Looking At Sweden Looking At Other Countries:

Looking at Violence in the Nordic Countries Jukka-Pekka Takala, Yaira Obstbaum, Nordic Council of Ministers, 2009 This report reviews and discusses violence statistics and their problems and possible improvements from various angles The report is based on the work of the statistical subproject of the Nordic Project on Violence Violence and its reduction in the Nordic countries V ld och v ldsreducering i Norden financed by the Nordic Council of Ministers and carried out by the Nordic councils for crime prevention and the Scandinavian Research Council for Criminology The Statistics Subproject was to look at three related but originally separate subprojects of the original overall plan 1 To describe and compare violence with the help of extant statistics 2 To chart variations in violence in the Nordic countries 3 To develop instruments of measuring violence in intimate relations including violence in the family With the resources available the subproject was unable to carry out any of these tasks in a truly systematic and comprehensive manner However we hope that the variable material we were able to produce on all these themes can contribute to better accounting for violence and be of help when devising methods for preventing violence The report describes levels and trends in violence It touches on problems and solutions in their measurement Some suggestions are tentative others are more firmly established and the reader can turn to the research and web pages that are referred to in the reports

Gender Equality and Nation Branding in the Nordic Region Eirinn Larsen, Sigrun Marie Moss, Inger Skjelsbæk, 2021-05-25 This book explores how gender equality a central part of the Nordic imaginary is used in the political communication of Nordic states The analyses presented move beyond conventional images and discourses of Nordic gender and women friendliness by critically investigating how and to what extent gender equality serves nation branding in the Nordic region Nation branding is an unescapable part of globalisation which is a market oriented process dominated by the West and predicated on the creation of winners and losers Hence efforts to strengthen the national brand or reputation of specific Nordic countries with the aid of gender equality as a political and symbolic value inevitably help to reinforce already established global hierarchies where the Nordics play the role of moral superpower This book comprises scholars from various fields of specialisation and provides evidence and understanding for the growing interaction between gender equality policies and nation branding in all five Nordic countries It does so by exploring a variety of policy fields and issues including women s rights foreign policy rape and legislation female quotas and business policies in addition to the index industry The rise of the global indexes has reproduced forceful images of the Nordic countries as frontrunners of gender equality which indeed help the Nordic countries to further position themselves as best at being good This book will be of great interest to students and scholars of Nordic gender equality in political science sociology law criminology political psychology and history as well as those interested in nation branding Nordic studies and exceptionalism The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003017134> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

broad introduction to Swedish politics and how Sweden s political system and policies have evolved over the past few decades A European Strategy for Jobs and Growth Great Britain: Parliament: House of Lords: European Union Committee,2006-03-16 This report by the European Union Committee examines the progress of the European Union in initiating a strategy for jobs and growth across the Community as a whole The background to this report stems from the Spring European Council meeting in 2000 in Lisbon and the launch of an economic reform agenda The Committee observes that since the Lisbon Agenda little progress has been made and the performance of many of the larger European economies has been poor The Committee has noted that certain worrying signs of protectionist behaviour have developed especially regarding barriers of cross border mergers The EU has recognized this weak performance and the Agenda was relaunched in 2005 with a greater focus on the key economic priorities of more growth and jobs Also all Member States are now required to produce an annual National Action Plan highlighting the policies being pursued to improve economic growth and increase employment The Committee sets out a number of recommendations to further push forward the priorities of growth and jobs including that the Commission should seek to complete the progress towards an internal market that Member States should influence one another in the development of good practice through statistical comparison of their economic progress and agree on quantifiable targets that the format of the National Action Plans should include not only the successes but where countries are underperforming that the Agenda be given a higher public profile **The American Swedish Monthly** ,1917

Commerce Reports ,1927 *The Census and Social Science* Great Britain: Parliament: House of Commons: Science and Technology Committee,2012-09-21 The Committee undertook an inquiry to consider the use of the data from the census by the Government whether there were elements of the census that would be irreplaceable by other means and if the business of Government would be seriously impacted if census data was lost or changed The Committee is concerned that there is no chief advisor as with other sciences or a Minister who could answer for Government as a whole whether social science provision was adequate and whether the data from the census and other sources was fit for purpose The key disadvantage of the census is the timeliness of the data Yet census data provides a snapshot of the whole country at a moment in time It enables detection of trends in the recent past allows comparisons to be made of different areas in the country more accurately and provides a means to recruit to longitudinal studies Good use is being made of non census surveys to provide equivalent data in a number of areas in a much shorter timescale but these do not have the same breadth as the census and do not provide a national coverage or standard Social science could suffer if the census was to be discontinued without serious consideration as to how this data would be replaced Though the absence of a census would also potentially stimulate a considerable amount of innovation in social science and examination of how to produce social data of an equivalent standard
