School Choice Alan Wolfe, 2009-02-09 School choice has lately risen to the top of the list of potential solutions to America's educational problems particularly for the poor and the most disadvantaged members of society Indeed in the last few years

several states have held referendums on the use of vouchers in private and parochial schools and more recently the Supreme Court reviewed the constitutionality of a scholarship program that uses vouchers issued to parents. While there has been much debate over the empirical and methodological aspects of school choice policies, discussions related to the effects such policies may have on the nation's moral economy and civil society have been few and far between. *School Choice*, a collection of essays by leading philosophers, historians, legal scholars, and theologians, redresses this situation by addressing the moral and normative side of school choice. The twelve essays commissioned for a conference on school choice that took place at Boston College in 2001 are organized into four sections that consider the relationship of school choice to equality, moral pluralism, institutional ecology, and constitutionality. Each section consists of three essays followed by a critical response. The contributors are Patrick McKinley Brennan, Charles L. Glenn, Amy Gutmann, David Hollenbach, S. J. Meira Levinson, Sanford Levinson, Stephen Macedo, John T. McGreevy, Martha Minow, Richard J. Mouw, Joseph O. Keefe, S. J. Michael J. Perry, Nancy L. Rosenblum, Rosemary C. Salomone, Joseph P. Viteritti, Paul J. Weithman, and Alan Wolfe.

Policy Entrepreneurs and School Choice Michael Mintrom, 2000-04-26. Rapid and controversial, the spread of school choice initiatives across the United States has radically changed political debate about public education. In this book, Michael Mintrom explores the complex world of open enrollment policies, charter schools, and voucher plans to reveal how and why school choice has become a major issue, and he draws important conclusions about how innovative individuals can spur significant change in the policy arena. Policy entrepreneurs—individuals who take up a cause and make it part of the political agenda—have largely remained background figures without clear definition in the policymaking literature. This book is the first comprehensive and systematic treatment of the concept of policy entrepreneurship, providing an important foundation for explaining how policy proposals are initiated, considered, and adopted. Mintrom uses the emergence of school choice in state politics to examine how policy change originates. He shows how policy entrepreneurs have been instrumental in placing school choice onto state legislative agendas despite the lack of compelling evidence about its merits, and how they use social networks to reframe policy issues and attempt to shift the sites of policy debate. Blending innovative theory with both qualitative and quantitative investigation, Mintrom explains how energetic individuals made school choice a real choice. In doing so, he changes our broader understanding of how policy is formed.

School Choice and the Betrayal of Democracy Robert Asen, 2021-10-04. Evidence shows that the increasing privatization of K-12 education siphons resources away from public schools, resulting in poorer learning conditions, underpaid teachers, and greater inequality. But as Robert Asen reveals here, the damage that market-based education reform inflicts on society runs much deeper. At their core, these efforts are antidemocratic. Arguing that democratic communities and public education need one another, Asen examines the theory driving privatization popularized in the neoliberalism of Milton and Rose Friedman, as well as the case for school choice promoted by former secretary of education Betsy DeVos and the controversial voucher program of former Wisconsin governor Scott Walker. What Asen finds is that a market-based approach

holds not just a different view of distributing education but a different vision of society When the values of the market choice competition and self interest shape national education that policy produces individuals Asen contends with no connections to community and no obligations to one another The result is a society at odds with democracy Probing and thought provoking School Choice and the Betrayal of Democracy features interviews with local on the ground advocates for public education and offers a countering vision of democratic education one oriented toward civic relationships community and equality This book is essential reading for policymakers advocates of public education citizens and researchers Visions of Schooling

Rosemary C. Salomone, 2008-10-01 DIVAt no time in the past century have there been fiercer battles over our public schools than there are now Parents and educational reformers are challenging not only the mission content and structure of mass compulsory schooling but also its underlying premise that the values promoted through public education are neutral and therefore acceptable to any reasonable person In this important book Rosemary Salomone sets aside the ideological and inflammatory rhetoric that surrounds today s debates over educational values and family choice She offers instead a fair minded examination of education for democratic citizenship in a society that values freedom of conscience and religious pluralism And she proposes a balanced course of action that redefines but does not sever the relationship between education and the state Salomone demonstrates how contemporary conflicts are the product of past educational and social movements She lays bare some of the myths that support the current government monopoly over education and reveals how it privileges those of economic means Through a detailed case study of recent controversy in a suburban New York school district the author explores the legal and policy issues that arise when widely disparate world views stand in the way of political compromise on educational materials techniques and programs Salomone builds a case for educational governance that places the developmental needs of the child at the center of family autonomy She advances a plan that respects diverse values and visions of schooling while preserving the core commitments that bind our nation div **City Schools** Diane

Choosing Schools Mark Schneider, Paul Teske, Melissa Marschall, 2002-04-07 School choice seeks to create a competitive arena in which public schools will attain academic excellence encourage individual student performance and achieve social balance In debating the feasibility of this market approach to improving school systems analysts have focused primarily on schools as suppliers of education but an important question remains Will parents be able to function as smart consumers on behalf of their children Here a highly respected team of social scientists provides extensive empirical evidence on how parents currently do make these choices Drawn from four different types of school districts in New York City and suburban New Jersey their findings not only stress the importance of parental decision making and involvement to school performance but also clarify the issues of school choice in ways that bring much needed balance to the ongoing debate The authors analyze what parents value in education how much they know about schools how well they can match what they say they want in schools with what their children get how satisfied they are with their children's schools and how their involvement in the schools is affected by the opportunity to choose They discover most notably that low income parents value education as much as if not more than high income parents but do not have access to the same quality of school information This problem comes under sensitive thorough scrutiny as do a host of other important topics from school performance to segregation to children at risk of being left behind

Critical Perspectives on Education Policy and Schools, Families, and Communities Sue Winton, Gillian Parekh, 2020-03-01 Critical Perspectives on Education Policy and Schools Families and Communities offers scholars students and practitioners important new knowledge about how current policies impact families schools and community partnerships The book's authors share a critical orientation towards policy and policy research and invite readers to think differently about what policy is who policymakers are and what policy can achieve Their chapters discuss findings from research grounded in diverse theories including institutional ethnography critical disability theory and critical race theory The authors encourage scholars of family school and community partnerships to ask who benefits from policies and who loses and how proposed reforms maintain or disrupt existing relations of power The chapters present original research on a broad range of policies at the local state provincial and national levels in Canada and the USA Some authors look closely at the enactment of specific district policies including a school district's language translation policy and a policy to create local advisory bodies as part of decentralization efforts Other chapters reveal the often unacknowledged yet necessary work parents do to meet their children's needs and enable

schools to operate A few chapters focus on challenges and paradoxes of including families and community members in policymaking processes including a case where parents demonstrated a preference for a policy that research demonstrates can be detrimental to their children's future education opportunities Another set of chapters emphasizes the centrality of policy texts and how language influences the educational experiences and engagement of students and their families Each chapter concludes with a discussion of implications of the research for educators families and other community partners
