Psychiatric and Mental Health Nursing Desmond Cormack, William Reynolds, 2013-11-11. Psychiatric and Mental Health Nursing Theory and practice was conceived as a result of three major premises which in the view of the editors relate to the practice of psychiatric and mental health nursing. First, that high quality psychiatric and mental health nursing can be practised only if it is underpinned by appropriate nursing theory. Secondly, that there exists a body of theory which can and should be applied to psychiatric and mental health nursing. Thirdly, that there is a need for a text which will assist teachers, students and clinicians to apply available nursing and borrowed theory to clinical practice. The general aim of this book is to introduce nursing students to a theory-based approach to caring for people with psychiatric and mental health problems. The phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis and also to those who have mental health problems but who do not necessarily have such a diagnosis. The client group to which the material in this text applies will include those who are or have been hospitalized and those in the community who have not been and may never be hospitalized. The intended readership is all students of psychiatric and mental health nursing, issues for example basic and post basic nurses and their teachers.

The Art And Science Of Mental Health Nursing: Principles And Practice Norman, Ian, Ryrie, Iain, 2013-04-01. A comprehensive core student text which combines theoretical foundations of mental health nursing with practical skills and interventions.

Clinical Supervision in Mental Health Nursing Graham Sloan, 2006-06-14. Nursing research has focused on evaluating the effectiveness of clinical supervision but there remains uncertainty as to what facets of clinical supervision are potent in realising effectiveness. This book reports on an investigation on the practice of clinical supervision in mental health nursing. Incorporating three case studies, it illuminates the reciprocal interactions between clinical supervisor and supervisee. While the book uncovers a number of limitations in the process of clinical supervision and gaps in mental health nurses' level of competence in interpersonal relations, it provides a basis for a more critical approach to this important element of professional development.
