Big and Little Histories Marnie Hughes-Warrington, 2021-08-19 This book introduces students to ethics in historiography through an

exploration of how historians in different times and places have explained how history ought to be written and how those views relate to different understandings of ethics No two histories are the same The book argues that this is a good thing because the differences between histories are largely a matter of ethics Looking to histories made across the world and from ancient times until today readers are introduced to a wide variety of approaches to the ethics of history including well known ethical approaches such as the virtue ethics of universal historians and utilitarian approaches to collective biography writing while also discovering new and emerging ideas in the ethics of history Through these approaches readers are encouraged to challenge their ideas about whether humans are separate from other living and non living things and whether machines and animals can write histories The book looks to the fundamental questions posed about the nature of history making by Indigenous history makers and asks whether the ethics at play in the global variety of histories might be better appreciated in professional codes of conduct and approaches to research ethics management Opening up the topic of ethics to show how historians might have viewed ethics differently in the past the book requires no background in ethics or history theory and is open to all of those with an interest in how we think about good histories

Transnational Political Spaces Mathias Albert,2009-10-05 From a decidedly multidisciplinary perspective

the articles in Transnational Political Spaces address the notion that political space is no longer fully congruent with national borders. Instead, there are areas called transnational political spaces caused by factors such as migration and social transformation where policy occurs oblivious to national pressure. Organized into three sections: transnational actors, transnational spaces and critical encounters, this volume explains how these spaces are formed and defined and how they can be traced and conceptualized. Aus interdisziplinärer Perspektive gehen die Beiträge der Frage nach, wie transnationale politische Räume hervorgebracht und gestaltet werden. Dabei sind diese nicht rein territorial definiert. Einbezogen werden Identitäten und Interaktionen, die nationale Grenzen überschreiten, wie sie etwa durch Migration entstehen. **The Nation**

State and Beyond Isabella Löhr, Roland Wenzlhuemer, 2012-12-13. The history of globalization is anything but a no-frills affair that moves smoothly along a clear-cut unidirectional path of development, eventually leading to seamless global integration. Accordingly, scholarship in the social sciences has increasingly argued against equating the history of globalization processes and transcultural entanglements with the master narrative of the gradual homogenization of the world. Examining the shifting patterns of global connections has therefore become the main challenge for all those who seek to understand the past, the present and the future of modern societies. And this challenge includes finding a place for the nation-state. The studies presented here argue that looking at the nation-state from the perspective of global entanglements opens the door for its interpretation as a dynamic and multi-layered structure that takes part in globalization processes and plays various and at times even contradictory roles at the same time. **The Routledge Companion to Big History** Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01. The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history. The volume is divided into five parts, each representing current and evolving areas of interest to the community, including big history's relationship to science, social science, the humanities and the future, as well as teaching big history and little big histories. Considering an ever-expanding range of theoretical, pedagogical and research topics, the book addresses such questions as: what is the relationship between big history and scientific research? how are big historians working with philosophers and religious thinkers to help construct meaning? how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms? what is little big history and how does big history impact on thinking about the future? The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels. A timely collection with contributions from leading proponents in the field, it is the ideal guide for those wanting to engage with the theories and concepts behind big history. **The Global Turn** Eve Darian-Smith, Philip C. McCarty, 2017-08-01. The ability to deploy interdisciplinary theoretical perspectives that speak to interconnected global dimensions is critical if one's work is to be relevant and applicable to the emerging global-scale issues of our time. The Global Turn is a guide for students and scholars across all areas of the social sciences and humanities who

wish to embark on global studies research projects The authors demonstrate how the global can be studied from a local perspective and vice versa They show how global processes manifest at multiple levels transnational regional national and local all of which are interconnected and mutually constitutive This book takes readers through the steps of thinking like a global scholar in theoretical methodological and practical terms and it explains the implications of global perspectives for research design

History & Histography Glen Cunningham, 2018-08-03 [The Strange Persistence of Universal History in Political Thought](#) Brett Bowden, 2017-03-24 This book explores and explains the reasons why the idea of universal history a form of teleological history which holds that all peoples are travelling along the same path and destined to end at the same point persists in political thought Prominent in Western political thought since the middle of the eighteenth century the idea of universal history holds that all peoples can be situated in the narrative of history on a continuum between a start and an end point between the savage state of nature and civilized modernity Despite various critiques the underlying teleological principle still prevails in much contemporary thinking and policy planning including post conflict peace building and development theory and practice Anathema to contemporary ideals of pluralism and multiculturalism universal history means that not everyone gets to write their own story only a privileged few For the rest history and future are taken out of their hands subsumed and assimilated into other people's narrative

Between Dispersion and Belonging Amitava Chowdhury, Donald Harman Akenson, 2016-06-01 As a historical and religious term diaspora has existed for many years but it only became an academic and analytical concept in the 1980s and 90s Within its various usages two broad directions stand out diaspora as a dispersion of people from an original homeland and diaspora as a claim of identity that expresses a form of belonging and also keeps alive a sense of difference Between Dispersion and Belonging critically assesses the meaning and practice of diaspora first by engaging with the theoretical life histories of the concept and then by examining a range of historical case studies Essays in this volume draw from diaspora formations in the pre modern Indian Ocean region read diaspora against the concept of indigeneity in the Americas reassess the claim for a Swedish diaspora interrogate the notion of an invisible English diaspora in the Atlantic world calibrate the meaning of the Irish diaspora in North America and consider the case for a global Indian indentured labour diaspora Through these studies the contributors demonstrate that an inherent appeal to globality is central to modern formulations of diaspora They are not global in the sense that diasporas span the entire globe rather they are global precisely because they are not bound by arbitrary geopolitical units In examining the ways in which academic and larger society discuss diaspora Between Dispersion and Belonging presents a critique of modern historiography and positions that critique in the shape of global history Contributors include William Safran University of Colorado Boulder James T Carson Queen's University Eivind H Seland University of Bergen Don MacRaild University of Ulster and Rankin Sherling Marion Military Institute the Military College of Alabama

The Many Faces of Clio Q. Edward Wang,Franz L. Fillafer,Georg G. Iggers,2007 Born in Germany Georg Iggers escaped from Nazism to the United States in his adolescence where he became one of the most distinguished scholars of European intellectual history and the history of historiography In his lectures delivered all over the world and in his numerous books translated into many languages Georg Iggers has reshaped historiography and indefatigably promoted cross cultural dialogue This volume reflects the profound impact of his oeuvre Among the contributors are leading intellectual historians but also younger scholars who explore the various cultural contexts of modern historiography focusing on changes of European and American scholarship as well as non Western historical writing in relation to developments in the West Addressing these changes from a transnational perspective this well rounded volume offers an excellent introduction to the field which will be of interest to both established historians and graduate students

The New Global History Bruce Mazlish,2006-09-27 From a distinguished author in the field The New Global History is a critical inquiry into the historical process of globalization which is seen as a distinctly twentieth century phenomenon with its roots in the age of expansion of the early modern world Cutting across disciplinary boundaries The New Global History offers a fresh overarching view of the process of globalization that is always empirically based and discusses the most important themes such as policy trade cultural imperialism and warfare Bruce Mazlish argues that globalization is not something that the West has imposed upon the rest of the world but the result of the interplay of many factors across continents Students of history politics and international studies will all find this a valuable resource in the pursuit of their studies
