Racism In Mind:

Racism in Mind Michael P. Levine, Tamas Pataki, 2018-08-06 This philosophical analysis of the phenomenon of racism brings together some of the most influential analytic philosophers writing on racism today The introduction by Tamas Pataki outlines the historical and thematic development of conceptions of race and racism and locates the following essays against the backdrop of contemporary reactions to that development While the framework is primarily analytic the volume also includes essays deeply informed by psychoanalysis phenomenology and feminist and social theory The fourteen chapters in this collection address three interrelated questions What is racism What are the causes of racism And what are the moral and political implications of racism Although their approaches are wide ranging the contributors to *Racism in Mind* broadly endorse a psychological characterological approach to the understanding of many aspects of racism

Racist States of Mind Narendra Keval, 2018-04-17 This book explores some of the unconscious mechanisms and processes that underpin the racist phenomenon by looking at racism as a state of mind inferred from the clinical situation and racist situations in the external world

Race, Philosophy, and Film Mary K. Bloodsworth-Lugo, Dan Flory, 2013-04-12 This collection fills a gap in the current literature in philosophy and film by focusing on the question How would thinking in philosophy and film be transformed if race were formally incorporated moved from its margins to the center The collection's contributors anchor their discussions of race through considerations of specific films and television series which serve as illustrative examples from which the essays theorizations are drawn Inclusive and current in its selection of films and genres the collection incorporates dramas comedies horror and science fiction films among other genres into its discussions as well as recent and popular titles of interest such as *Twilight* *Avatar* *Machete* *True Blood* and *The Matrix* and *The Help* The essays compel readers to think more deeply about the films they have seen and their experiences of these narratives

Another Mind-Body Problem John Harfouch, 2018-05-23 Demonstrates the profound overlap of philosophy's mind body problem and various racist doctrines found in thinkers ranging from Descartes to Kant The mind body problem in philosophy is typically understood as a discourse concerning the relation of mental states to physical states and the experience of sensation On this level it seems to transcend issues of race and racism but *Another Mind Body Problem* demonstrates that racial distinctions have been an integral part of the discourse since the Modern period in philosophy Reading figures such as Descartes Leibniz and Kant in their historical contexts John Harfouch uncovers discussions of mind and body that engaged closely with philosophical and scientific notions of race in metaphysics and the philosophy of mind in particular in understanding how the mind unites with the body at birth and is then passed on through sexual reproduction Kant argued that a person's exterior body and interior psyche are bound together that non White people lacked reason and that this lack of reason was carried on through reproduction such that non Whites were an example of a union of mind and body without full being Charting the development of this phenomenon from sixteenth century medical literature to modern day race discourse Harfouch argues

for new understandings of Descartes's mind/body problem, Fanon's experience of being not yet human and the place of racism in relation to one of philosophy's most enduring and canonical problems

Crisis and Critique: Philosophical Analysis and Current Events Anne Siegetsleitner, Andreas Oberprantacher, Marie-Luisa Frick, Ulrich Metschl, 2021-06-08 Contemporary deep-reaching changes, whether in financial or real economy, in Europe's political conditions, in the context of scientific theories, in the field of global environmental security, or in gender relations, are also a challenge to philosophy. The volume comprises cutting-edge scholarly articles from renowned philosophers with various geographical backgrounds and from different philosophical strands. Next to investigating general questions as to the relation of philosophy and critique, what is philosophical critique and which philosophical concepts of critique are of importance today? Where do we need it most? Where are its limits? The articles focus on issues like theories of democracy and modes of election, the roles of emotions in the political realm, challenges from a widespread discontent in society to politics and science, changes to social identities, and different theoretical approaches to social identity formation. The book is indispensable for all who are interested in what contemporary philosophy has to say on crucial issues of our time.

Wish-fulfilment in Philosophy and Psychoanalysis Tamas Pataki, 2014-04-24 Wish fulfilment as a singular means of satisfying ineluctable desire is a pivotal concept in classical psychoanalysis Freud argued that it was the thread that united dreams daydreams phantasy omnipotent thinking neurotic and some psychotic symptoms such as hallucinations and delusions art myth and religious illusions The concept's theoretical exploration has been largely neglected within psychoanalysis since but contemporary philosophers have recognised it as providing an explanatory model for much of the kind of irrational behaviour so problematic for psychiatry social psychology and the philosophy of mind Although critically neglected in contemporary psychological and psychoanalytic thought the concept remains clinically fundamental under different labels it encompasses the processes of omnipotent phantasy symbolic or substitutive satisfaction actualisation in transference and acting out symptom formation and defenses such as projective identification Wish fulfilment can be shown to be a specifically psychoanalytic compartment of a common sense psychological theory of action that illuminates not just clinical material but also the paradoxes of irrationality such as weakness of will and self deception that preoccupy philosophers The first half of this book develops a comprehensive and novel theory of wish fulfilment explores its radical implications for the structure of mind and locates it against the backdrop of both contemporary psychoanalytic and philosophical thought In the second half the book applies the theory to illuminate important features of self deception and delusion religion insanity defences creative writing and the exclusion of mind and intention in the biological drift of modern psychiatry The book will be essential to philosophers of mind psychoanalysts psychiatrists psychologists social theorists and students in these disciplines as well as readers interested in understanding how the mind works in mental illness self deception religion and creative writing

The State of the American Mind: Stupor and Pathetic Docility Amechi Okolo PhD, 2010-06-10 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality

in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

I passionately wrote this story *Decoding Human Psyche* Dr Rohit Kale,2020-11-26 Have you ever wondered Why you keep opening your phone for updates Why it s easy to be a couch potato in front of the TV but is extremely difficult to do early morning exercise Why New Year resolutions fail Why you hate your boss Why your wife goes shopping Why people take selfies Why children won t listen Why parents shout at them Why some people are climate change deniers while others deny biodiversity crisis or extinction crisis Why there is no consensus yet on what to do for them Why some people are Republicans Democrats Why some support Modi while others are Left liberals Why people hate or have become intolerant to ideologies that oppose their core beliefs Why people troll on Twitter Why people follow some people while blocking others How beliefs form How they evolve How they make our mind biased into thinking in one direction and making wrong choices Why it is difficult to think out of the box Why different people perceive the same things differently How people get disillusioned into believing any nonsense When repeated often why it forms an illusion of reality in their mind *Decoding Human Psyche* aims to answer many such questions related to human psychology It aims to help you understand why people believe what they believe and behave the way they behave to master the art of understanding people and relations and making sense of the world around us and make better choices The book also looks at how this psychological crisis delusional tendency is at the core of causation of all the crises like climate change that humanity is facing *The 21st Century Black History* Lee Arnold Green Sr.,2022-05-23 Black History in the 21st Century From the Atlantic Slave Trade in America to Its Impact on African Americans Today is mainly about the injustices suffered by African Americans in America especially the impact of the Atlantic slave trade in America on the negro race today to include people of color The impact of the Atlantic slave trade in the twenty first century is high tech lynching in America that is without the noose around the neck of the African American High tech lynching is defined in this book as the following There are two phases of high tech lynching The first phase is characterized by violence death and or destruction by white racists race haters or white supremacists practicing bad spirit principal part racist hatred of racism against African Americans on the streets to include people of color The practice of racism is the use of racial or racist epithets characterized by the sentiment of racial segregation white cultural and political domination that characterizes discriminatory language and or physical practice of racism that involves violence death and or destruction against black Americans in America These are racist incidents on the streets That is the first phase of high tech lynching in the twenty first century in America And then an African American takes his or her racist case to court for courtroom proceedings This is the second phase of high tech lynching in America in the twenty first century wherein the courtroom the DA or district attorney become hairsplitters of the letter of the law and nitpick at the spirit of the law as to the alleged violation or crime to justify the action or bad behavior of racist white policemen or white supremacists characterized by their bad spirit principal part racist hatred of racism Therefore high tech lynching involves the judges of the courts in America that go along with their district attorney s travesty of justice or mockery of the justice system To include

the legislators who make the laws in America and oftentimes their designated juries based on their homogeneity of bad spirit principal part racist hatred Therefore high tech lynching is the effect of America s Atlantic slave trade on African Americans today in this the twenty first century post Jim Crow as a system of predatory laws and tyranny of racism practiced against African Americans
