Social Theory of International Politics Alexander Wendt, 1999-10-07 Drawing upon philosophy and social theory, *Social Theory of International Politics* develops a theory of the international system as a social construction. Alexander Wendt clarifies the central claims of the constructivist approach, presenting a structural and idealist worldview which contrasts with the individualism and materialism which underpins much mainstream international relations theory. He builds a cultural theory of international politics which takes whether states view each other as enemies, rivals or friends as a fundamental determinant. Wendt characterises these roles as cultures of anarchy described as Hobbesian, Lockean and Kantian respectively. These cultures are shared ideas which help shape state interests and capabilities and generate tendencies in the international system. The book describes four factors which can drive structural change from one culture to another: interdependence, common fate, homogenization and self-restraint, and examines the effects of capitalism and democracy in the emergence of a Kantian culture in the West.

The book is the most complete and thorough assessment of Giddens' work currently available. This book argues controversially we do not have a systematic politics of climate change. Politics as usual won't allow us to deal with the problems we face while the recipes of the main challenger to orthodox politics, the green movement, are flawed at source.
