The Ecclesiastical Calendar Samuel Butcher, 1877 **The Medical Renaissance of the Sixteenth Century A.** Wear, R. K. French, I. M. Lonie, 1985-03-07 This book examines the relationship of medicine to those intellectual and social changes which historians call the Renaissance The contributors describe how the whole range of medicine from practical therapeutics to surgery anatomy and pharmacy was developing Some important questions about the nature of medicine as it was taught and practised are raised These include the continuing vigour of Arabic and scholastic medicine how this was reconciled with the renaissance love of all things Greek and the nature of medicine in different parts of Europe The chapters are written by acknowledged experts in their subjects and are based on contributions read at a meeting called for the purpose in Cambridge and supported by the Wellcome Trust Collage in Twentieth-Century Art, Literature, and Culture Rona Cran, 2016-05-23 Emphasizing the diversity of twentieth century collage practices Rona Cran s book explores the role that it played in the work of Joseph Cornell William Burroughs Frank O Hara and Bob Dylan For all four collage was an important creative catalyst employed cathartically aggressively and experimentally Collage s catalytic effect Cran argues enabled each to overcome a potentially destabilizing crisis in representation Cornell convinced that he was an artist and yet hampered by his inability to draw or paint used collage to gain access to the art world and to show what he was capable of given the right medium Burroughs formal problems with linear composition were turned to his advantage by collage which enabled him to move beyond narrative and chronological requirement O Hara used collage to navigate an effective path between plastic art and literature and to choose the facets of each which best suited his compositional style Bob Dylan s self conscious application of collage techniques elevated his brand of rock and roll to a level of heightened aestheticism Throughout her book Cran shows that to delineate collage stringently as one thing or another is to severely limit our understanding of the work of the artists and writers who came to use it in non traditional ways *Authors and Art Movements of the Twentieth Century* Declan Lloyd, 2022-12-30 This book explores the great influence of twentieth century artists and art movements on many major writers of the twentieth century It focuses in particular on four seminal writers who were strongly influenced by very different movements they are Gertrude Stein and Cubism William S Burroughs and Dada J G Ballard and Surrealism and Douglas Coupland and Pop Art For these authors the presence and influence of these art movements is not limited to a small cluster of texts but can be felt much more expansively across their work infiltrating

all manner of multifarious and complex dimensions These authors are all keen to explore new methods of shifting the signature styles and forms of visual art into the literary world Alongside these more overt methods of artistic transposition the authors also often demonstrate a deep philosophical affinity with their chosen movements This book uproots and examines these kinds of artistic engagements and also explores the authors own personal connections with the world of art For these are all authors not only interested in visual art but also intimately connected to the art world Indeed some went on to become renowned artists in their own right while others were closely associated with major historical art figures Above all however they are unified by a kindred interest in exploring how the methods and philosophies of art can be transposed into and even challenge the constraints of traditional forms of literature Energy, Ecocriticism, and Nineteenth-Century Fiction Barri J. Gold,2021-04-10 *Energy Ecocriticism and Nineteenth Century Fiction* Novel Ecologies draws on energy concepts to revisit some of our favorite books *Mansfield Park* *Jane Eyre* *Great Expectations* and *The War of the Worlds* and the ways these shape our sense of ourselves as ecological beings Barri J Gold regards the laws of thermodynamics not solely as a set of physical principles but also as a cultural and conceptual form that we can use to reimagine our historically vexed relationship to the natural world Beginning with an examination of the parallel inceptions of energy and ecology in the mid nineteenth century this book considers the question of how we may better read and interpret our world developing a recipe for experimental reading and insisting upon the importance of literary studies in a world driving to ecological catastrophe

Music-Making in North-East England during the Eighteenth Century Roz Southey, 2017-07-05 The north east of England in the eighteenth century was a region where many different kinds of musical activity thrived and where a wide range of documentation survives Such activities included concert giving teaching tuning and composition as well as music in the theatre and in church Dr Roz Southey examines the impulses behind such activities and the meanings that local people found inherent in them It is evident that music could be perceived or utilized for extremely diverse purposes as entertainment as a learned art as an aid to piety as a profession a social facilitator and a support to patriotism and nationalism Musical societies were established throughout the century and Southey illustrates the social make up of the members as well as the role of Gentlemen Amateurs in the organizing of concerts and the connections with London and other centres The book draws upon a rich selection of source material including local newspapers council and ecclesiastical records private papers and diaries and accounts of local tradesman as well as surviving examples of music composed in the area by Charles Avison Thomas Ebdon and John Garth of Durham amongst many others Charles Avison s importance is focused upon particularly and his Essay on Musical Expression is considered alongside other contemporary writings of lesser fame Southey provides a fascinating insight into the type and social class of audiences and their influence on the repertoire performed The book moves from a consideration of music being used as a fashion item evidenced by the patronage of big name soloists from London and abroad to fiddlers ballad singers music at weddings funerals public celebrations and music for marking the events of the American War of Independence and the French Revolutionary Wars It can be seen therefore that the north east was an area of important musical activity and that the music was always interwoven into the political economic religious and commercial fabric of eighteenth century life
