Our Humanist Heritage George Frater,2010-07 This fast paced and well documented analysis of the government s steady march away from God will either thrill or anger you depending on your worldview For those of us who acknowledge the Creator of the Universe as our God Savior and Lord this document tends to stir up both the sadness at the exponential slippage from our foundations as a Country and a challenge to stand strongly and openly against the growing intensity of those who would remove religion from America The nations rage sometimes and imagine a vain thing but he who sits in the heavens shall laugh Mr Frater has done a wonderful job of tracing the Humanist movement from its early inception and its subtle and damaging impact on our nation over the decades All serious students of history and those of Kingdom concern should avail

Scientific Literacy Under the Microscope John Loughran,Kathy Smith,Amanda Berry,2011-11-19 Scientific literacy is generally valued and acknowledged among educators as a desirable student learning outcome However what scientific literacy really means in terms of classroom practice and student learning is debatable due to the inherent complexity of the term and varying expectations of what it means for learning outcomes To date the teacher voice has been noticeably absent from this debate even though the very nature of teacher expertise lies at the heart of the processes which shape students scientific literacy The chapters that comprise this book tap into the expertise of a group of primary teachers from Our Lady of Good Counsel OLGC a primary school that chose to actively engage in teaching for scientific literacy By analyzing the insights and thinking that emerged as they attempted to unravel some of the pedagogical complexities associated with constructing an understanding of scientific literacy in their own classrooms these teachers demonstrate the professional knowledge and skill inherent in the expertise of teaching and learning science in a primary classroom The chapters in this book illustrate the processes and structures that were created at OGLC to provide the conditions that allowed these teachers to explore and build on the range of ideas that informed their approach to teaching for scientific literacy This book is a compelling example of how a whole school approach to scientific literacy can make a difference for students learning of science and offer a concrete example of the development of professional knowledge and practice of teachers
