Number And Inner Space A Study Of Grammatical Number In English:

Number and Inner Space W. H. Hirtle, 1982 Grammatical Number in English Nouns Mark A. Wickens, 1992-03-12

Apart from the coverage given to it in the grammars number in English nouns has received relatively little attention especially in the area of theoretical considerations Guided by the principles of psychomechanics Hirtle 1982a put forth a fairly elaborate theory of number in English nouns The aim of this work is to provide evidence to validate parts of Hirtle's theory to verify some of his analyses and to investigate several problems some of which are mentioned in his work as subjects for further research Specific areas treated are ailment nouns liquid names ending in ings binary objects abstract s and external singulars *The Semantics of Grammar* Anna Wierzbicka, 1988-01-01 The semantics of grammar presents a radically semantic approach to syntax and morphology It offers a methodology which makes it possible to demonstrate on an empirical basis that syntax is neither autonomous nor arbitrary but that it follows from semantics It is shown that every grammatical construction encodes a certain semantic structure which can be revealed and rigorously stated so that the meanings encoded in grammar can be compared in a precise and illuminating way within one language and across language boundaries The author develops a semantic metalanguage based on lexical universals or near universals and ultimately on a system of universal semantic primitives and shows that the same semantic metalanguage can be used for explicating lexical grammatical and pragmatic aspects of language and thus offers a method for an integrated linguistic description based on semantic foundations Analyzing data from a number of different languages including English Russian and Japanese the author explores the notion of ethnosyntax and via semantics links syntax and morphology with culture She attempts to demonstrate that the use of a semantic metalanguage based on lexical universals makes it possible to rephrase the Humboldt Sapir Whorf hypothesis in such a way that it can be tested and treated as a program for empirical research *The Structure of Modern English* Laurel J. Brinton, 2000 This text is designed for undergraduate and graduate students interested in contemporary English especially those whose primary area of interest is English as a second language Focus is placed exclusively on English data providing an empirical explication of the structure of the language **Linguistic Theory and Empirical Evidence** Bob de Jonge, Yishai Tobin, 2011 This volume further elaborates the empirical tradition of Columbia School CS Linguistics by offering diverse empirical analyses for a wide variety of languages These studies open a much needed debate advocating the necessity of the independent validation of linguistic hypotheses This research exemplifies how such a validation should be conducted by determining which forms underlie the analyses and extracting those observations that are considered to be objective The volume consists of two parts a section on synchronic and diachronic grammatical problems and a section on Phonology as Human Behavior PHB the Columbia School version of phonology applied to evolutionary developmental and clinical issues and the phonotactics of the selected lexicon of a literary text It provides a wealth of useful empirical data and in depth and sophisticated qualitative and quantitative analyses of a broad range of

languages from diverse families French Spanish Afrikaans Dutch English Polish Russian Japanese and Hebrew Between Grammar and Lexicon Ellen Contini-Morava, Yishai Tobin, 2000-04-15 This volume has its origins in a theme session entitled Lexical and Grammatical Classification Same or Different from the Fifth International Cognitive Linguistics Conference It includes theme session presentations additional papers from that conference and several invited contributions All the articles explore the relationship between lexical and grammatical categories both illustrating the close interaction as well as questioning the strict dichotomy between them This volume promotes a holistic view of classification reflecting functional cognitive communication and sign oriented approaches to language which have been applied to both the grammar and the lexicon The volume is divided into two parts Part I Number and Gender Systems Across Languages is further subdivided into three sections 1 Noun Classification 2 Number Systems and 3 Gender Systems Part II Verb Systems and Parts of Speech Across Languages is divided into two sections 1 Tense and Aspect and 2 Parts of Speech The analyses represent a diverse range of languages and language families Bantu Swahili Guaykuran Pilag Indo European English Russian Polish Bulgarian Macedonian Spanish and Semitic Hebrew *Meaning as Explanation* Ellen Contini-Morava, Barbara S. Goldberg, 2011-04-20 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing To discuss your book idea or submit a proposal please contact Birgit Sievert

Prague Linguistic Circle Papers Eva Hajiřová, Oldřich Leska, Petr Sgall, Zdena Skoumalová, 1996 Volume 2 of the Prague Linguistic Circle Papers constitutes a single whole together with Vol 1 of the series reviving the classical series of Travaux du Cercle linguistique de Prague which was of great importance for the development of European structural linguistics in the 1930s In the present volume nine Czech linguists and eight authors from abroad present new ideas in various domains from basic properties of the system of language to discourse types and to history of linguistics in the 20th century Fundamental issues of structural linguistics are discussed by C H van Schooneveld and F Ermak those of quantitative linguistics by M T itelová of sentence structure by H H Lieb Y Tobin J Panevová T Gross and J abr ůla discourse patterns are dealt with by J Hoffmannová S meřrková and F tichá phonology and graphemics by E Battistella A Svoboda and P A Luelsdorff with S V Chesnokov and the lexicon by L Waugh and V Straková *Foundations for a Science of Language* Gustave

Guillaume,1984-01-01 This volume presents for the first time in English a representative view of Gustave Guillaume's thought. The texts drawn mainly from his manuscript notes for lectures at the Ecole Pratique des Hautes Etudes in Paris were selected as far as possible for their accessibility as requiring no prior knowledge of his work. The result is a panorama of the far ranging and often provocative thought of one of the twentieth century's most original linguists. **Major Trends in**

Theoretical and Applied Linguistics 1 Nikolaos Lavidas, Thomai Alexiou, Areti Maria Sougari, 2014-01-31 In the three volumes of Major Trends in Theoretical and Applied Linguistics the editors guide the reader through a well selected compendium of works presenting a fresh look at contemporary linguistics. Specialists will find chapters that contribute to their fields of interest and the three volume collection will provide useful reading for anyone interested in linguistics. The first volume explores theoretical issues dealing with phonetics, phonology and syntax, semantics, morphology. Volume two is organized into three main sections that examine interdisciplinary linguistics, discourse analysis, gender and lexicography, language acquisition and language disorders. Finally, volume three focuses on applied linguistics, both language teaching, learning and education. **Prepositions in Their Syntactic, Semantic, and Pragmatic Context** Susanne

Feigenbaum, Dennis Kurzon, 2002-01-01 The growing interest in prepositions is reflected by this impressive collection of papers from leading scholars of various fields. The selected contributions of Prepositions in their Syntactic, Semantic and Pragmatic Context focus on the local and temporal semantics of prepositions in relation to their context too. Following an introduction which puts this new approach into a thematical and historical perspective, the volume presents fifteen studies in the following areas: The semantics of space dynamics, mainly on French prepositions; Language acquisition, aphasia and code switching; Artificial intelligence, mainly of English prepositions; Specific languages: Hebrew from a number of perspectives; syntax, semiotics and sociolinguistic impact on morphology; Maltese; the Melanesian English based Creole Bislama; and Biblical translations into Judeo Greek. **Semantic Plurality** Laure Gardelle, 2019-11-07 This monograph proposes a comparative approach to all the ways of denoting more than one entity from collective and aggregate nouns with the first ever typology to count plurals, partly substantivised adjectives and conjoined NPs. This semantic feature approach to plurality which cuts across number, the count/non-count distinction and lexical NP levels reveals a very consistent Scale of Unit Integration which establishes clear cut boundaries for collective nouns and accommodates cases such as three elephants, cattle or a chain of islands. The study also offers a refined understanding of aggregate nouns, a category nearly as large as that of collective nouns and quantification in pseudo-partitives, develops Guillaume's notion of internal plurality and proposes the innovative concept of hyperonyms of plural classes, e.g. furniture. The Animacy Hierarchy is also found to be influential beyond hybrid agreement. The book aims to be accessible to scholars of any theoretical background interested in these topics. **Phrasal**

Constructions and Resultativeness in English Marina Gorlach, 2004-12-23 Eat up the apple or Eat the apple up. Is there any difference in the messages each of these alternative forms sends? If there isn't, why bother to keep both? On the other hand

is there any semantic similarity between eat the apple up and break the glass to pieces This study takes a fresh look at a still controversial issue of phrasal verbs and their alternate word order applying sign oriented theory and methodology Unlike other analyses it asserts that there is a semantic distinction between the two word order variants phrasal verbs may appear in In order to test this distinction the author analyzes a large corpus of data and also uses translation into a language having a clear morphological distinction between resultative non resultative forms Russian As follows from the analysis English has morphological and syntactic tools to express resultative meaning which allows suggesting a new lexico grammatical category resultativeness Meaning and Grammar Michel Kefer, Johan van der Auwera, 2013-07-31 No detailed description available for Meaning and Grammar Invariance, Markedness and Distinctive Feature Analysis Yishai Tobin, 1994-12-15 This volume provides a new kind of contrastive analysis of two unrelated languages English and Hebrew based on the semiotic concepts of invariance markedness and distinctive feature theory It concentrates on linguistic forms and constructions which are remarkably different in each language despite the fact that they share the same familiar classifications and labels Tobin demonstrates how and why traditional and modern syntactic categories such as grammatical number verb tense aspect mood and voice conditionals and interrogatives etc are not equivalent across languages It is argued that these so called universal concepts function differently in each language system because they belong to distinct language specific semantic domains which are marked by different sets of semantic features The data used in this volume have been taken from a wide range of both spoken and written discourse and texts reflecting people s actual use of language presented in their relevant linguistic and situational contexts Canadiana ,1982 The Regularity of the 'Irregular' Verbs and Nouns in English Elena Even-Simkin, Yishai Tobin, 2013-09-27 This volume presents an in depth study of the so called irregular Past Tense sing sang and Noun Plural foot feet forms with Internal Vowel Alternation IVA in English demonstrating that they possess both a fixed phonological and semantic regularity The innovative sign oriented analysis and inductive methodology employed in this study are further supported by additional first language acquisition data experimental studies and historical evidence The data culled from multiple linguistic anthologies dictionaries and thesauri have shown that although the IVA process comprises a relatively small number of nominal and verbal forms in Modern English IVA originally was a prevalent and productive process in Old English Indo European and other language families The results of this empirical study present and introduce a novel classification based on the regular and systematic iconic phonological and semantic nature of all these diverse IVA processes both nominal and verbal that has been maintained throughout the history of English **Number** Greville G. Corbett, 2000-12-07 Number is the most underestimated of the grammatical categories It is deceptively simple yet the number system which philosophers logicians and many linguists take as the norm namely the distinction between singular and plural as in cat versus cats is only one of a wide range of possibilities to be found in languages around the world Some languages for instance make more distinctions than English having three four or even five different values Adopting a wide

ranging perspective Greville Corbett draws on examples from many languages to analyse the possible systems of number He reveals that the means for signalling number are remarkably varied and are put to a surprising range of special additional uses By surveying some of the riches of the world s linguistic resources this book first published in 2000 makes a major contribution to the typology of categories and demonstrates that languages are much more varied than is generally recognised

New Vistas in Grammar Linda R. Waugh, Stephen Rudy, 1991-01-01 The papers in this volume reflect the renewed interest in the semantics of grammatical categories and the issues of invariance and variation in grammar In particular this collection presents the current understanding of invariance of grammar with respect to the synchronic and diachronic analyses of specific languages and as realized in work on typology and universals The book is divided into five sections The Question of Invariance Invariance and Grammatical Categories Grammar and Discourse Grammar and Pragmatics Typology and Universals

Syntactic Carpentry William O'Grady, 2005-03-23 The book presents a new theory of syntax that is efficiency and computationally oriented and is compatible with the emergentist movement within linguistics
