political objectives become concrete      *Encyclopedia of Ancient Natural Scientists* Paul T. Keyser, Georgia L. Irby-Massie, 2008-11-19 The *Encyclopedia of Ancient Natural Scientists* is the first comprehensive English language work to provide a survey of all ancient natural science from its beginnings through the end of Late Antiquity. A team of over 100 of the world's experts in the field have compiled this *Encyclopedia* including entries which are not mentioned in any other reference work, resulting in a unique and hugely ambitious resource which will prove indispensable for anyone seeking the details of the history of ancient science. Additional features include a Glossary, Gazetteer, and Time Line. The Glossary explains many Greek or Latin terms difficult to translate whilst the Gazetteer describes the many locales from which scientists came. The Time Line shows the rapid rise in the practice of science in the 5th century BCE and rapid decline after Hadrian due to the centralization of Roman power with consequent loss of a context within which science could flourish.

**The Routledge Companion to Strabo** Daniela Dueck, 2017-03-16 The *Routledge Companion to Strabo* explores the works of Strabo of Amasia c. 64 BCE – c. CE 24, a Greek author writing at the prime of Roman expansion and political empowerment. While his earlier historiographical composition is almost entirely lost, his major opus, the *Geography*, includes an encyclopaedic look at the entire world known at the time, numerous ethnographic, topographic, historical, mythological, botanical, and zoological details, and much more. This volume offers various insights to the literary and historical context of the man and his world. The *Companion* in twenty-eight chapters, written by an international group of scholars, examines several aspects of Strabo's personality, the political and scholarly environment in which he was active, his choices as an author, and his ideas of history and geography. This selection of ongoing Strabonian studies is an invaluable resource not just for students and scholars of Strabo himself but also for anyone interested in ancient geography and in the world of the early Roman Empire.

The second part illustrates and develops these ideas in relation to some of the more severe dangers and disasters of the twentieth century, for example, earthquake risk, cities at risk, and the civil disasters of war.
