Creating the College Man Daniel A. Clark, 2010-05-25 How did a college education become so vital to American notions of professional and personal advancement Reared on the ideal of the self-made man American men had long rejected the need for college But in the early twentieth century this ideal began to change as white men born in the U.S. faced a barrage of new challenges among them a stultifying bureaucracy and growing competition in the workplace from an influx of immigrants and women At this point a college education appealed to young men as an attractive avenue to success in a dawning corporate age Accessible at first almost exclusively to middle class white males college funneled these aspiring

elites toward a more comfortable and certain future in a revamped construction of the American dream In Creating the College Man Daniel A Clark argues that the dominant mass media of the era popular magazines such as Cosmopolitan and the Saturday Evening Post played an integral role in shaping the immediate and long term goals of this select group of men In editorials articles fiction and advertising magazines depicted the college man as simultaneously cultured and scientific genteel and athletic polished and tough Such depictions underscored the college experience in powerful and attractive ways that neatly united the incongruous strains of American manhood and linked a college education to corporate success
