Rhythms of Grace Kerri Weems, 2014-10-07 Life is not a sprint it's a marathon These well known words of wisdom remind us to pace ourselves in the journey of life so we reach the finish line with no regrets Pacing yourself is not as easy as it sounds Life tends to take on a pace of its own which when left unchecked will drive us toward burnout and fatigue We can easily become driven by care worry and ambition rather than led by the Holy Spirit We may tend to think of burnout as a modern problem but we can see that people in Jesus' day felt their own kind of spiritual and emotional fatigue Why else would Jesus have said these comforting words Are you tired Worn out Burned out on religion Come to me Get away with me and you'll recover your life I'll show you how to take a real rest Walk with me and work with me watch how I do it Learn the unforced rhythms of grace I won't lay anything heavy or ill fitting on you Keep company with me and you'll learn to live freely and lightly Matt 11:28-30 The Message Even though he spoke these words more than two millennia ago Jesus' call to rest and peace seem tailor made to fit this generation Author Kerri Weems had let the pace and rhythm of her life get out of control At first the consequences were only physical but they quickly impacted her spiritual life Since then God has been teaching her to walk in time with him he is teaching her to be led rather than driven In this book she opens up her life and shares this journey with the reader God's best for each of us is that we go the full distance of our race and not just crawl exhausted across the finish line God wants us to enjoy the race and cross the line with our heads held high a smile on our faces and our arms lifted in a double fist punch Getting to that moment is all about learning the rhythms of grace and pacing ourselves for the long run

Buzsáki, 2006 Studies of mechanisms in the brain that allow complicated things to happen in a coordinated fashion have produced some of the most spectacular discoveries in neuroscience This book provides eloquent support for the idea that spontaneous neuron activity far from being mere noise is actually the source of our cognitive abilities It takes a fresh look at the coevolution of structure and function in the mammalian brain illustrating how self-emerged oscillatory timing is the brain's fundamental organizer of neuronal information The small world like connectivity of the cerebral cortex

allows for global computation on multiple spatial and temporal scales The perpetual interactions among the multiple network oscillators keep cortical systems in a highly sensitive metastable state and provide energy efficient synchronizing mechanisms via weak links In a sequence of cycles Gy rgy Buzs ki guides the reader from the physics of oscillations through neuronal assembly organization to complex cognitive processing and memory storage His clear fluid writing accessible to any reader with some scientific knowledge is supplemented by extensive footnotes and references that make it just as gratifying and instructive a read for the specialist The coherent view of a single author who has been at the forefront of research in this exciting field this volume is essential reading for anyone interested in our rapidly evolving understanding of the brain
