Anne Hetherington,2000 Algebra 1: An Integrated Approach McDougal Littell Incorporated,1998-01-01 Improving
Teacher Knowledge in K-12 Schooling Xiaoxia A. Newton,2018-03-15 This volume examines how several key components of
the mathematics education system in the United States fail to provide teachers with adequate and effective tools to teach
mathematics in K 12 classrooms These components consist of teachers own learning experiences as students in K 12
classrooms their undergraduate or graduate trainings in mathematics and their in service professional development trainings
Newton argues that unless we improve these system components as a whole and recognize the importance of teaching future
mathematics teachers explicitly and rigorously the topics they are expected to teach teachers will continue to recycle a body
of incoherent and incomprehensible mathematical knowledge to their students because these are the only types of
mathematical knowledge they have at their disposal both in terms of what they themselves have learned as K 12 students and
in terms of the mathematical resources available to them including the textbooks they rely on to teach as mathematics
teachers
