Animal Models for the Study of Human Disease Ann-Christin Gaupel, Wei-Lin Winnie Wang, Sarah Mordan-McCombs, Edmund Chun Yu Lee, Martin Tenniswood, 2013-05-29 In humans the natural history of prostate cancer spans 30 40 years which makes it a difficult disease to model in rodents Furthermore the molecular pathology of prostate cancer responsible for tumor initiation and progression is complex and often redundant The sequential changes in oncogene and tumor suppressor gene expression during prostate cancer progression have not been fully delineated Despite these issues there are model systems including carefully designed orthotopic xenograft models that provide robust platforms for drug evaluation and studying the effects of diet and environmental stress on prostate carcinogenesis Comprehensive transgenic and knockout models have also been developed that recapitulate individual steps in tumor initiation and metastatic progression and highlight the importance of the tumor microenvironment While very few of the transgenic and knockout systems recapitulate the entire natural history of prostate cancer individual model systems provide valuable genetic insight into the biological consequences of disrupting prostate homeostasis

Vegan Witchcraft Corey Lee Wrenn, 2025-08-25 Vegan Witchcraft is the first book to blend theories of animal rights feminism and modern witchcraft in pursuit of total liberation Perhaps the most foundational of all ethics in modern witchcraft is the creed Do no harm Despite this multispecies suffering persists in nonvegan witchcraft Vegan Witchcraft examines this intriguing conflict unpacking the role of Nonhuman Animals in modern witchcraft from a vegan feminist perspective to illuminate inequalities that persist in alternative spiritual practices in the West Recognizing Nonhuman Animals as comrades instead of consumables vegan witchcraft confronts the harm imposed on nature humans and other animals and identifies witchery as a powerful conduit for social change that draws its energy from plant based foods multispecies solidarity and feminine power The book critically analyzes popular witchcraft pathways in Britain and America to interrogate the many ways in which Nonhuman Animals are overlooked objectified or exploited highlighting theological inconsistencies and missed opportunities that might be overcome to create a stronger practice for women and their communities It reimagines witchcraft practice and lore to manifest justice and compassion for fellow humans Nonhuman Animals and nature Veganism is advanced as a magical practice of self care community responsibility conscious consumption societal transformation and environmental protection The book calls for the redirection of the modern witch's path toward a just world and away from the systematic symbolic and material exploitation of Nonhuman Animals that permeates witchcraft today This book will be essential reading for those interested in critical animal studies animal rights ecofeminism vegan religious studies environmental philosophy and witchcraft

Zoopoetics Aaron M. Moe, 2013-12-19 Zoopoetics assumes Aristotle was right The general origin of poetry resides in part in the instinct to imitate But it is an innovative imitation An exploration of the oeuvres of Walt Whitman E E Cummings W S Merwin and Brenda Hillman reveals the many places where an imitation of another species poiesis Greek makings contributes to breakthroughs in poetic form However humans are not the only imitators in the animal kingdom Other species too achieve breakthroughs in their makings through an attentiveness to the ways of being of other animals For this reason mimic octopi elephants beluga whales and many other species join the exploration of what zoopoetics encompasses Zoopoetics provides further traction for people interested in the possibilities when and where species meet Gestures are paramount to zoopoetics Through the interplay of gestures the human animal textual spheres merge making it possible to recognize how actual biological animals impact the material makings of poetry Moreover as many species are makers zoopoetics expands the poetic tradition to include nonhuman poiesis

Philosophy, Animality and the Life Sciences Wahida Khandker, 2014-07-21 Using animals for scientific research is a highly contentious issue that Continental philosophers engaging with the animal question have been rightly accused of shying away from Now Wahida Khandker asks whether Continental approaches to animality and organic life will make us reconsider our treatment of non human animals By following its historical and philosophical development she argues that the concept of pathological life as a means of understanding organic life as a whole plays a pivotal role in refiguring the human animal distinction She explores the significance of this across philosophy and the life sciences through the work of a number of key thinkers of life and process from Henri Bergson to Donna Haraway
