Looking Good And Doing Good Corporate Philanthropy And Corporate Power By Himmelstein:

Looking Good and Doing Good Jerome L. Himmelstein, 1997-05-22 Political controversy is a lens through which the author examines corporate philanthropy. He explains why corporate philanthropy has become politicized, how corporations respond to controversy about their donations, and what the conflicts tell us about corporate philanthropy and corporate politics. Himmelstein argues that corporate giving sometimes becomes politicized because it is inherently a complex social and political act. Drawing on in-depth interviews with managers at fifty-five of the largest corporate giving programs in the U.S., Himmelstein shows that corporate giving often finds itself as one manager put it, locked in a struggle between looking good and doing good. Handbook of Global Education Policy Karen Mundy, Andy Green, Bob Lingard, Antoni Verger, 2016-05-02 This innovative new handbook offers a comprehensive overview of the ways in which domestic education policy is framed and influenced by global institutions and actors. Surveys current debates about the role of education in a global polity, highlights key transnational policy actors, accessibly introduces research methodologies, and outlines global agendas for education reform. Includes contributions from an international cast of established and emerging scholars at the forefront of the field, thoughtfully edited and organized by a team of world-renowned global education policy experts. Each section features a thorough introduction designed to facilitate readers' understanding of the subsequent material and highlight links to interdisciplinary global policy scholarship. Written in an accessible and engaging style that will appeal to domestic and international policy practitioners, social scientists, and education scholars alike.

The Politics of Partnerships Maria May Seitanidi, 2010-03-22 In the late 1990s, the idea of cross-sector collaborations was relatively new in Europe. The term partnership was employed primarily to refer to partnerships between government and businesses, usually termed PPP (Public-Private Partnerships). On the other hand, strategic alliances was the term employed for business-to-business partnerships. Until then, sponsorship was the most practised associational form between nonprofit organisations (NPOs) and businesses (BUSs), which was included within the broad area of corporate community involvement. The relations between NPOs and BUSs witnessed a gradual intensification over the last 200 years. Gray 1989, Young 1999, Austin 2000, Googins and Rochlin 2000, resulting in increased interactions within both the philanthropic and transnational types of relationships. Seitanidi and Ryan 2007. However, the more recent gradual prominence of the concept of corporate social responsibility (CSR) within all sectors of society elicited an intensification of the debate with regard to the responsibilities of each sector in addressing environmental and social issues. In effect, CSR contributed to the increase of the interactions across the sectors and propelled NPO-BUS Partnerships, a type of social partnership, as a key mechanism for corporations to delve into a process of engaging with NPOs in order to improve their business practices by contributing their resources to address social issues. Heap 1998, Mohiddin 1998, Fowler 2000, Googins and Rochlin 2000, Mancuso Brehm 2001, Drew 2003, Hemphill and Vonortas 2003.

Handbook of the Economics of Art and Culture Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world *The Megarhetorics of Global Development* Rebecca Dingo, J. Blake Scott, 2012-01-29 After World War II an unprecedented age of global development began The formation of the World Bank and the International Monetary Fund allowed war torn and poverty stricken nations to become willing debtors in their desire to entice Western investment and trade New capital it was foretold would pave the way to political and economic stability and the benefits would trickle down to even the poorest citizens The hyperbole of this neocolonialism however has left many of these countries with nothing but compounded debt and unfulfilled promises The

Megarhetorics of Global Development examines rhetorical strategies used by multinational corporations NGOs governments banks and others to further their own economic political or technological agendas These wide ranging case studies employ rhetorical theory globalization scholarship and analysis of cultural and historical dynamics to offer in depth critiques of development practices and their material effects By deconstructing megarhetorics at both the local and global level and following their paths of mobilization and diffusion the concepts of progress and growth can be reevaluated with the end goal of encouraging self sustaining and ethical outcomes

Social Partnerships and Responsible Business M. May Seitanidi, Andrew Crane, 2013-12-04 Cross sector partnerships are widely hailed as a critical means for addressing a wide array of social challenges such as climate change poverty education corruption and health Amid all the positive rhetoric of cross sector partnerships though critical voices point to the limited success of various initiatives in delivering genuine social change and in providing for real citizen participation This collection critically examines the motivations for processes within and expected and actual outcomes of cross sector partnerships In opening up new theoretical methodological and practical perspectives on cross sector social interactions this book reimagines partnerships in order to explore the potential to contribute to the social good A multi disciplinary perspective on partnerships adds serious value to the debate in a range of fields including management politics public management sociology development studies and international relations Contributors to the volume reflect many of these diverse perspectives enabling the book to provide an account of partnerships that is theoretically rich and methodologically varied With critical contributions from leading academics such as Barbara Gray Ans Kolk John Selsky and Sandra Waddock this book is a comprehensive resource which will increase understanding of this vital issue

Philanthropic Foundations Ellen Condliffe Lagemann, 1999-07-22 Foundations are socially and politically significant but this simple fact has mostly been ignored by students of American history This collection

represents an important contribution to an emerging field Kenneth Prewitt Social Science Research Council *Taming the Octopus* Kyle Edward Williams, 2024-02-20 The untold story of how efforts to hold big business accountable changed American capitalism Recent controversies around environmental social and governance ESG investing and woke capital evoke an old idea the Progressive Era vision of a socially responsible corporation By midcentury the notion that big business should benefit society was a consensus view But as Kyle Edward Williams's brilliant history *Taming the Octopus* shows the tools forged by New Deal liberals to hold business leaders accountable such as the Securities and Exchange Commission narrowly focused on the financial interests of shareholders This inadvertently laid the groundwork for a set of fringe views to become dominant that market forces should rule every facet of society Along the way American capitalism itself was reshaped stripping businesses to their profit making core In this vivid and surprising history we meet activists investors executives and workers who fought over a simple question Is the role of the corporation to deliver profits to shareholders or something more On one side were business statesmen who believed corporate largess could solve social problems On the other were libertarian intellectuals such as Milton Friedman and his oft forgotten contemporary Henry Manne whose theories justified the ruthless tactics of a growing class of corporate raiders But Williams reveals that before the activist investor emerged as a capitalist archetype Civil Rights groups used a similar playbook for different ends buying shares to change a company from within As a rising tide of activists pushed corporations to account for societal harms from napalm to environmental pollution to inequitable hiring a new idea emerged that managers could maximize value for society while still turning a maximal profit This elusive ideal stakeholder capitalism still dominates our headlines today Williams's necessary history equips us to reconsider democracy's tangled relationship with capitalism **The Role of Public Policy in K-12**

Science Education George E. DeBoer, 2011-01-01 The goal of this volume of Research in Science Education is to examine the relationship between science education policy and practice and the special role that science education researchers play in influencing policy It has been suggested that the science education research community is isolated from the political process pays little attention to policy matters and has little influence on policy But to influence policy it is important to understand how policy is made and how it is implemented This volume sheds light on the intersection between policy and practice through both theoretical discussions and practical examples This book was written primarily about science education policy development in the context of the highly decentralized educational system of the United States But because policy development is fundamentally a social activity involving knowledge values and personal and community interests there are similarities in how education policy gets enacted and implemented around the world This volume is meant to be useful to science education researchers and to practitioners such as teachers and administrators because it provides information about which aspects of the science education enterprise are affected by state local and national policies It also provides helpful information for researchers and practitioners who wonder how they might influence policy In particular it points out

how the values of people who are affected by policy initiatives are critical to the implementation of those policies

Occupation: Organizer Clément Petitjean, 2023-04-18 A trenchant history of community organizing and a must read for the next generation of organizers seeking to learn from the successes failures and contradictions of the past The community organizing tradition is long overdue for reexamination In *Occupation Organizer* scholar and activist Clément Petitjean traces that history from its roots in the Progressive movement to its expansion and diverging paths during the social movements of the 1960s and 70s when Saul Alinsky became the most popular professional radical in the US while groups like Student Nonviolent Coordinating Committee Students for a Democratic Society and the Black Panthers recast organizers as horizontal antihierarchical spadeworkers those who do the work as part of the community rather than standing apart from it But in the years since the professionalization of organizing work has only increased despite the critiques Only by grappling with its limitations and pitfalls Petitjean insists can we learn to build durable effective organizations for change
