women's role in public life Refugees, Citizenship and Social Policy in Europe A. Bloch, C. Levy, 1999-04-30 Recently global and European migration in the post Cold War world have received much attention This edited collection is a comprehensive up to date account of the social policies of European welfare states towards refugees and asylum seekers It also examines the contested boundaries between refugees and asylum seekers and citizenship within European nation states and the European Union **Migration and Race in Europe** Martin Bulmer, John Solomos, 2020-05-21 Migration and Race in Europe covers various facets of the interplay between migration and race in Europe Over the past two decades there has been a growing public policy and political debate about questions linked to migration and refugee movements across the borders of Europe This has been evident in countries such as the UK France the Netherlands and Germany that have had long established experience with questions about immigration and race But what has also become clear is that these debates have also become an established part of political and civil society discourses across both Southern and Eastern European societies and beyond The contributions to this volume draw on the latest research in order to provide an insight into the changing dynamics of migration and race in a number of European societies This book was originally published as a special issue of Ethnic and Racial Studies **Illegal Immigration in America** David W. Haines, Karen Rosenblum, 1999-10-30 Few issues have provoked as much controversy over the last decade as illegal immigration While some argue for the need to seal America's borders and withdraw all forms of social and governmental support for illegal migrants and their children others argue for humanitarian treatment including legalization for people who fill widely acknowledged needs in American industry and agriculture and have left home country situations of economic hardship or political persecution The study of illegal immigration necessarily confronts a broad range of migrants from the familiar border crossers to those who enter illegally and overstay their visas to the many unrecognized refugees who enter the country to seek protection under U S asylum law The subject also demands attention to American society's responses to these newcomers responses that often focus on limited elements of a complex issue A comprehensive up to date review of this volatile subject this book provides an accessible balanced introduction to the subject Covering the full range of illegal immigrants from Mexican border crossers to Central American refugees illegal Europeans and smuggled Chinese the book considers the kind of work the migrants do and the public response to them The work is divided into four parts Concepts Policies and Numbers The Migrants and Their Work The Responses and Illegal Immigration in Perspective **Moving Europeans, Second Edition** Leslie Page Moch, 2003 Leslie Moch tells the story of the vast movements of people throughout Europe and examines the links between human mobility and the fundamental changes that transformed European life West European Immigration and Immigrant Policy in the New Century Anthony M. Messina, 2002-06-30 Few if any phenomena affecting Western Europe as a whole since 1945 have been more far reaching in their immediate effects or more potentially destabilizing to politics and society over the long term than the accumulative experience of immigration Messina and his contributors analyze why the major immigrant

receiving states of Western Europe historically permitted and often abetted relatively high levels of postwar migration and they assess how contemporary governments attempt to govern immigration flows and manage the domestic social and political fallout which it inevitably yields The central purpose of the volume is to address these questions within the context of the decision making logics that have demonstratively governed postwar migration to Western Europe in each of its three distinct but interrelated waves or phases labor migration family migration and humanitarian or forced migration Messina demonstrates that postwar migration to Western Europe in all of its phases has been governed by a set of mutually reinforcing and mostly compatible logics Of these the economic the humanitarian and the political the political has predominated over time and is likely to continue doing so into the indefinite future A major cross disciplinary analysis that will appeal to political scientists sociologists and general researchers and scholars of ethnicity race relations and comparative public policy
