Seeing Stars Rosanna Hansen, 2002. From the mid 1960s to the mid 1970s, West German foreign policy underwent substantial transformations from bilateral to multilateral, from reactive to proactive. The Conference on Security and Cooperation in Europe (CSCE) was an ideal setting for this evolution, enabling the Federal Republic to take the lead early on in Western preparations for the conference and to play a decisive role in the actual East-West negotiations, leading to the Helsinki Final Act of 1975. Based on extensive original research of recently released documents spanning more than fifteen archives in eight countries, this study is a substantial contribution to scholarly discussions on the history of détente, the CSCE and West German foreign policy. The author stresses the importance of looking beyond the bipolarity of the Cold War decades and emphasizes the interconnectedness of European integration and European détente. He highlights the need to place the genesis of the CSCE conference in its historical context rather than looking at it through the prism of the events of 1989 and shows that the bilateral and multilateral elements of Ostpolitik and the CSCE were parallel rather than successive phenomena, parts of the same complex process and in constant interaction with each other.

An Intimate Look at the Night Sky Chet Raymo, 2009-05-26. On one level, An Intimate Look at the Night Sky is a unique star guide: twenty-four beautiful star maps created specifically for this book cycle, through the seasons and across the heavens, revealing what you can see with the naked eye throughout the year on a clear night in the northern hemisphere. Raymo's commentaries amplify the maps, offering intriguing details and tips on identifying stars, planets and constellations. On another level, Chet Raymo challenges our imagination to see what is unseeable in the universe, to perceive distance and size and shape that is inconceivable, to appreciate ever more fully our extraordinary place in the

cosmos His elegant essays on the heavens blend science and history mythology and religion making clear why he is one of the most insightful and passionate science writers of our time Philippine Education Magazine ,1906 The Midnight Sky
