Panpsychism And The Religious Attitude:

Panpsychism and the Religious Attitude D. S. Clarke, 2003-02-27 Defends panpsychism the view that mentality is present in all natural bodies with unified and persisting organization

Panpsychism and the Religious Attitude D. S. Clarke, 2012-02-01 Human beings have thoughts sensations and feelings and think that at least some of this mental life is shared with domestic and wild animals But are there reduced degrees of mentality found in mosquitoes bacteria and even more primitive natural bodies Panpsychists think so and have defended this belief throughout the history of philosophy beginning with the ancient Greeks and continuing into the present In this bold challenging book D S Clarke outlines reasons for accepting panpsychism and defends the doctrine against its critics He proposes it as an alternative to the mechanistic materialism and humanism that dominate present day philosophy

Panpsychism D. S. Clarke, 2004-08-03 An anthology of readings in panpsychism spanning two millennia

Panpsychism in the West, revised edition David Skrbina, 2017-09-22 An updated edition of a comprehensive study of the theory that mind exists in some form in all living and nonliving things In *Panpsychism in the West* the first comprehensive study of the subject David Skrbina argues for the importance of panpsychism the theory that mind exists in some form in all living and nonliving things in consideration of the nature of consciousness and mind Panpsychism with its conception of mind as a general phenomenon of nature uniquely links being and mind More than a theory of mind it is a meta theory a statement about theories of mind rather than a theory in itself Panpsychism can parallel almost every current theory of mind it simply holds that no matter how one conceives of mind such mind applies to all things After a brief discussion of general issues surrounding philosophy of mind Skrbina examines the panpsychist views of philosophers from the pre Socratics to the post structuralists The original edition of *Panpsychism in the West* helped to reinvigorate a neglected and important aspect of philosophic thinking This revised edition offers expanded and updated material that reflects the growth of panpsychism as a subdiscipline It covers the problem of emergence of mind from a non mental reality and the combination problem in greater detail It offers expanded coverage of the pre Socratics and Plato a new section on Augustine expanded discussions of Continental panpsychism scientific arguments Nietzsche and Whitehead and a new section on Russellian monism With this edition *Panpsychism in the West* will be continue to be the standard work on the topic

Panpsychism Peter Ells, 2011-08-26 Materialism asserts that the universe and everything within it including ourselves is a deterministic machine trapped until the end of time on the rigid tracks of inviolable laws Only the mechanisms of physics forces electrical charges and so on are consequential nothing else matters Experiences such as the taste of honey feelings thoughts choices everything concerning the mind is an illusion or is at best a useless and absurd epiphenomenon This accessible and engagingly written book is a serious philosophical work giving solid reasons for rejecting materialism and proposing an alternative metaphysical framework that is fully consistent with science In the sensuous cosmos our essence is that we experience the world in all its exquisite sensual beauty and unbearable suffering

Naturalizing God? Mikael Leidenhag, 2021-07-01 Can nature be considered a religious object Religious naturalists answer yes as they seek to carve out a middle path between supernaturalism and atheistic secularism In this book Mikael Leidenhag critically examines the religious proposals philosophical commitments and ecological ambitions of key religious naturalists including Willem B Drees Charley D Hardwick Donald Crosby Ursula Goodenough Stuart Kauffman Gordon Kaufman Karl Peters and Loyal Rue Leidenhag argues that contemporary religious naturalism faces several problems both with regard to its understanding of naturalism and the ways in which it seeks to uphold a religious conception of reality He evaluates possible routes for moving forward considering naturalistic and theistic proposals He also analyzes the philosophical thesis of panpsychism the idea that mind is a pervasive feature of the universe and reaches down to the fundamental levels of reality The author concludes that panpsychism offers the most promising framework against which to understand the metaphysics and eco ethical ambitions of religious naturalism Panpsychism in the West David Skrbina, 2005 A new consideration of the theory that mind exists in some form in all things includes detailed analyses of its historical and philosophical importance **Cosmopsychism and Original Sin** Harvey Cawdron, 2025-09-18 Cawdron's book explores the applications of cosmopsychism the idea that the universe is conscious to contemporary discussions of original sin in Christian analytic theology There are two issues in the scholarship of original sin that the book focuses on The first is the transmission issue which explains how original sin is transmitted between humans The second is the apparent tension between original sin and moral responsibility In doctrines that include original guilt where later humans are considered guilty for the first sin one has trouble with moral responsibility because later humans cannot have prevented something that happened before they were born This problem also impacts doctrines that do not include original guilt as one has to explain how people can be guilty for sinful acts if original sin makes the performance of these acts inevitable Cawdron argues that cosmopsychism can help us resolve both of these issues suggesting that the placing of consciousness at the fundamental level in cosmopsychism and the fact that the cosmic subject must individuate or de combine to form other subjects can provide us with a useful understanding of the transmission of original sin Cawdron also uses cosmopsychism to develop two models of original sin one including the doctrine of original guilt and another that does not to address tensions between the doctrine and moral responsibility *Systematic Atheology* John R. Shook, 2017-12-01 Atheology is the intellectual effort to understand atheism defend the reasonableness of unbelief and support nonbelievers in their encounters with religion This book presents a historical overview of the development of atheology from ancient thought to the present day It offers in depth examinations of four distinctive schools of atheological thought rationalist atheology scientific atheology moral atheology and civic atheology John R Shook shows how a familiarity with atheology's complex histories forms and strategies illuminates the contentious features of today's atheist and secularist movements which are just as capable of contesting each other as opposing religion The result is a book that provides a disciplined and philosophically

rigorous examination of atheism's intellectual strategies for reasoning with theology Systematic Atheology is an important contribution to the philosophy of religion religious studies secular studies and the sociology and psychology of nonreligion

Process Approaches to Consciousness in Psychology, Neuroscience, and Philosophy of Mind Michel

Weber, Anderson Weekes, 2009-11-18 This collection opens a dialogue between process philosophy and contemporary consciousness studies Approaching consciousness from diverse disciplinary perspectives philosophy psychology neuroscience neuropathology psychotherapy biology animal ethology and physics the contributors offer empirical and philosophical support for a model of consciousness inspired by the process philosophy of Alfred North Whitehead 1861-1947 Whitehead's model is developed in ways he could not have anticipated to show how it can advance current debates beyond well known sticking points This has trenchant consequences for epistemology and suggests fresh and promising new perspectives on such topics as the mind-body problem the neurobiology of consciousness animal consciousness the evolution of consciousness panpsychism the unity of consciousness epiphenomenalism free will and causation [Handbook of Whiteheadian Process Thought](#) Michel Weber, 2013-04-30 Gathering 115 entries written by 101 internationally renowned experts in their fields the Handbook of Whiteheadian Process Thought aims at canvassing the current state of knowledge in Whiteheadian scholarship and at identifying promising directions for future investigations through internal cross-elucidation and external interdisciplinary development Two kinds of entries are weaved together in order to interpret Whitehead secundum Whitehead and to read him from the vantage point of interdisciplinary and cross-disciplinary research The thematic entries provide i a broad contextualisation of the issue at stake ii a focus on Whitehead's treatment if any or of a possible Whiteheadian treatment of the issue iii a history of relevant scholarship iv a personal assessment by the Author The biographical entries provide i a brief vita of the targeted thinker ii a sketch of his/her categories relevant to the Whiteheadian scholarship iii a personal assessment of the actual or possible Whiteheadian semantic transfer to or from the thinker

Groundwork for a New Kind of African Metaphysics Aribiah David Attoe, 2022-01-05 It is not far-fetched to say that much of what is termed African metaphysics remains a traditional affair without the sort of critical analysis that sheds away the burden of myths and ethnocentric rigidity African ideas about the nature of being God causality death etc have largely remained the same and unchallenged mainly due to the hesitancy of some African scholars to question these suppositions or build beyond them In this book Aribiah David Attoe presents a unified African metaphysics that first interrogates important notions held by many traditional African thinkers and then builds upon them to propose a largely materialistic account of African metaphysics The book reimagines and reconstructs the idea of God being causality and death in African metaphysics tackling some of the problems associated with these concepts in African thought It also opens up new vistas of thought while engaging and encouraging African metaphysicians to explore a previously ignored perspective *The Quantum of Explanation* Randall E. Auxier, Gary L. Herstein, 2017-03-31 The Quantum of Explanation advances a bold new theory of how

explanation ought to be understood in philosophical and cosmological inquiries Using a complete interpretation of Alfred North Whitehead's philosophical and mathematical writings and an interpretive structure that is essentially new Auxier and Herstein argue that Whitehead has never been properly understood nor has the depth and breadth of his contribution to the human search for knowledge been assimilated by his successors This important book effectively applies Whitehead's philosophy to problems in the interpretation of science empirical knowledge and nature It develops a new account of philosophical naturalism that will contribute to the current naturalism debate in both Analytic and Continental philosophy Auxier and Herstein also draw attention to some of the most important differences between the process theology tradition and Whitehead's thought arguing in favor of a Whiteheadian naturalism that is more or less independent of theological concerns This book offers a clear and comprehensive introduction to Whitehead's philosophy and is an essential resource for students and scholars interested in American philosophy the philosophy of mathematics and physics and issues associated with naturalism explanation and radical empiricism

Mind that Abides David Skrbina, 2009-01-14 Panpsychism is the view that all things living and nonliving possess some mind like quality It stands in sharp contrast to the traditional notion of mind as the property of humans and perhaps a few select higher animals Though surprising at first glance panpsychism has a long and noble history in both Western and Eastern thought Overlooked by analytical materialist philosophy for most of the 20th century it is now experiencing a renaissance of sorts in several areas of inquiry A number of recent books including Skrbina's Panpsychism in the West 2005 and Strawson et al's Consciousness and its Place in Nature 2006 have established panpsychism as respectable and viable Mind That Abides builds on these works It takes panpsychism to be a plausible theory of mind and then moves forward to work out the philosophical psychological and ethical implications With 17 contributors from a variety of fields this book promises to mark a wholesale change in our philosophical outlook Series A

Creativity and Its Discontents Alan Wyk, Michel Weber, 2013-05-02 I do not expect a good reception from professional philosophers wrote Whitehead in 1929 immediately after the publication of Process and Reality Indeed it took nearly thirty years before scholars seriously started to try to decipher the book taken as a whole And there remains today professional Whiteheadians who claim that this work can or even should be bracketed by anyone wishing to get a clear picture of Whitehead's true speculative agenda Creativity and Its Discontents aims to provide evidence of the conditions for this state of affairs by gathering and contextualizing all the major reviews translated where need be of Process and Reality its original 1929 edition its various translations some of them still ongoing and its 1978 corrected edition It is designed as the ideal tool to accompany the recently published Handbook of Whiteheadian Process Thought

New Conversations on the Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy Inside three scholars offer approaches to the problems of identity consciousness and the mind In the process they open new vistas for thought and raise fresh controversies to some of

the oldest problems in philosophy The first chapter focuses on the identity problem The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable perceptible aspect of the human person The next chapter explores the problem of consciousness It deploys the new concept equiphenomenalism as a model to show that mental properties are not by products but necessary products of consciousness Herein the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible The last chapter addresses the mind body problem It adopts the new concept proto phenomenalism as an alternative explanatory model This model eliminates the idea of a mind As such it approaches the mind body problem from a materialistic point of view with many implications such as the meaninglessness of our existence the possibility of thought engineering as well as religious implications

Weltanschauung and Apologia Elias Hofer,2022-10-11 This book allows us to accompany C S Lewis on his intellectual and spiritual journey from atheism to pantheism and eventually to Christianity It analyzes key elements of Lewis s Christian worldview and identifies challenges leveled against it from alternative worldviews It examines Lewis s apologetic methodology highlighting how it was shaped by his worldview and provides an analysis of Lewis s specific responses to a number of objections The project also serves as a comparative analysis of worldviews particularly as they relate to truth claims of the Christian faith The notion of worldview is critical to the formulation of views One s worldview determines how reality is perceived It s characterized as a set of glasses through which we view our surroundings and interpret experiences It accounts for the perspective we bring to every event in life and helps explain why different people see things differently when looking at the same data The same evidence may lead one person to reject a particular conclusion while moving another to embrace what the other rejected Lewis s major works are explored at length in this book Although much has been written about Lewis Hofer s examination of the influence of worldview on his work is unique

Grounding God Arianne Conty,2023-12-01 Now that we have entered the Anthropocene the geological age in which humans have altered the natural world to such an extent that nature and culture can no longer be separated the modern dichotomies of mind versus body and culture versus nature have become implausible and need to be replaced In Grounding God Arianne Conty argues that it is in the field of religion where we can find a new ontology better suited for the Anthropocene Conty calls this new religious ontology the grounding of the sacred in that it seeks to deconstruct the binaries of modernity and provide in their place a revalorization of the immanent earth and the more than human beings that inhabit it Such a grounding of the sacred is a potent means to overcome the exploitation and desecration of the earth and its nonhuman beings and to provide in its stead an inclusive cosmopolitics that extends mind into matter and culture into nature Tracing such a grounding in the Christian Buddhist neopagan and animist traditions Conty seeks to elaborate an interdisciplinary ecosophy one that uses philosophy anthropology and religious studies to provide new values for the present age

Minding Creation Joanna Leidenhag,2020-12-10 Are humans the only creatures that can

appreciate God's creation What if consciousness is spread more widely across all things This volume examines panpsychism through the lens of Christian doctrine *Minding Creation* is the first substantial examination of what a panpsychist theory of consciousness implies for key theological debates concerning God's presence and action evolution and the origin of the soul human uniqueness and the environmental crisis Joanna Leidenhag develops a theological panpsychism that is based on an exceptionally wide range of scholarship *Minding Creation* draws on the theologies of historical figures such as Augustine of Hippo Gottfried von Leibniz and others in order to create a critical and constructive conversation with contemporary analytic philosophers of mind such as Thomas Nagel Galen Strawson and David J Chalmers Leidenhag also discusses key concepts and issues such as emergence theory divine action and ecology She concludes that God created a universe from nothing which is filled with indwelling powers sacramental value and intrinsic experience This is a creation in which the Holy Spirit is internally present at every point a creation that worships God and a creation that human beings must protect and lead in praise

Mind, Quantum, and Free Will Peter Ells, 2022-12-09 The mind-body problem is the ultimate intractable enigma How can we being complex physical systems have multicoloured experiences and make conscious choices This book proposes that all fundamental constituents of the universe are agents which perceive one another and freely act according to their percepts Contemporary science can be explained in entirely mentalistic terms This is consistent with many interpretations of quantum mechanics such as GRW and Roger Penrose's OR theory
