Nurses Under Stress:

Nurses Under Stress Sharol F. Jacobson, H. Marie McGrath, 1983 **Stress, Burnout, and Addiction in the Nursing Profession** Herbert R. Warner Ph.D, 2014-03 This book is about the most common issues that confront a nurse on a daily basis. It can cause him or her heartaches, heartbreaks, and heart troubles. Stress is by far, in my opinion, a leading cause of heart problems, sickness, and depression in this country. In this book, I talk about awareness in our hospitals, clinics, and emergency departments. Everyone should feel comfortable and be confident of the nurse treating you or your loved ones; we must also remember that nurses are also human beings with issues and problems like everyone else in this world. This book is also a valuable asset to any nursing student considering going to nursing school or college to study medicine. *Stress and Coping in Nursing* Roy D. Bailey, Margaret Clarke, 2013-11-11 Increasingly, stress as a concept is being used as an explanation of a wide variety of negative phenomena which are experienced by all people but which include nurses in particular and their patients. Nursing has been identified as a high stress profession, and one can hardly pick up a nursing journal or even read a newspaper article about nursing without finding the word stress used liberally. Examples of its use are found in relation to sickness, absence rates, high level of nursing staff turnover, discontent in nursing, the effects of unemployment, the effects of overwork, having too much responsibility, having too little responsibility or control, the effects of constantly giving emotionally to others, the causes of illness, the effects of going into hospital, delayed healing, anxiety, depression, and alcoholism. Given the heterogeneous nature of these phenomena, some of which are the diametric opposite of others and that they are clearly being attributed to the one concept stress, then that concept must necessarily be of importance within people's lives. Or is it perhaps just a fashionable, global but ultimately empty explanation? Roy Bailey and I believe that stress is an extremely important concept. Indeed, we would argue that it is a meta-concept rather than a concept which does indeed serve to explain many disparate phenomena. Nurse Burnout Suzanne Waddill-Goad, 2016 Nursing is more than a job. It is a profession that attracts those who value compassion, want to make a difference in other people's lives, and want to do greater good in the world. While the profession provides endless options of practice settings and flexibility, nurses are burning out due to schedules, long shifts, mental and physical exhaustion, workload, conflict, and bullying. Challenging patients, rapid advances in technology, and lack of control. And when stress and fatigue take over, a nurse's ability to prioritize self-care and recovery time, patient safety, and quality is greatly affected and compromised. **Nurse Burnout: Overcoming Stress in Nursing** explores the stress-fatigue-burnout connection, the risks involved, and defines the health concerns and practice considerations for how to move the profession forward. Author Suzanne Waddill-Goad provides nurses with the tools they need: set boundaries and combat compassion fatigue in order to renew energy to be at your personal and professional best. **Stress Management for Nurses in Skilled Nursing Facilities** Kaylynn Gorman, 2023 Nursing is a mentally and physically demanding job causing stress in the lives of many registered nurses. Extreme stress is often disregarded due to the demands of the job and

the increasing shortage of nurses in the field Evidence indicates that nurses in skilled nursing facilities are at significant risk for stress related adverse outcomes Stress negatively impacts physical and mental health nurse burnout and compassion fatigue compromising the well being of the nurse and the patients they care for This project aims to implement a stress management program for registered nurses within a skilled nursing facility Two resources will be included to help nurses identify stress and manage its effects in and out of the workplace The first resource is a PowerPoint presentation that explains common outcomes of stress and provides coping strategies to utilize at any time The second resource is a readily available handout to all nurses that provides quick references on the effects of stress and serves as a reminder for nurses to check in with their current mental and physical state The provided education will assist nurses in recognizing the signs of stress and offer suggestions for reducing the risk of excessive stress Nurse managers will also benefit from this project by maintaining a healthier nursing staff and increasing nurse and patient satisfaction Overall this project aims to raise awareness of stress and its overall effects on nurses in skilled nursing facilities and provide those nurses with resources to assist them in managing their stress
