environmental conflicts collaborative skills and universal principles to assist in re thinking and acting toward the common good integrates a variety of new real world conflicts as a foundation for building trust skills consensus and capacity and explains pathways to collectively construct a relationship centric future fostering healthier interactions with one another and the planet The new edition illustrates how to successfully mediate actual environmental disputes and how to teach conflict resolution at any level for a wide variety of social environmental situations It adds a new chapter on water conflicts and resolutions providing avenues to healthy sustainable and effective outcomes and provides new examples of conflicts caused by climate change with discussion questions for clear understanding Land use planners urban planners field biologists and leaders and participants in collaborative environmental projects and initiatives will find this book to be an invaluable resource University students in related courses will also benefit as will anyone interested in achieving greater social environmental sustainability and a more responsible use of our common natural resources for themselves and their children

Interactions of Land, Ocean and Humans Chris Maser, 2014-10-14 Written by Chris Maser one of the architects of the sustainability movement *Interactions of Land Ocean and Humans A Global Perspective* explores a critical number of the myriad aspects that comprise the great reciprocal feedback loops between the mountain peaks the deep sea and everywhere in between Maser s exploration of these connections gives us the tools required to open our imaginations and our scientific literacy offering insights into the relationships between the land sea and people that could influence us toward better decisions The author examines the hydrological cycle hydrological continuum and anthropogenic pollution of various kinds from the atmosphere to deep belowground He also highlights connections by detailing how human behavior changes the atmosphere which changes the oceans which alters the climate which alters the atmosphere and thus the ocean and so on The book then explores the biophysical commonalities between landscapes and seascapes as well as the habitats in each realm It covers marine fisheries marine protected areas oceans as a commodity as part of the global commons as a biophysical living trust for which we are the trustees and the children of today and beyond are the beneficiaries and more Can we arrest this deleterious process Yes but it will take a dramatic shift in human behavior worldwide Why Because just as the collective human behavior and lack of awareness caused the problems in the first place the level of consciousness that caused the problem is not the level of consciousness that can fix it We must shift our thinking from that which is symptomatic to that which is systemic if we are to have a sustainably productive environment through time Maser gives us the understanding of the biophysical interactions among the lands oceans and peoples of the world needed to create sustainable solutions to environmental problems

Sustainability and the Rights of Nature Cameron La Follette, Chris Maser, 2017-06-01 *Sustainability and the Rights of Nature* An Introduction is a much needed guide that addresses the exciting and significant paradigm shift to the Rights of Nature as it is occurring both in the United States and internationally in the fields of environmental law and environmental sustainability This shift advocates building a relationship of integrity

and reciprocity with the planet by placing Nature in the forefront of our rights based legal systems The authors discuss means of achieving this by laying out Nature s Laws of Reciprocity and providing a roadmap of the strategies and directions needed to create a Rights of Nature oriented legal system that will shape and maintain human activities in an environmentally sustainable manner This work is enriched with an array of unique and relevant points of reference such as the feudal notions of obligation principles of traditional indigenous cultivation the Pope Francis Encyclical on the environment and the new Rights of Nature based legal systems of Ecuador and Bolivia that can serve as prototypes for the United States and other countries around the world to help ensure a future of environmental sustainability for all living systems

Rethinking Self-Defence T Markus Funk,2021-01-14 Self defence the ancient right has never been more relevant than in the present era of widespread calls for criminal justice reform The book substantially advances the patinaed discussion by introducing for the first time a comprehensive value centric approach to thinking about the defence s deeper rationale It tackles core issues such as the relative importance of the State s claimed monopoly on force procedural justice and the need to shore up the justice system s legitimacy and creditworthiness everyone s presumptive right to life and the importance of ensuring equal standing between citizens And in so doing the book breaks ground by addressing public perceptions of just and right outcomes as well as the emphasis legal systems place and should place on State power **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 **Rethinking Hell** Christopher M. Date,Gregory Stump,Joshua Anderson,2014-04-15 Most evangelical Christians believe that those people who are not saved before they die will be punished in hell forever But is this what the Bible truly teaches Do Christians need to rethink their understanding of hell In the late twentieth century a growing number of evangelical theologians biblical scholars and philosophers began to reject the traditional doctrine of eternal conscious torment in hell in favor of a minority theological perspective called conditional immortality This view contends that the unsaved are resurrected to face divine judgment just as Christians have always believed but due to the fact that immortality is only given to those who are in Christ the unsaved do not exist forever in hell Instead they face the punishment of the second death an end to their conscious existence This volume brings together excerpts from a variety of well respected evangelical thinkers including John Stott John Wenham and E Earl Ellis as they

articulate the biblical theological and philosophical arguments for conditionalism These readings will give thoughtful Christians strong evidence that there are indeed compelling reasons for rethinking hell
