Long Term Economic And Military Trends 1994 2015 The United States And Asia:

Long-term Economic and Military Trends, 1994-2015 Charles Wolf (Jr.), Charles Wolf, 1995 Key economic and military trends in China Taiwan the United States Japan Korea and India will likely indicate the future of Asia s security environment For the period 1994 2015 this report forecasts each country s gross domestic product GDP per capita GDP military spending and military capital stocks synthesizing and comparing them to illuminate trends that among many others will significantly affect the future security environment in Asia All of the estimates should be treated with caution because of the many uncertainties that underlie the results The methodology and structure of this report are similar to those in an earlier RAND report see N 2757 USDP 1989 **The United States and Asia** ,2001 Publisher Provided Annotation The past 20 years have been a time of relative peace in Asia and notwithstanding the 1997 1998 financial crisis a period of robust economic growth as well Currently however Asia is beset by a variety of problems that could well imperil the stability it has long enjoyed including territorial disputes nuclear rivalry rising nationalist sentiments and increased military capabilities This report summarizes the manner in which the United States can best meet these challenges and thereby ensure continued peace and stability in the region In the interests of this goal the report outlines an integrated political military and economic strategy that the United States can pursue to inhibit the growth of rivalries in Asia and more broadly prevent the rise of instability in the region Also delineated are changes in U S military posture that will be made necessary by this strategy

The Two Koreas and the United States Wonmo Dong, 2016-07-08 As Korea enters a hopeful new chapter in its history this timely book with contributions by distinguished experts in the field addresses the fragility of the political economic and military balance within the two Koreas and in Northeast Asia It provides in depth analysis of the principal factors that gave rise to the persisting Cold War on the Korean peninsula and successfully unravels many aspects of the complicated domestic and economic dynamics of the two Koreas the patterns of relationship between the two rival states as well as their changing relationships with the United States and other major powers **The United States, China and Southeast Asian Security** W. Bert, 2002-12-10 China s growing economy and military power may allow it to challenge US influence in East and Southeast Asia Wayne Bert examines the likelihood of this and the impact it would have on Southeast Asian security The approach taken by both the US and China will affect the outcome of this struggle and both the Southeast Asian commitment to economic growth and the development of regional institutions will encourage peaceful evolution and a power transition that avoids major conflict *The Rise of China* Michael E. Brown, 2000 Analysts debate the international implications of a newly powerful China China s relentless economic growth in the 1980s and 1990s heralded its emergence as a great power in world politics As its economy expanded China seemed poised to become the second largest economy in the world At the same time it modernized its military and adopted a more assertive diplomatic posture Many observers have begun to debate the international implications of China s rise Some analysts argue that China will inevitably pose a threat to peace and

security in East Asia A few even predict a new cold war between Beijing and Washington Others claim that a powerful China can remain benign None believes that China can be ignored The essays in this volume assess China s emerging capabilities and intentions debate the impact that China will have on security in the Asia Pacific region and propose policies for the United States to adopt in its relations with China Twenty-First Century World Order and the Asia Pacific J.

Hsiung,2001-08-10 After examining the global system s political volatility at the dawn of the new millenium the book looks at how some of the identifiable system wide trends e g globalization democratization fragmentation etc may find repercussions in the Asia Pacific The book also addresses the question of comprehensive security in comparison with other regions in a wide range of areas subsuming economic security geoeconomics environmental security ecopolitics and human security In addition the book recognizes the idiosyncrasies of the region such as the defensiveness of most Asian governments toward the protection of their financial markets against external forces following the regional financial crisis of the late 1990s

Navigational Rights and Freedoms and the New Law of the Sea Donald R. Rothwell,Sam Bateman,2021-10-18

Navigational rights and freedoms have been central to the development of the law of the sea since the original debates over whether the seas were open or closed to maritime traffic The 1982 UN Convention on the Law of the Sea recognises the legitimate rights of coastal states to proclaim sovereignty and assert jurisdiction over vast areas of maritime space In return maritime states are given a range of navigational rights over waters ranging from the territorial sea through to the high sea The new regime of the law of the sea created by the Convention presents an opportunity to review developments in the law of navigational rights and freedoms This book assesses the navigational regime established by the 1982 Convention with emphasis given to the continuing importance of the freedom of the seas Navigation in the territorial sea and international straits is reviewed especially in the Straits of Malacca and Singapore and the Torres Strait Archipelagic navigation from the perspective of two claimant states Indonesia and the Philippines and a user state South Korea is also considered The interaction of environmental concerns with navigational rights is an important feature of the current law of the sea regime with relevant conventions assessed and the role of the International Maritime Organization in developing navigational standards considered Both European and Canadian practice in the protection of sensitive marine environments and the impact upon navigational rights is also considered Finally the roles of the International Tribunal for the Law of the Sea and the International Maritime Organization in dispute resolution are reviewed before a concluding consideration of the future for navigational rights and freedoms in the twenty first century **Straddling Economics and Politics** Charles Jr.

Wolf,2002-09-11 This collection of essays examines the case for and against globalization the effects of U S economic and foreign policy and numerous issues related to Asian economics and politics Published in prominent journals and news media between 1996 and 2001 these cross cutting essays are as relevant today as when they were first written The author provides remarkable insight into the economic and military directions in which particular countries or regions are moving and what

these movements portend for the future

The Armies of East Asia Dennis Van Vranken Hickey, 2001 The end of the 1980s and the beginning of the 1990s have been a time of great change for academic libraries and librarians Rapid developments in technology have revolutionized the libraries means and mission while declining budgets have adversely impacted the ability of librarians to carry out their roles The literature of academic librarianship today reflects these changes and points to the direction in which academic libraries are headed This book is a comprehensive guide to book chapters and articles written on academic librarianship between 1990 and 1993 Entries for nearly 1 700 works are grouped in six topical chapters for ease of use Each entry includes an informative annotation that summarizes the key points made by the authors the major findings of research projects and the names and locations of libraries with innovative programs Extensive author article book journal title and subject indexes conclude the work The volume is a useful tool for locating specific information on various topics and it is a forecast of the future of academic libraries

Chinese Security Policy Robert Ross, 2009-05-20 This volume provides a coherent and comprehensive understanding of Chinese security policy comprising essays written by one of America s leading scholars Chinese Security Policy covers such fundamental areas as the role of international structure in state behavior the use of force in international politics including deterrence coercive diplomacy and war and the sources of great power conflict and cooperation and balance of power politics with a recent focus on international power transitions The research integrates the realist literature with key issues in Chinese foreign policy thereby placing China s behaviour in the larger context of the international political system Within this framework Chinese Security Policy considers the importance of domestic politics and leadership in Chinese policy making This book examines how Chinese strategic vulnerability since U S China rapprochement in the early 1970s has compelled Beijing to seek cooperation with the United States and to avoid U S China conflict over Taiwan It also addresses the implications of the rise of China for the security of both United States and of Chinese neighbors in East Asia and considers the implications of China s rise for the regional balance of power and the emerging twenty first century East Asian security order This book will be of great interest to all students of Chinese Security and Foreign Policy Chinese and Asian Politics US foreign policy and International Security in general

China's Economic Future Joint Economic Committee Congress of the United States, 2016-12-05 This is the latest Joint Economic Committee volume on the Chinese economy With the current state of US China relations and Hong Kong s accession in 1997 the study should provide policy makers in the USA with a useful tool in guiding economic policy toward China

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Koreas military strength is partly a myth created by South Korea to justify a huge programme of rearmament

China in the New Millennium James A. Dorn, 1998 China is expected to become the world s largest economy in less than

two decades Whether it does so will depend on continued growth of the non state sector and how well China adapts to global market forces The essays in this volume consider the state of China s economic reforms the institutional changes necessary for China to become a global economic power and the interplay between market reforms and social development in China

Forecasting China's Future Roger Irvine, 2015-06-26 China s future development is likely to have a huge impact on twenty first century global outcomes It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China s future in the post Mao era This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains political economic environmental and international After considering the principal forecasting methods available to experts the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks Providing insights for specialists and non specialists into the most critical issues that will determine China s future direction this book will be of particular interest to students and scholars of political economic environmental and international relations issues in China and Asia as well as to readers in business and government

North Korean Paradoxes Charles Jr. Wolf, Kamiljon T. Akramov, 2005-05-20 Analyzes economic political and security issues associated with Korean unification Considers how the North Korean system might unravel leading to possible unification and what the capital costs of unification would be under differing circumstances and assumptions Compares points of relevance and nonrelevance between the German experience with unification in the 1990s and what might occur in Korea

Southeast Asian Security in the New Millennium Richard J. Ellings, Sheldon W. Simon, 2016-09-16 Assessing trends toward creating innovative forms of political economic and security co operation in Southeast Asia this text discusses the international dynamics of Southeast Asian security and its impact on such external factors as the US China and Japan

The New Security Agenda in the Asia-Pacific Region Denny Roy, 2016-07-27 The field of security studies is undergoing a major re evaluation in the post Cold War era and this has important implications for the region The security dangers of the 1990s and beyond are different and more complex than those of the Cold War and strategic thinkers both in the academic and policy making spheres must begin to understand the new environment lest they fall into the old trap of planning for the next conflict based on the conditions of the last conflict This book is designed to survey the new environment assessing what has changed and what remains the same and suggesting what types of demands future strategists will face

Reshaping National Intelligence for an Age of Information

Gregory F. Treverton,2003-03-03 In this bold and penetrating study Gregory Treverton former Vice Chair of the National Intelligence Council and Senate investigator offers his insider s views on how intelligence gathering and analysis must change He suggests why intelligence needs to be both contrarian leaning against the conventional wisdom and attentive to the longer term leaning against the growing shorter time horizons of Washington policy makers He urges that the solving of intelligence puzzles tap expertise outside government in the academy think tanks and Wall Street to make these parties colleagues and co consumers of intelligence befitting the changed role of government from doer to convener mediator and coalition builder *Masters of Illusion* Steven Rosefielde,D. Quinn Mills,2006-12-26 The United States will confront a series of fundamental challenges through the middle of the twenty first century Using a theory of economic systems to gauge present and future global conflicts Steven Rosefielde and D Quinn Mills see the challenges as posed sequentially by terrorism Russia China and the European Union In the cases of terrorism Russia and China Western leaders appreciate aspects of these perils but they are crafting unduly soft policies to deal with the challenges The authors believe that globalists notwithstanding such views are myopic in an era where nuclear proliferation has invalidated the concept of mutually assured destruction What America requires is a new security concept that the authors call strategic independence to enable keeping the peace in dangerous times and foster new generations of leaders capable of acting sanely despite a current public culture addicted to wishful thinking **China in 2020** Angang Hu,2012-11-26 Explains how China as the world s largest emerging market will impact global economic growth FDI flows energy consumption climate change and other arenas with a proposed strategic framework that would guide the country s rise while maximizing positive impacts and minimizing any negative externalities Provided by publisher
