The Myth of Two Minds Beryl Lieff Benderly, 1987 Studie over de vraag welke psychologische of sociale en culturele factoren ten grondslag liggen aan de man vrouwverdeling in de maatschappij **The Case Against Women Raising Children** Kathleen A. Ryan Carlsson, 2002-03-08 For information about the book go to www.GroenendaelPress.com Evolution and culture produce a body and mind to suit a creature's role in the world Whether care of the young is provided by males, females or both, each species has evolved caregiver traits suited to that task The result is caring women and provider men In other words you are what you do However with the honing of each trait a creature pays a price In the case of a woman who specialized her body and mind to childcare the price was a failure to develop skill at financial self sufficiency and individual direction which in turn made it more likely that such a woman will live in a subordinate relationship Women as primary parents perpetuated gender roles Women internalized this definition of themselves and they became somewhat comfortable with it Even when they wanted more power over their lives they found themselves trapped from within But human beings have also evolved the trait of educability We can learn We can choose the direction in which we develop our abilities and traits The case against women raising children is the case for parents raising children The Gender Knot Allan Johnson, 2014-10-19 New Third Edition The Gender Knot Allan Johnson's response to the pain and confusion that men and women experience by living with gender inequality explains what patriarchy is and isn't how it works and what gets in the way of understanding and doing something about it Johnson's simple yet powerful approach avoids the paralyzing trap of guilt blame anger and defensive denial that often results from conversations about gender This edition features Updated references data resources and examples especially in relation to issues of sexual orientation and gender identity e.g gay marriage transgender cisgender A glossary of terms A new chapter What Changes and What Does Not Manhood and Violence that provides an extended analysis of the causes of men's violence as a patriarchal phenomenon Women: The Misunderstood Majority M. Gay Hubbard, 2003-05-12 Fact Women are the major consumers of counseling services today Fact The average counselor male or female secular or pastoral has little or no specific training in the psychology of women or in understanding women's issues Result A widespread therapy gap that reduces respect hinders healing and breeds frustration M Gay Hubbard writes to close that disturbing gap by exposing common misbeliefs and faulty assumptions about women that can block understanding and perpetuate pain Her aim in this provocative yet balanced book is to Increase women's self understanding and make them smarter consumers of counseling services Challenge the myths of womanhood old and new that pervade our culture and can skew the thinking of counselor and client alike Expose faulty assumptions about women and therapy that may sabotage a counselor's best efforts and even increase the risk of sexual abuse Examine the politics of gender research and show why data about sex differences is often manipulated and misinterpreted to further particular agendas Encourage women and their counselors to look at the business of healing with fresh hope deeper understanding and

an abiding sense of compassion Impeccably researched highly readable challenging but never strident Women The Misunderstood Majority is designed to open eyes and heal hearts and to open the way for more women to lead productive and fulfilling lives **The Gender Knot** Allan G. Johnson,2005 A compelling approach to gender inequality that empowers both men and women to be part of the solution instead of just part of the problem **Christian Perspectives on Sexuality and Gender** Elizabeth Stuart,Adrian Thatcher,1996 This collection of articles present a variety of broadly Christian responses to issues such as sexuality and gender sexuality and spirituality gay and lesbian sexuality sexuality and violence sexuality and singleness and the family **The Politics of Interpretation** Patrick Colm Hogan,1990-07-26 This interpretive study analyzes the complex politics of literature criticism and professionalism While affirming the profound importance of political analysis from the ideological critique of literary texts to the social and economic critique of academic institutions Hogan reassesses the poststructuralist doctrines that underlie much recent work in this area He presents extended expositions and criticisms of the views of several influential poststructuralist writers including Jacques Derrida and Luce Irigaray In keeping with recent post poststructuralist trends in France and elsewhere Hogan argues for the political necessity of rational inference and empirical enquiry guided by ethical and more specifically Kantian considerations In the process he convincingly formulates a general theory of ideology that recognizes the crucial link between literary politics and the concrete political issues that affect the lives of real men and women in the real world of social and material life His study concludes with an economic analysis of the institutions of literary study outlining some anarchist implications for their restructuring [Left Brain - Right Brain Differences](#) James F. Iaccino,2014-03-05 This volume integrates past clinical findings with the latest research on cerebral asymmetry in order to identify why humans process information in different ways A must for anyone who wants to understand human cognitive nature further specifically the reasons why we are wired a certain way and whether these cortical circuits are flexible enough to be altered this book presents the most up to date information on hemispheric differences within normal and clinical populations Its focus on sex handedness and developmental differences is critical to the derivation of a better perspective on how future research should be conducted in this expanding science Iaccino begins by explaining basic brain structures and types of cognitive styles assigned to each hemisphere He then details studies involving various clinical populations psychophysiological split brain dyslexic and psychotic to support the claim that the two hemispheres are different morphologically and functionally speaking Applying this clinical research to the more normal population the author uncovers striking cortical variations between the sexes and between the handedness groups along with developmental changes which occur as a function of time Finally he provides a detailed summary of the previous chapters and highlights where asymmetrical research may be headed in the future

War and Gender Joshua S. Goldstein,2003-07-17 Gender roles are nowhere more prominent than in war Yet contentious debates and the scattering of scholarship across academic disciplines have obscured understanding of how gender affects war and vice versa In this authoritative and lively review of our state of knowledge Joshua Goldstein assesses the possible explanations for the near total exclusion of women from combat forces through history and across cultures Topics covered include the history of women who did fight and fought well the complex role of testosterone in men s social behaviours and the construction of masculinity and femininity in the shadow of war Goldstein concludes that killing in war does not come naturally for either gender and that gender norms often shape men women and children to the needs of the war system Illustrated with photographs drawings and graphics and drawing from scholarship spanning six academic disciplines this book provides a unique study of a fascinating issue

Conceiving of Personality Michael Robbins (M.D.),1996-01-01 The quest to comprehend the essence of human nature is as old as the capacity for reflective thought In this provocative book Dr Michael Robbins proposes a new approach that draws upon psychoanalysis but is shaped by awareness of the limits that the particular circumstances of historical epoch Western culture male gender and modal population from which psychoanalysis was derived impose on its modernist claims to being a universal theory Dr Robbins addresses these limitations from the perspective of philosophy of science focusing on the paradigm shift from logical positivism which seeks to reduce complexity and diversity to its presumptive causal building blocks to the postmodern emphasis on pluralism and on relativistic contextual evanescent knowledge He examines the implications of this shift for the disciplines that study human

nature neuroscience psychoanalysis gender studies anthropology and sociology After considering whether typical personality has changed over historical time and studying the cross cultural diversity of human nature the relationship of gender to personality the spectrum of personality variability within Western culture and the relationship of the contextual embeddedness of the conceiver to his or her theory he proposes a dialectical conception of personality based on systems and chaos theories that respects its multiple guises and circumstantial richness of content without abandoning the quest for universal principles of organization and development

S/He Brain Robert Nadeau, 1996-10-07 During the 1960s Margaret Mead's argument that gender identity is a product of learning in particular cultural contexts was incorporated into the sex gender system in feminist theory In this system sex refers to physiological differences in the body and gender refers to learned sex specific bodies to be viewed as separate and distinct from gender neutral minds In S He Brain Nadeau demonstrates that the sex gender system is not some arcane bit of academic jargon that has no impact on our daily lives It is the greatest source of division and conflict in the politics of our sexual lives for a now obvious reason the brains of men and women are not the same and the differences have behavioral consequences Further he argues that an improved understanding of the relationship between sex and gender could enlarge the bases for meaningful dialogue between men and women and lead to new standards for sexual equality that is more realistic and humane than the current standard The individual most responsible for legitimating the modern distinction between sex and gender was the anthropologist Margaret Mead According to the Mead doctrine gender identity is almost entirely a product of learning in different cultural contexts and sex or biological reality is not a determinant of this identity The assumption that gender identity is learned in sexless or gender neutral minds separate and distinct from sex specific bodies legitimated the sex gender system that has been foundational to feminist theory since the mid 1970s In this system sex refers to physiological differences in the domain of the body and gender to learned behavior in the domain of mind Since this two domain distinction obviated the connection between biological reality and gender identity it allowed gender identity to be viewed as scripted or socially constructed by cultural narratives stories myths legends and the like invented by men to control and oppress women In IS He Brain R Nadeau demonstrates that the sex gender system is not in accord with biological reality for now obvious reasons the brains of men and women are not the same and the differences have behavioral consequences Yet the intent of the book is to serve the cause of full sexual equality and not to escalate the gender war Nadeau attempts to accomplish this by demonstrating that an improved understanding of the relationship between sex and gender can not only enlarge the bases for meaningful communication between men and women It could also serve as the basis for a new and improved standard of sexual equality that eliminates the grossly unfair treatment of women sanctioned by the current standard

Communication and Sex-role Socialization Cynthia Berryman-Fink, Deborah Ballard-Reisch, Lisa H. Newman, 2015-10-23 Originally published in 1993 The essays in this book collectively seek to illuminate the role of communication and sex role socialization throughout

the life cycle Section 1 addresses some important issues and behaviours that have an impact on the beginnings of the socialization process Section 2 covers socialization later on in relationships the workplace and the political arena while section 3 looks at manifestations of socialization through communication strategies and skills Finally section 4 addresses ways to alter socialization through instructional practices in higher education The approach to studying sex role socialization varies by perspective and methodology and conclusions are interpreted in diverse ways but the results have been very similar and the research in this volume shows that the socialization of males and females continues to reinforce male dominance despite women s advancement toward equal status in society This work is of interest in the fields of sociology psychology anthropology and women s studies as well as communication
