Teaching for Toleration in Pluralist Liberal Democracies

Betto van Waarden (KU Leuven)

Abstract

This article determines which education enables the perpetuation of diverse ways of life and the liberal democracy that accommodates this diversity. Liberals like John Rawls, Stephen Macedo, and William Galston have disagreed about the scope of civic education. Based on an analysis of toleration—the primary means for maintaining a pluralist liberal democracy—I argue that schools should teach democratic participatory skills and a minimal exposure to diversity to enable citizens to participate in the democratic process of defining which cultural and religious practices the state should tolerate or prohibit through its laws. To make this argument, I contend, in contrast to several scholars, that toleration is practiced primarily between the democratic state and citizens rather than among citizens. Although many theorists do not show the educational implications of their theories, I conclude that schools must teach: (a) mutual respect among citizens, (b) citizens' constitutional rights, (c) democratic participatory skills, (d) a basic understanding of other worldviews, and (e) critical media skills. Students should master these components through instruction on government, cultures and religions, and the media, but more important through discussions and democratic simulations both inside and outside the classroom.

THIS ARTICLE AIMS to determine which kind of education enables the perpetuation of a reasonable diversity of ways of life and a form of liberal democracy that accommodates this diversity. If there is insufficient civic education, citizens may lose the ability to coexist peacefully. However, if civic education is too extensive, it may forcefully liberalize and destroy reasonable life modes¹—including their cultural values and morality that some argue liberal democracy depends on (see Galston, 1991, p. 9; Walzer, 1994, pp. 4–21).

1. *Reasonable life mode* is based on Rawls's concept of "reasonable comprehensive doctrine" (2005, p. 59). However, I prefer reasonable life mode, as it encompasses not only doctrines, religions, and cultures but also their related practices, which can cause division and the need for (legal) accommodation of diversity.

Hobson,2019-07-12 Religious education in liberal pluralist societies such as the UK the USA and Australian underwent radical change in the 1980s and 1990s with a major shift towards multi faith educationally oriented programmes This has meant significant modifications to both the content and the methodology of religious education courses and to the way they are conceived of and taught in schools and universities One important implication of this change for the teaching and study of religion today is the need for a philosophical dimension that deals with issues such as the truth status of religious statements and the moral acceptability of religious claims This dimension is often insufficiently developed this lack is made more critical by the multiple competing truth claims of various religions giving rise to such contentious problems as the growth of fundamentalism increasing religious intolerance and conflict and differences of opinion on central moral problems such as birth control abortion and euthanasia This text attempts to provide the philosophical underpinning that the study and teaching of religion in modern societies requires *Commitment, Character, and Citizenship* Hanan A. Alexander,Ayman K. Agbaria,2012-05-31 As liberal democracies include increasingly diverse and multifaceted populations the longstanding debate about the role of the state in religious education and the place of religion in public life seems imperative now more than ever The maintenance of religious schools and the planning of religious education curricula raise a profound challenge Too much state supervision can be conceived as interference in religious freedom and as a confinement of the right to cultural liberty Too little supervision can be seen as neglecting the development of the liberal values required to live and work in a democratic society and as abandoning those who within their communities wish to attain a more rigorous education for citizenship and democracy This book draws together leading educationalists philosophers theologians and social scientists to explore issues problems and tensions concerning religious education in a variety of international settings The contributors explore the possibilities and limitations of religious education in preparing citizens in multicultural and multi religious democratic societies Education, Politics and Religion James Arthur,Liam Gearon,Alan Sears,2010-06-28 In recent years a number of popular books have savaged religion arguing it is a

dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book draws arguments and examples from Christianity the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular
