not only economic processes and issues of inequality within and among nations but also the intertwining of economics and war making on a world scale Bagchi's compelling vision will change the ways in which we think about many of the largest issues in the world history and development over the past 500 years

Perilous Passage Amiya Kumar Bagchi, 2005 **The Ascendancy of Finance** Joseph Vogl, 2017-09-05 The global financial crisis of 2008 ushered in a system of informal decision making in the grey zone between economics and politics Legitimized by a rhetoric of emergency ad hoc bodies have usurped democratically elected governments In line with the neoliberal credo the recent crisis has been used to realize the politically impossible and to re align executive power with the interests of the finance industry In this important book Joseph Vogl offers a much longer perspective on these developments showing how the dynamics of modern finance capitalism have always rested on a complex and constantly evolving relationship between private creditors and the state Combining historical and theoretical analysis Vogl argues that over the last three centuries finance has become a fourth estate marked by the systematic interconnection of treasury and finance of political and private economic interests Against this historical background Vogl explores the latest phase in the financialization of government namely the dramatic transfer of power from states to markets in the latter half of the 20th century From the liberalization of credit and capital markets to the privatization of social security he shows how policy has actively enabled a restructuring of the economy around the financial sector Political systems are imprisoned by the regime of finance while the corporate model suffuses society enclosing populations in the production of financial capital The Ascendancy of Finance provides valuable and unsettling insight into the genesis of modern power and where it truly resides

The Imperialist Question in Middle East and North Africa Matteo Capasso, Ali Kadri, 2025-10-27 This book reveals how today's devastating conflicts across Gaza Syria and the broader Middle East represent imperialism in its most destructive form Leading Area Studies scholars move beyond fragmented analyses to examine how US led imperial power functions as a comprehensive system from Tunisia's financial dependency to the weaponization of feminist discourse in justifying violence Central to this analysis is the concept of accumulation by waste demonstrating how systematic destruction has become imperialism's primary mechanism for maintaining regional control Through diverse case studies spanning North

Africa to the Arabian Peninsula the authors illuminate how military interventions financial domination and ideological warfare work in concert to preserve Western hegemony Yet this collection also documents emerging alternatives from Palestinian resistance in Gaza to China's development model pathways beyond imperial control are taking shape This book is essential reading for anyone seeking to understand the forces shaping our world and the struggles necessary to transform it This volume speaks to students scholars and policymakers across International Relations Political Economy Marxist Studies Middle Eastern Studies and Critical Security Studies Originally published as a special issue of Middle East Critique this edition features three additional chapters and a thoroughly updated introduction that addresses recent developments across the region

A Marxist History of Capitalism Henry Heller, 2018-08-06 Henry Heller's short account of the history of capitalism combines Marx's economic and political thought with contemporary scholarship to shed light on the current capitalist crisis It argues that capitalism is an evolving mode of production that has now outgrown its institutional and political limits The book provides an overview of the different historical stages of capitalism underpinned by accessible discussions of its theoretical foundations Heller shows that capitalism has always been a double edged sword on one hand advancing humanity and on the other harming traditional societies and our natural environment He makes the case that capitalism has now become self destructive and that our current era of neoliberalism may trigger a transition to a democratic and ecologically aware form of socialism

A Theory of Imperialism Utsa Patnaik, Prabhat Patnaik, 2016-11-01 In A Theory of Imperialism economists Utsa Patnaik and Prabhat Patnaik present a new theory of the origins and mechanics of capitalism that sounds an alarm about its ongoing viability Their theory centers on trade between the core economies of the global North and the tropical and subtropical countries of the global South and considers how the Northern demand for commodities such as agricultural products and oil from the South has perpetuated and solidified an imperialist relationship The Patnaiks explore the dynamics of this process and discuss innovations that could allow the economies of the South to achieve greater prosperity without damaging the economies of the North The result is an original theory of imperialism that brings to light the crippling limitations of neoliberal capitalism A Theory of Imperialism also includes a response by David Harvey who interprets the agrarian system differently and sees other factors affecting trade between the North and the South Their debate is one of the most provocative exchanges yet over the future of the global economy as resources grow thin populations explode and universal prosperity becomes ever more elusive

Marxism and Feminism Shahrzad Mojab, 2015-03-12 Global events from economic crisis to social unrest and militarization disproportionately affect women Yet around the world it is also women who are leading the struggle against oppression and exploitation In light of renewed interest in Marxist theory among many women activists and academics Marxism and Feminism presents a contemporary and accessible Marxist feminist analysis on a host of issues It reassesses previous debates and seeks to answer pressing questions of how we should understand the relationship between patriarchy and capitalism and how we can envision a

feminist project which emancipates both women and society With contributions from both renowned scholars and new voices Marxism and Feminism is set to become the foundational text for modern Marxist feminist thought The ^AOxford Handbook of Karl Marx Matt Vidal,Tony Smith,Tomás Rotta,Paul Prew,2019-03-26 The Oxford Handbook of Karl Marx provides an entry point for scholars and students new to Marxism At the same time its chapters written by leading Marxist scholars advance Marxist theory and research Its coverage is more comprehensive than previous volumes on Marx in terms of both foundational concepts and state of the art empirical research on contemporary social problems It is also provides equal space to sociologists economists and political scientists with substantial contributions from philosophers historians and geographers *Peasants, Capitalism, and the Work of Eric R. Wolf* Mark Tilzey,Fraser Sugden,David Seddon,2023-08-30 Fifty years after the publication of Eric Wolf s celebrated *Peasant Wars of the Twentieth Century* and forty years after the publication of his path breaking *Europe and the People Without History* this book offers a much needed critical assessment and update of Wolf s contribution to the study of the peasantry and its relationship to capitalism the state and imperialism This book provides a comprehensive evaluation of Wolf s premises methodology and understanding of the peasantry and its relationship to the rise of capitalism and the modern state The authors analyse Wolf s theoretical approach and by building on his work in *Europe and the People Without History* especially argue their own position concerning the dynamics of the peasantry in relation to capitalism state class and imperialism Further the text aims to answer the agrarian question more widely focusing on agrarian society and the political role of the peasantry in contested transitions to capitalism and to modes beyond capitalism This requires the authors argue an analysis of class struggle and of the resources material and discursive that different classes can bring to bear on this struggle Based on well founded theoretical premises the book focuses on the contested rise of capitalism in the global North the development of core periphery relations in the global political economy and the place of the peasantry in these dynamics The book presents case studies of transitions to agrarian capitalism in the British Isles France Germany Japan and the USA The book will be of great interest to students and researchers in the areas of peasant studies rural politics agrarian studies development and political ecology Reclaiming Archaeology Alfredo González-Ruibal,2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century Sigmund Freud Walter Benjamin Alois Riegl and Michel Foucault amongst many others However this power has also turned against archaeology because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries with little or no reference to the discipline It seems that excavation stratigraphy or ruins only become important at a trans disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them Meanwhile archaeologists have been usually more interested in borrowing theories from other fields rather than in developing the theoretical potential of the same concepts that other thinkers find so useful The time is

ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality not of subalternity *Reclaiming Archaeology* explores how archaeology can be useful to rethink modernity's big issues and more specifically late modernity broadly understood as the 20th and 21st centuries The book contains a series of original essays not necessarily following the conventional academic rules of archaeological writing or thinking allowing rhetoric to have its place in disclosing the archaeological In each of the four sections that constitute this book method time heritage and materiality the contributors deal with different archaeological tropes such as excavation surface depth genealogy ruins fragments repressed memories and traces They criticize their modernist implications and rework them in creative ways in order to show the power of archaeology not just to understand the past but also the present *Reclaiming Archaeology* includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity including scholars from non Anglophone countries who have approached the issue in original ways during recent years as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists
