Rethinking Sociology A Critique Of Contemporary Theory:

Rethinking Sociology Irving M. Zeitlin,1973 **Founding Sociology? Talcott Parsons and the Idea of General Theory.** John Holmwood,2014-09-25 The theories of Talcott Parsons are enjoying a revival in the world of sociology Rather than following closely the complex original prose in an effort to explain the theory in its minutiae Holmwood presents a highly readable non technical critique of several of the strongest underlying sociological themes and shows how although flawed in many respects these themes have been recurring in different forms in the theories of those critical of his work

Evolutionism and Its Critics Stephen K. Sanderson,2015-12-03 Evolutionism and Its Critics is a critical history of evolutionary theories in the social sciences and a defense of them against their many critics Sanderson deconstructs not only the wide array of social evolutionary theories but the criticisms of the antievolutionists Deconstructing evolutionary theories means laying bare their fundamental epistemological methodological conceptual and theoretical assumptions and principles Deconstructing antievolutionism means showing just where and how the critics have for the most part gone wrong But Evolutionism and Its Critics aims to reconstruct as well as deconstruct and does this by building on the shoulders of past giants of evolutionary theorizing a comprehensive evolutionary interpretation of human society based on abundant scientific and historical evidence **George Herbert Mead** Peter Hamilton,1992 Social Approaches to Sport Robert M.

Pankin,1982 Essays about sports by sociologists organized around the theme of social organization and differentiation Sports are viewed as they reinforce the structure of Western industrial society Other topics include the role of sports throughout the life cycle Equilibrium versus Understanding Mark Addleson,1995-09-28 Equilibrium versus Understanding argues that neo classical theory is incapable of explaining or understanding human conduct The author asserts that a different sort of economic theory is required and proposes a hermeneutic one The book presents a comprehensive description and analysis of the methodologies involved ultimately rejecting the positi

The Evolution of Human Sociality Stephen K. Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory

Alone Together Robert B. Edgerton,2023-11-15 In Alone Together Social Order on an Urban Beach the focus is on the social dynamics and unwritten rules governing interactions at Southland Beach a popular urban Southern California beach With millions of visitors each year Southland Beach draws a diverse crowd including locals tourists and people from various socio economic backgrounds all converging in close quarters Despite the potential for conflict due to its dense and varied population the beach generally remains a peaceful and enjoyable place The study explores how beachgoers navigate personal space behavior expectations and the presence of authority figures like lifeguards and police often creating an unspoken order among themselves Southland Beach has evolved from a space primarily frequented by beach people locals with a deep connection to the beach to an urban attraction visited by millions The research examines how strangers from

different backgrounds manage to coexist in a shared space where typical urban concerns like distrust and social fragmentation could easily lead to conflict The study explores whether the beach can maintain its reputation as a haven for relaxation and leisure given its transformation into a microcosm of city life with all its potential challenges Factors like limited clothing proximity and occasional substance use could introduce tension yet a unique often implicit social structure keeps interactions largely harmonious The book aims to analyze this balance between enjoyment and potential disorder questioning how a community of strangers can coexist so closely without formalized rules The study applies insights from sociology and anthropology to understand the beachgoers shared practices revealing how informal norms and individual expectations of behavior contribute to a functional if fragile social order Through observation and interviews the research delves into the varying roles of lifeguards police and beachgoers themselves in shaping and maintaining this social environment illuminating the intricate yet resilient order that defines life on Southland Beach This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979

Marx and Mead (RLE Social Theory) Tom W. Goff,2014-08-13 It has often been suggested that a resolution of issues generated by the sociological study of ideas might be reached through a synthesis of specific insights to be found in the works of Karl Marx and George Herbert Mead The present study originated in an investigation of this hypothesis particularly as it bears on the central issue of sociological relativism The author began by delineating the specific problems such a synthesis might resolve and in the process became aware that the nature and depth of differences separating the sociology of knowledge and its critics have never been fully analysed or understood This volume therefore opens with a clarification of these differences a clarification which leads to considerable redefinition of the problem as it has traditionally been understood by critics and proponents of the discipline alike The author points out in particular that it is less a debate than a thorough going contradiction which characterizes the literature dealing with the inadequacies of various formulations of the sociology of knowledge In consequence the study of Marx and Mead presented here is not simply yet another effort to discover a perspective which will satisfy the particular demands of the critics Rather it argues that an adequate perspective fully consistent with the central insight of the discipline that knowledge is radically social in character is to be found in a synthesis of elements in the perspectives of Marx and Mead
