Partners in Learning Carol A. Lyons, Gay Su Pinnell, Diane E. DeFord, 1993 Reading Recovery a focused one on one program for children who have difficulty learning to read has shown an astounding level of effectiveness for a relatively new educational intervention In *Partners in Learning Teachers and Children in Reading Recovery* authors Carol A Lyons Gay Su Pinnell and Diane E DeFord look thoroughly at this effective new program the results of which have shown a greater than 90% success rate at raising at risk learners to an average level of literacy in approximately 16 to 20 weeks of individualized instruction The Administration and Supervision of Reading Programs Shelley B. Instructional Models in Reading Steven A. Stahl, David A. Hayes, 2013-04-03 This book started with a simple idea examine models of reading instruction that have emerged during the past 20 years These models span a wide range of instruction representing a continuum from highly structured task analytic instruction to child centered and holistic instruction Each model has its own epistemology or views on how reading and instruction are to be defined The different epistemologies indicate different principles of instruction which in turn indicate different practices in the classroom Each model is also supported by a different research base In this volume leading proponents of these different models discuss their ideas about reading instruction thereby encouraging readers to make their own comparisons and contrasts The chapter authors seem to adopt the editors eclectic approach to some greater or lesser extent incorporating aspects of other models into their instruction as they see other goals Thus models of reading instruction are complex Complicating matters further is the fact that teachers hold their own models of reading which may or may not be congruent with those discussed here Although academically developed models influence college preservice and in service instruction teachers own models of reading filter the information that they take from what they learn from these perspectives By carefully examining these variables this book makes a firm contribution toward disciplined inquiry into what it means to teach reading **Preventing Early Learning**

Failure Robert Sornson, 2001 Each year thousands of young children come to school without good early learning experiences and are unprepared for school learning activities Others have experienced physical or emotional setbacks that make learning difficult and frustrating In *Preventing Early Learning Failure* expert educators describe practices that can help children find success in school Topics include a look at what s important in reading and math the nature of true learning disabilities and problem solving using the Instructional Support Team model with a report on an elementary school that has adopted that model and changed the lives of many at risk learners Other chapters report on basic sensory skill development at the kindergarten level and reflect on the concepts and practices that make a difference in the lives of young learners The authors

examine four programs including the widely heralded Success for All program that show promise in helping children get ready for early learning success The authors also describe effective preschool programs and principles and they look at how an awareness of multiple intelligences and individual learning needs can be useful Three of the chapters include stories that illustrate some ways to prevent failure One story describes a classroom teacher who learned to think differently about student behavior another describes innovative ways a school dealt with three problem children and the third tells about the productive relationship of a young boy his mother and his teacher We cannot afford to let children in the early years of school fall into a pattern of failure that will affect them their families and their communities throughout a lifetime Preventing Early Learning Failure offers practical approaches to help develop every child s capacity for learning and ensure that no child will be left behind Note This product listing is for the Adobe Acrobat PDF version of the book *Teaching Struggling Readers* Carol A. Lyons,2003 Lyons does a masterful job of introducing teachers to the concepts categories language and arguments pertaining to the brain s control of what readers do She offers a new way of thinking about learning about how the mind develops and about what teachers can do to reach struggling readers
