Modern Physics and Ancient Faith Stephen M.

Barr, 2003-02-28 A considerable amount of public debate and media print has been devoted to the war between science and religion. In his accessible and eminently readable new book *Stephen M Barr demonstrates that what is really at war with religion is not science itself but a philosophy called scientific materialism*. *Modern Physics and Ancient Faith* argues that the great discoveries of modern physics are more compatible with the central teachings of Christianity and Judaism about God, the cosmos, and the human soul than with the atheistic viewpoint of scientific materialism. Scientific materialism grew out of scientific discoveries made from the time of Copernicus up to the beginning of the twentieth century. These discoveries led many thoughtful people to the conclusion that the universe has no cause or purpose, that the human race is an accidental by-product of blind material forces, and that the ultimate reality is matter itself. Barr contends that the revolutionary discoveries of the twentieth century run counter to this line of thought. He uses five of these discoveries: the Big Bang theory, unified field theories, anthropic coincidences, Gödel's Theorem in mathematics, and quantum theory, to cast serious doubt on the materialist's view of the world and to give greater credence to Judeo-Christian claims about God and the universe. Written in clear language, Barr's rigorous and fair text explains modern physics to general readers without oversimplification. Using the insights of modern physics, he reveals that modern scientific discoveries and religious faith are deeply consonant. Anyone with an interest in science and religion will find *Modern Physics and Ancient Faith* invaluable.

Simple and Fun Science D. Dennis McKee, Lynn Wicker, 2024-12-31 This resource is for grades 3-5 and aligns to the National Science Standard 1, 2, 3, 4, 5, 6, 7, and 8. The study of science is important because it helps us understand how the world works. That understanding is a reward in itself. But with that understanding, we can find ways to improve our food, comfort, learning, health, safety, transportation, communication, and a whole lot more. One way we learn science is by reading about discoveries made by scientists. Another way is by learning how scientists do their work and then through experiments and activities, make discoveries on our own. The *Simple and Fun Science Simplified* series offers students both paths to understanding science.

Perhaps some day you too will make an important discovery that will add to our understanding of how the world works
